ILLINOIS COMMERCE COMMISSION

---

**TO:** All Interested Parties

**FROM:** Jennifer Morris, ICC Staff

**SUBJECT:** Notice of January 16, 2015 Teleconference Workshop Regarding the Illinois Power Agency's Alternative EEAASR Proposal Required by the Illinois Commerce Commission's Final Order in ICC Docket No. 14-0588.

**DATE:** January 12, 2015

---

The Illinois Commerce Commission's December 17, 2014 [Final Order](#) in ICC Docket No. 14-0588 directed "the parties to commence workshops, coordinated by Staff, to pursue the IPA's alternative proposal, with such workshops beginning in January and concluding by mid-February to allow the workshops to inform development of the RFPs."<sup>1</sup> ICC Staff is announcing a public workshop for the purpose of receiving feedback from interested stakeholders to inform the development of the utilities' Request for Proposals ("RFPs") for energy efficiency programs targeting reductions during peak periods (IPA's alternative proposal) that will be issued pursuant to Section 16-111.5B of the Illinois Public Utilities Act.<sup>2</sup>

**Friday, January 16, 2015, 9:00 AM – 12:30 PM**  
**Conference Line # 1-866-418-3591 Passcode: 7951625#**

Parties are encouraged to review the IPA's alternative proposal as summarized in the Commission's Order in Docket No. 14-0588 in preparation for the workshop.<sup>3</sup> Please note that advocates for various positions on issues pertaining to the IPA's alternative proposal should be prepared to discuss them in detail during the teleconference workshop. The workshop agenda along with webinar information<sup>4</sup> will be posted on the Commission's website once available.<sup>5</sup> Please direct any questions pertaining to this workshop to Jennifer Morris [jhinman@icc.illinois.gov](mailto:jhinman@icc.illinois.gov).

<sup>4</sup> Parties are encouraged to utilize the webinar during the teleconference because the utilities will be demonstrating how their cost-effectiveness models will be able to use a time-specific avoided energy cost that would account for the higher price of power that is offset for energy efficiency programs targeting peak periods.
