

FD-1 The Company's petition states on page 3 that the total estimated direct cost of construction for the new transmission line is approximately \$1.6 million in 2001 dollars. Please provide the following estimates in 2001 dollars:

- a) total cost of construction for the new transmission line (including direct and indirect costs, and any other costs associated with the new transmission line)
- b) total cost of the entire project, including; direct cost of construction, indirect cost of construction, right-of-way costs, and any other costs associated with the project
- c) the total cost of the facilities actually being certified in ICC Docket No. 00-0386

ANSWER:

- a) \$1,934,000, including approximately \$334,000 of indirect costs.
- b) The entire interconnection project, including the transmission line, substation, and related work, will cost Elwood approximately \$12 million.
- c) \$1,934,000
