Exhibit 1.3
(Resume of Loren Shane Owens)

2000- Feb 2001 Global Systems Inc Kenansville NC
Chief Technology Officer

Responsibilities included the management and coordination of information systems and technology activities. Performed in a leadership role, providing Systems implementation and technical support, while keeping abreast of the latest technological advances in systems hardware, software and application technologies. Ensured that network topology, configurations and systems, for both the company and customers needs, were met and satisfied all requirements. Implemented new computer and networking systems utilizing Cisco, 3Com and Nortel Routers and Switches, Astral Point ON5000 Optical Nodes for SONET/DWDM long haul, Westell, PairGain and Allied Telesyn CSU/DSU's, Paradyne DSLAM's for Voice over DSL, 3Com SIP and NBX100 IP Telephony systems for Voice over IP. Suggested improvements and upgrades to new and existing customer systems. Managed a 7-member network engineering team consisting of network design and implementation technicians. Co-designed over \$6,000,000 fiber optic backbone, to support Voice, Video and Data traffic for the company's region of interest. Responsible for evaluating different vendor's equipment and solutions to ensure they will meet projected company's goals and vision as well as interoperate with existing systems.

1998 - 2000 MCI/Worldcom Cary NC
Sr. Network Consulting Engineer

Provided designs for large routed networks, to include logical network drawings, bill of materials, software configurations and consulting during installation. Responsible for logical configurations, remote management and providing fourth-level support for Cisco Routers/Switches and Verilink CSU/DSUs, AI Switches, Cabletron Hubs, and Xyplex terminal servers. Administered IP address assignments and Point-to-Point/Frame Relay circuit ordering. Carried rotational On-call WAN engineer pager to take corrective action during WAN outages for the primary network equipment and issue outage reports and root cause analyses. Coordinated with Inside Plant Engineering, Inside Plant Construction and Network Management Centers to ensure all requirements are met for new surveillance network deployments.

1991-1998 U.S. Air Force USA
Network Management Specialist

Configuration and management of base infrastructure equipment to include Cisco, Bay and ODS routers, switches, and hubs. Planning, Implementation, training and support of all base networks to include Netware 3.x/4.x, Windows NT, Unix and Banyan Vines. Provide user training for Netware, Windows NT, and 95. Develop migration strategy from Netware to Windows NT.

Education

1991-1997 Community College of the Air Force
AAS / Information Systems Technology
