## Notice Concerning Alternative Compliance Payments associated with the Public Utilities Act's Renewable portfolio standard for alternative retail electric suppliers and electric utilities operating outside their service territories (220 ILCS 5/16-115D)

For Compliance Period: June 2018 through May 2019  
1/16/2019

By its Order, dated November 26, 2018, entered in ICC Docket No. 18-1564, approving the Illinois Power Agency's Electric Procurement Plan, the Commission has established the following maximum alternative compliance payment rates for the June 2018 through May 2019 compliance period:

### Maximum Alternative Compliance Payment Rates

Ameren	ComEd	MidAmerican	Units
\$1.8054	\$1.8917	\$1.2415**	\$/MWH of sales at the customers' meters
<p>** MidAmerican's absolute maximum ACP rate is \$1.2415 per MWH, as shown. However, MidAmerican's budget for renewable energy resources (and hence the effective maximum ACP rate) is limited by a factor reflecting the portion of total electricity requirements that are projected to be met through Illinois Power Agency ("IPA") procurements rather than MidAmerican-owned generating resources. Based on the current forecast of these quantities, that portion is 14.3% (287,000 MWH divided by 2,010,350 MWH), so <u>the effective maximum ACP rate is \$0.1772 per MWH</u>. For the June 2018 through May 2019 compliance period, this maximum ACP rate for MidAmerican will not change.</p>
