

Unused & reduced electrical usage

Carol Jacobs-Lugge

Page 4

These are the 24" paired fluorescent tubes over the kitchen work area. Two of the fixtures have had their bulbs removed.

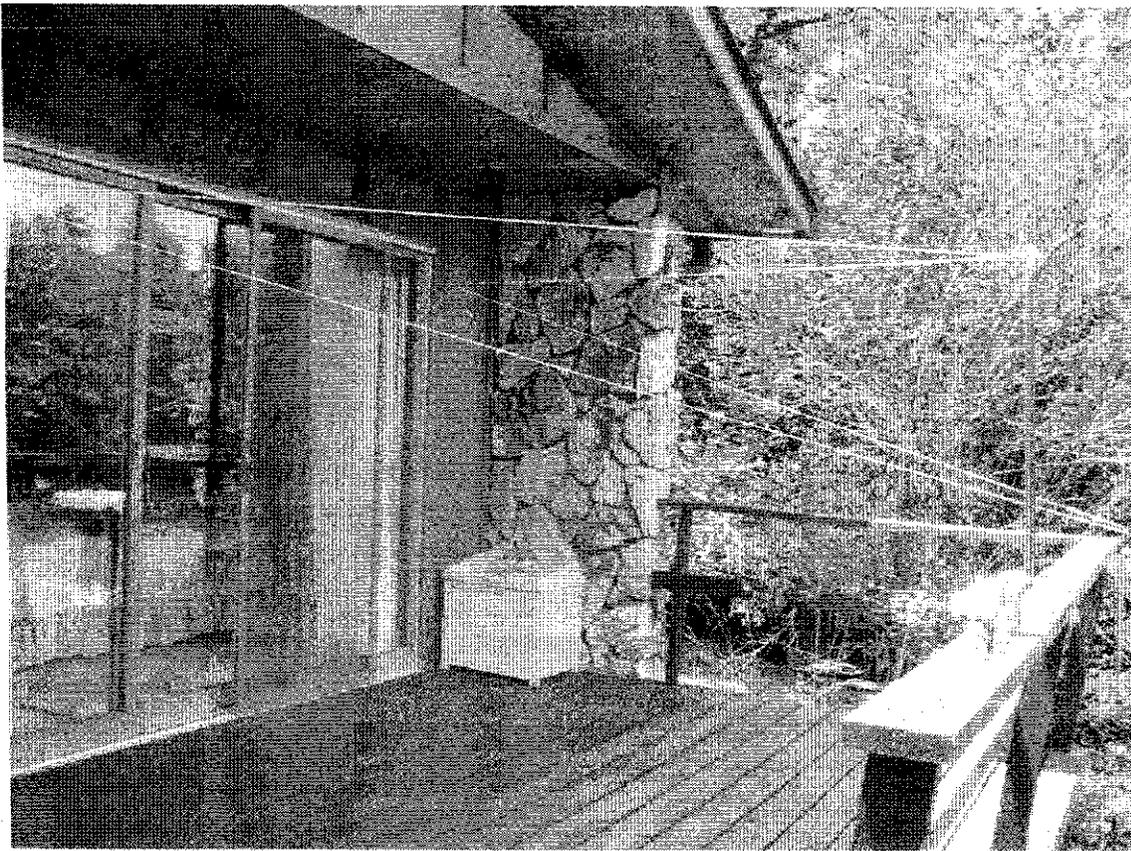

This is the light over the kitchen table. There *were* three pairs of 24" fluorescent tubes, but one pair (the back pair) has been removed. The dark area along the back edge is easily observable.

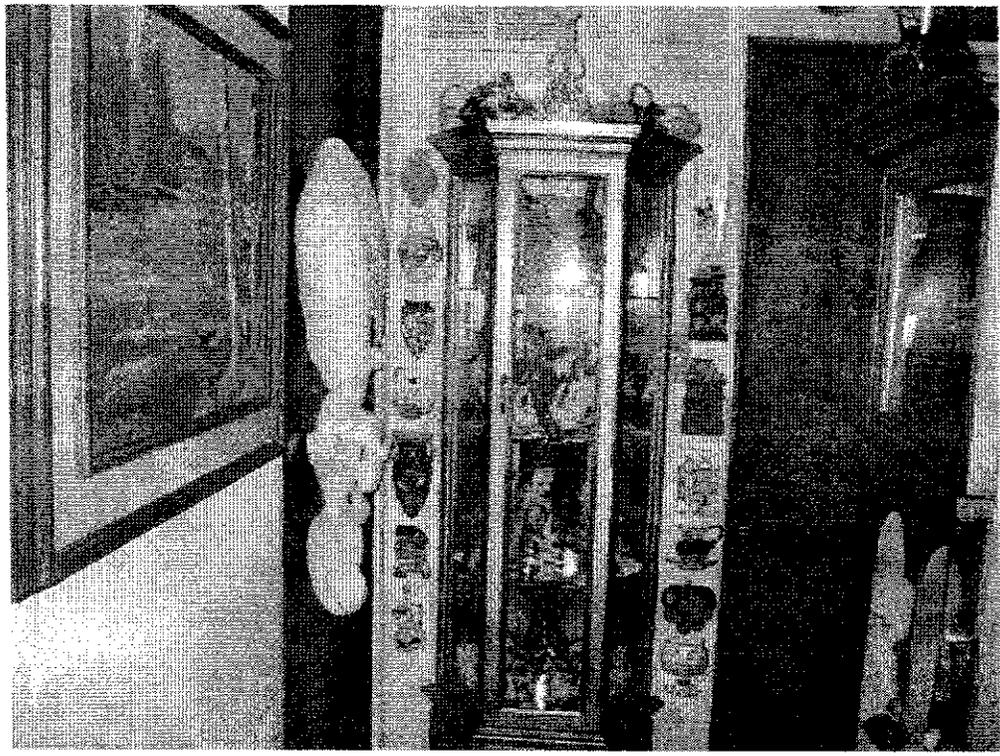

Unused & reduced electrical usage

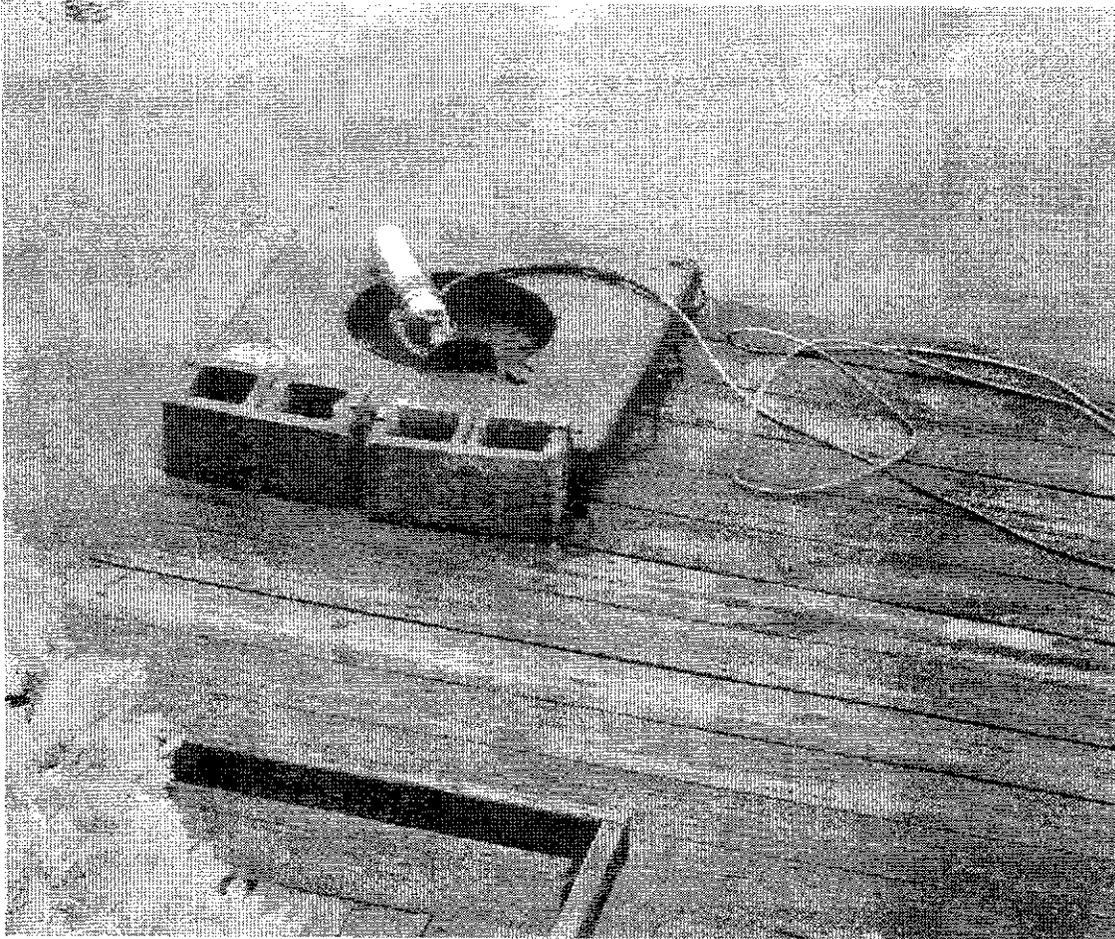

Carol Jacobs-Lugge

Page 5

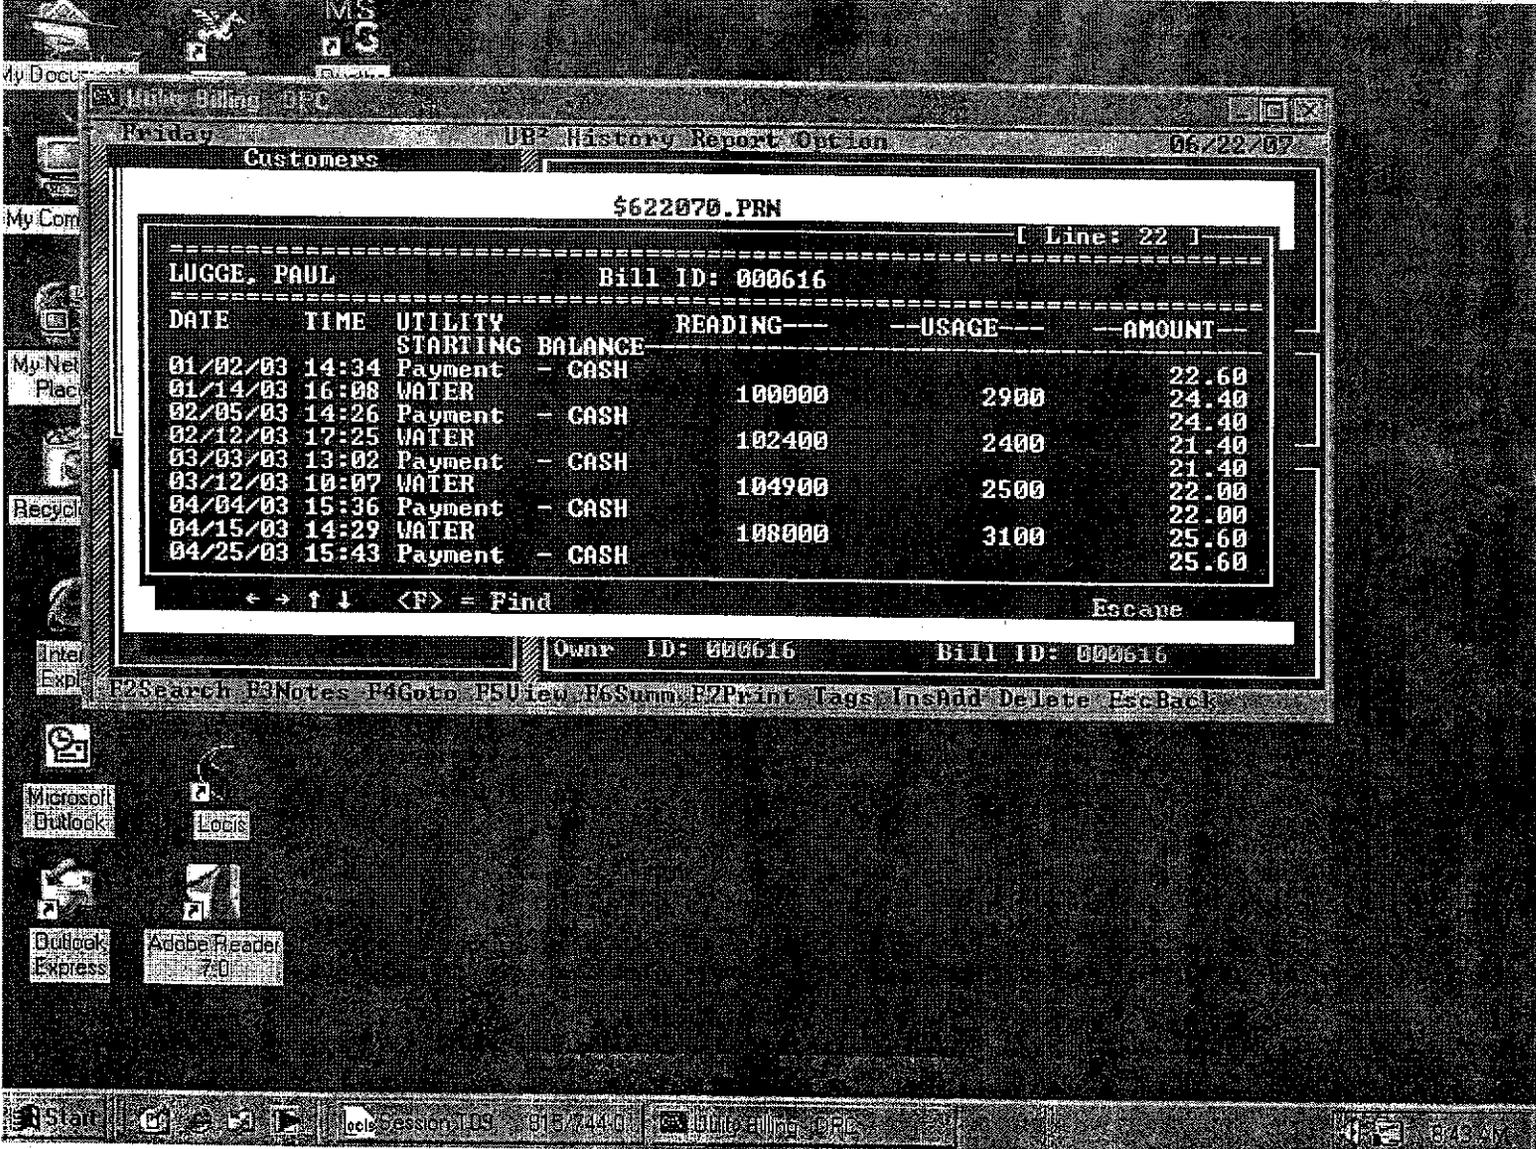

I have even been using a clothesline (above) to dry things, instead of the electric dryer, and have closed off unused rooms to reduce the furnace or air conditioner usage.

This is the aerator that has been pulled from the lake.

The water bills of 2003 indicate our monthly usage for that year when my husband was alive.

By comparing that usage with my usage from June 2006 through May 2007 readily observable is the fact that my usage alone dropped to less than half that of the months in 2003.

AGAIN, I raise the question of how is it possible that my Ameren usage alone is sometimes double the usage of two people?

IT SIMPLY IS NOT POSSIBLE!

Carol Jacobs-Lugge
