Officers
April 2005**

President and CEO

Mark Iannuzzi is the president and founder of TelNet Worldwide, Inc. a prominent facilities-based telecommunications carrier serving business and residential customers throughout Michigan. Since 1998, Mark has help usher in a new era of telecommunications through innovative product offerings and a commitment to customer service and value. Mark brings an extensive background as a senior executive, successfully developing a number of technology companies and start-up ventures. He holds advance degrees in engineering and business administration. He has received awards for Businessman of the Year and technology achievement awards from the National Science Foundation.

Chief Financial Officer (CFO)

Frank Iannuzzi's career in the financial management industry spans over 25 years as a CPA, and over 20 as the owner and president of a 50-person accounting firm. Frank has worked with hundreds of companies and entrepreneurial firms, providing fundamental guidance, direction, and infrastructure on every facet of business and financial management. These core capabilities have enabled TelNet to maintain positive growth, cash flow, and profitability. His stellar reputation in the financial industry has been an important resource to evaluate and secure funding for TelNet.

Chief Operating Officer (COO)

David Cushing has been TelNet Worldwide's Director of Operations since November 2004. Prior to joining TelNet, Dave was VP of Operations for Focal Communications Corporation from 2002-2004, and was responsible for day-day field operations, network monitoring and maintenance, and service provisioning. Dave worked for Focal from 1997-2004, as VP of Central Region sales and service from 2000-2002, General Manager of Focal's Michigan from 1999-2000 and Director of Product Development and Business Analysis from 1997-1999. Dave holds a Bachelor of Science degree in General Engineering from the University of Illinois, and a Masters of Business Administration from the University of Chicago.

Director of Systems Engineering

Pete Iannuzzi holds an advanced degree in engineering and brings over 15 years of experience with companies such as Hewlett Packard and VSA. Over the course of his career, Pete has established himself as a versatile, motivated, and exacting individual, engaged in a wide-range of engineering design, analysis and systems development assignments. These qualities and achievements have made him a highly sought and respected individual. Since 1998, Pete has designed, evaluated and oversaw TelNet's entire facilities based network (transport, interconnection, and equipment), including all of TelNet's Central Offices and Gateways.

Director of Customer Service

Linda Cutright is the Director of Customer Service for TelNet Worldwide, Inc. Since 1998 Linda has orchestrated and evolved TelNet's customer service organization into a highly effective and motivated team, continually receiving superior ratings from TelNet's customer base. Linda and her group support a wide range of tasks, including the development of business process and interfacing with other carriers. Prior to joining TelNet, Linda worked for over 20 years in customer service at General Motors Corporation, supporting the IT deployment and training functions necessary for GM's North American dealership network.

Executive Director of Sales

Mark Swope is the Executive Director of Sales for TelNet Worldwide, Inc. Mark has over 25 years experience in the telecommunications industry, 15 years of RBOC service, and 10 years of Distributor/VAR employment during which he has held positions ranging from service representative to Vice President. He has earned numerous recognition and achievement awards for service and sales during his career. Mark's knowledge, skill and straightforward manner have earned him widespread respect and trust amongst TelNet's enterprise and service provider market base.
