ILLINOIS
COMMERCE COMMISSION
JUN 4 - 2013
Office of Chairman
And Commissioners

Dear Mr. Scott,

I am writing to oppose the construction of the Ameren Illinois River Transmission Project through Clark/Edgar Counties. This 345,000 volt power line will negatively affect the residences, businesses, development and wildlife of our area.

My family, neighbors & friends across the entire county are concerned about the adverse health & economic effects which this gigantic power line will have.

The proposed project will negatively impact my family. It runs about 400 feet from my garden. I love to garden. We take care of our grandchildren which live on each side of us. We have a 9yr, 7, 4, 4, 4 1/2yr old that love it here. They will move if this come through, because of fear of cancer. It is so unfair. We love the peace & quiet. The grandchildren help me in the garden. I have a large strawberry patch they love to raid. This will ruin it all.

We raise cattle and they would roam under the powerline. I hope you are in line for the meat. Wow, Powerline Meat Burger, Yum!

Do you love where you live? Can someone move something in on you? Do you love your grand

children?

Wow, maybe a load of hogs to live in front of your home forever! How much would your home be worth then?

Sincerely,
Judy Wright
