This memorandum is the initial progress report for Illinois Commerce Commission Order T00-002. [Permission to construct a new grade separation structure to carry the single mainline track of the Chicago, Central and Pacific Railroad Company over a new highway ramp at the interchange complex of FAI Route 290 (Eisenhower Expressway), 294 (Tri-State Expressway) and 88 (East-West Tollway) in and near the Village of Hillside, Cook County.]

The project is on schedule with approximately thirty-six percent of the work complete.

Structural steel fabrication for the new grade separation structure is the controlling activity for the project. Raw materials have been procured and fabrication is proceeding. Structural steel erection is scheduled for the second week of October.

The temporary trestle for the single mainline track was put in service on August 18, 2000. Excavation for the new grade separation substructure has begun. Construction of the new substructure will follow excavation.

The IDOT employee responsible for management of this project is Eugene A. Joynt, PE. Mr Joynt may be contacted as follows:
