

**Petition in OPPOSITION to the proposed 345,000-volt Prairie State Transmission Line**

We, the undersigned, petition for fair and prudent use of public authority by AmerenIP and the Illinois Commerce Commission. We petition for acknowledgment of the diverse health hazards and the visual blight attending overhead high-voltage transmission systems. We petition for recognition of the authentic property valuation threat posed by burdening lands with high-voltage right-of-ways. We petition for high-voltage easement placement that providently minimizes impact upon local taxation districts and developing communities. We petition for placement outside zones critical to current and future residential use and for placement outside areas of optimal local revenue generation. We petition for the burdens and costs of the Prairie State Energy Campus to be equally distributed among all who benefit from increased connectivity within the Midwestern electrical grid, and NOT inequitably placed upon the shoulders of defenseless individuals, growing communities, and vulnerable taxing districts. We petition for better than what is proposed.

## AmerenIP-Proposed High Voltage Transmission Line

We the voting citizens of the City of Red Bud, Village of Baldwin and Randolph County, Illinois do hereby unite and resolute that the proposed route for the AmerenIP High Voltage Transmission Lines will have an intensely negative impact on the economic growth of our community and property values.

We are also very sensitive to the health concerns related with electromagnetic field radiation (EMF).

Therefore, we strongly plead that an alternative route be utilized that will have less of an adverse impact on the residents of the City of Red Bud, Village of Baldwin, and Randolph County, Illinois.

**Petition in OPPOSITION to the proposed 345,000-volt Prairie State Transmission Line**

We, the undersigned, petition for fair and prudent use of public authority by AmerenIP and the Illinois Commerce Commission. We petition for acknowledgment of the diverse health hazards and the visual blight attending overhead high-voltage transmission systems. We petition for recognition of the authentic property valuation threat posed by burdening lands with high-voltage right-of-ways. We petition for high-voltage easement placement that providently minimizes impact upon local taxation districts and developing communities. We petition for placement outside zones critical to current and future residential use and for placement outside areas of optimal local revenue generation. We petition for the burdens and costs of the Prairie State Energy Campus to be equally distributed among all who benefit from increased connectivity within the Midwestern electrical grid, and NOT inequitably placed upon the shoulders of defenseless individuals, growing communities, and vulnerable taxing districts. We petition for better than what is proposed.

**Petition in OPPOSITION to the proposed 345,000-volt Prairie State Transmission Line**

We, the undersigned, petition for fair, prudent and appropriate use of public authority by AmerenIP and the Illinois Commerce Commission. We demand acknowledgement of the diverse health hazards and the visible blight attending overhead high-voltage transmission systems. We demand recognition of the authentic property valuation threat posed by burdening lands with high-voltage right-of-ways. We demand high-voltage easement placement that prudently minimizes impact upon local taxation districts and developing communities. We demand placement outside zones critical to current and future residential use and outside areas of optimal revenue generation. We demand that the burdens and costs of the Prairie State Energy Campus be fairly distributed among all end-users of generated electric and NOT inequitably placed upon the shoulders of defenseless landowners, growing communities, and vulnerable taxing districts. We demand better than what is proposed.

## AmerenIP-Proposed High Voltage Transmission Line

We the voting citizens of the City of Red Bud, Village of Baldwin and Randolph, Monroe, and St. Clair Counties, Illinois do hereby unite and resolve that the proposed route for the AmerenIP High Voltage Transmission Lines will have an intensely negative impact on the economic growth of our community and property values therein.

We are also very sensitive to the health concerns related to electromagnetism (EMF).

Therefore, we strongly plead that an alternative route be utilized that will have less of an adverse impact on the residents of the City of Red Bud, Village of Baldwin, and Counties of Randolph, Monroe and St. Clair Counties, Illinois.

**Petition in OPPOSITION to the proposed 345,000-volt Prairie State Transmission Line**

We, the undersigned, petition for fair and prudent use of public authority by AmerenIP and the Illinois Commerce Commission. We petition for acknowledgment of the diverse health hazards and the visual blight attending overhead high-voltage transmission systems. We petition for recognition of the authentic property valuation threat posed by burdening lands with high-voltage right-of-ways. We petition for high-voltage easement placement that providently minimizes impact upon local taxation districts and developing communities. We petition for placement outside zones critical to current and future residential use and for placement outside areas of optimal local revenue generation. We petition for the burdens and costs of the Prairie State Energy Campus to be equally distributed among all who benefit from increased connectivity within the Midwestern electrical grid, and NOT inequitably placed upon the shoulders of defenseless individuals, growing communities, and vulnerable taxing districts. We petition for better than what is proposed.

**Petition in OPPOSITION to the proposed 345,000-volt Prairie State Transmission Line**

We, the undersigned, petition for fair, prudent and appropriate use of public authority by AmerenIP and the Illinois Commerce Commission. We demand acknowledgement of the diverse health hazards and the visible blight attending overhead high-voltage transmission systems. We demand recognition of the authentic property valuation threat posed by burdening lands with high-voltage right-of-ways. We demand high-voltage easement placement that prudently minimizes impact upon local taxation districts and developing communities. We demand placement outside zones critical to current and future residential use and outside areas of optimal revenue generation. We demand that the burdens and costs of the Prairie State Energy Campus be fairly distributed among all end-users of generated electric and NOT inequitably placed upon the shoulders of defenseless landowners, growing communities, and vulnerable taxing districts. We demand better than what is proposed.
