Re: Case No. #12-0598

Gentlemen:

We are opposed to the proposed transmission line through Piatt and Douglas County.

This route has not been given due process and public input. It is inefficient and unnecessarily expensive. The route runs miles off course to the north, is longer and outside Ameren's original study area.

This proposed line runs through Piatt/Douglas County which are not now and have never been listed on Ameren's website. There are numerous and expensive ninety degree turns and it crosses through mutiple Amish districts, a registered Native American Archeological Site and next to the Tuscola Airport.

Please advise why this MCPO proposed line is even being considered.

Sincerely,

Thomas J. Wilson

Atwood, Il. 61913
