11-26-12

Ameren Transmission Company of Illinois:

I am writing to oppose the construction and maintenance of a new high voltage Electric service line across the road from my home. The risk is increased for development of cancer, heart arrhythmias, increased leukemia in children, and other health problems. Alzheimers runs strongly in my husband's family and is listed as a high risk from this. I have had type 1 Diabetes for nearly fifty years, and have multiple health problems. I have been an X-ray Technologist for 42 years, and have been exposed to enough radiation already. I had a 7-way cardiac bypass in 2004, and already suffer from arrythmias. I babysit grandchildren here daily (9 years, and 19 months old), and do not want the leukemia risk for them. There is a road ~~too~~ east of our road that would be a great prospect for this venture, as no one lives close by.

Please consider this request. The consequences could be dire. Would you want this tower near your front yard?

Sincerely,
Pamela Cleveland
