---

**WATER SERVICE****CUSTOMER ACTIVATION CHARGE**

In each case where water is established at the request of a customer, an initial charge of \$10.00 will be added to the first bill for service.

**MISCELLANEOUS TEMPORARY USES**

Charges to be based upon metered usage of water at rate of \$5.3565 per ccf plus a charge for reasonable installation costs and necessary attendance.

**RECONNECTION CHARGES**

Where service has been disconnected pursuant to the Company's Rules, Regulations and Conditions of Service, there shall be a reconnection charge of \$32.00 if made during normal business hours. The charge for any service turned on at the request of a Customer after regular business hours or on Saturdays, Sundays or holidays, will be the actual cost incurred by the Company.

**CHARGE FOR NOT SUFFICIENT FUNDS CHECK**

When a customer pays by a check which is returned to the Company NSF (Not Sufficient Funds), or an automatic debit to the customer's approved bank account as payment for water service is not recognized, due to non-sufficient funds, the customer will be assessed a charge of \$15.00. The Company may serve a customer on a cash basis only if more than one check of the customer is returned NSF in a twelve-month period. "Cash" shall be deemed to mean U.S. currency, U.S. postal money order, or certified check.

**LATE PAYMENT CHARGE**

A late payment charge will be added to a customer's account if that customer's bill is not paid within two (2) days following the due date printed on the bill. For customers which are units of government, the late payment charge will be added forty-five (45) days after the bill was rendered. The bill shall be considered rendered to the customer when deposited in the U.S. mail with postage prepaid. If delivery is by other than U.S. mail, the bill shall be considered rendered when delivered to the last known address of the party responsible for payment. The late payment charge will equal one and one-half (1-1/2) percent per month of the past due amount, including amounts previously past due.

For each residential account, the late payment charge shall be waived one time per twelve (12) month period for accounts billed monthly. However, the Company may assess a charge if the amount on which the late payment charge was waived remains unpaid thirty (30) days following the due date. At its discretion, the Company may waive more than one late payment charge for residential customers.

**WATER SERVICE****STANDBY DEMAND WATER SERVICE**

Applicable to any customer who uses water from the customer's own wells or other sources and who uses, or desires to use, the Company's water service as a standby, auxiliary, or reserve service. Such standby service will be provided when the customer's own wells or alternative sources of water are inoperative or inadequate. Each customer served under this rate shall be required to enter into a written contract with the Company subscribing to a specific level of daily standby capacity and incorporating the provisions of this rate.

**BASIC SERVICE CHARGE**

A standby customer shall pay a basic service charge as specified in the Company's general water service tariffs for the Pontiac District applicable to the customer's meter sizes.

**STANDBY DEMAND CHARGES**

In addition to the foregoing basic service charge, a standby demand customer shall pay the following standby demand charges, regardless of the usage of water:

\$0.82 per ccf per day of subscribed daily standby capacity

The initial daily standby capacity shall be determined by the amount subscribed in the contract. The contracted demand may be resubscribed on an annual basis but any usage above subscribed demand during the summer season (June 1 through September 30) will automatically become the new subscribed level until 12 months expire.

**STANDBY USAGE CHARGES**

In addition to the foregoing basic service and standby demand charges, standby demand customers shall pay the following usage charges:

\$2.0683 per ccf for the first 1,000 ccf usage in any month  
\$1.1717 per ccf for all usage in excess of 1,000 ccf in any month

For all ccf taken in excess of subscribed daily standby capacity, a standby demand customer shall pay the following charge:

\$3.8889 per ccf for all ccf in excess of subscribed daily standby capacity

**SUPPLEMENTAL STANDBY DEMAND SERVICE**

Upon forty-eight (48) hours prior written notice to the Pontiac District Manager of the Company, and provided that the Company determines it has available capacity and only for as long as the Company so determines, a standby demand customer may obtain standby capacity in excess of subscribed standby capacity. The customer's notice shall specify the amount of supplemental daily standby capacity requested and the dates when the customer desires that the supplemental service begin and terminate. Supplemental standby demand service shall not be unreasonably withheld. Supplemental standby demand service shall terminate upon forty-eight (48) hours notice to a customer that the Company has determined that it no longer has available capacity, or upon two (2) hours notice in the event of an emergency, or upon the termination date requested by the customer, or upon written notice from the customer to the Pontiac District Manager that the customer no longer desires such service, or in the event that a customer has not taken in excess of subscribed daily standby capacity for seven (7) consecutive days. During supplemental standby demand service, the excess standby demand charge shall not apply. Upon termination of supplemental standby demand service for any reason, the excess standby demand charge shall be applicable. For supplemental standby demand service, a standby demand customer shall pay the following supplemental standby demand service charge:

\$1.983 per ccf for all supplemental ccf in excess of subscribed daily capacity

conforming to the provisions of this rule, and shall pay in advance to the Company the estimated cost of the extension (less one and one-half (1-1/2) times such estimate of first year's revenue from immediately attaching Customers).

- E. Estimates of annual revenue shall be made by the Company and shall be the average revenue received from similarly situated "customers. When there are no similarly situated customers, the Company's estimate of the annual revenue will be based on the anticipated average annual water usage of the Customer as determined by the Company.
- F. Original prospective Customers to be considered in C and D above shall be those who sign an agreement for at least one year's water service and guarantee to the Company that they will take water service at their premises within thirty (30) days after the date water is turned into the main and whose regular service connections are directly connected to the mains installed under said extensions.
- G. Should the actual cost of the extension be less than the estimated cost, the Company shall refund the difference as soon as such actual cost has been ascertained. Should the actual cost of the extension exceed the estimated cost, the applicant shall immediately pay the difference.
- H. The Company reserves the right to further extend its water mains from and beyond each water main extension made under this rule and the person paying for the original extension under this rule in the manner provided for shall not be entitled to a refund for additional new Customers of the Company attached to any such further extension, except and unless water service was available in the public highway and adjacent and available to the premises and to the structure or other point of service on the premises of such Customer from the original extension made by the Company pursuant to this rule. If the extension abuts property which the applicant does not own or have an interest in, the utility shall prorate the cost of the extension on a front-foot basis; and if, during the term of the extension agreement, the Owner or occupant of such property requests water service, the utility shall collect from such new applicant an amount equal to his pro rata cost of the extension less one and one-half (1-1/2) times the estimated annual revenue to be received from said new applicant. The utility shall refund money so collected to the original applicant, such refund being in addition to the refund provided for in paragraph G above.
- I. Refunds shall be made to the party who made such application and paid for such extension for each additional new Customer (other than "Customers who will immediately attach to the extension" as above referred to) who shall attach to and take service from the extension within one(1) year from the date of completion of such extension

actual revenue received by the Company for such customers, provided the actual revenue is greater than the estimated revenue. If actual revenue is less than the estimated revenue, the difference shall be used as an offset against revenues which would otherwise become the basis for refund from additional new customers, providing such potential exists.

6. The Company further agrees that it shall make refunds to the Applicant to be determined by multiplying by one and one-half (1-1/2) the average annual residential revenue for each additional new residential customer and by multiplying by one and one-half (1-1/2) the actual first year's billing for each new commercial, industrial and other non-residential customers who shall attach to and take service from the extension within one (1) year from the date of completion of such extension, provided such additional new customers shall make application for Regular Metered Water Service Connections.

7. Total refunds to be made by the Company under this Agreement shall in no event exceed in the aggregate the amount paid to the Company by the Applicant for the extension. No interest shall be payable by the Company on the Applicant's advance or any unrefunded balance thereof.

8. On and after ten (10) years from the date of completion of such extension, all rights of Applicant to refunds, as provided for in Paragraphs 5 through 7 above, shall cease and terminate and any amounts not then refunded shall belong to and be retained by the Company.

9. If the extension abuts property which the Applicant does not own or have an interest in, the Company shall prorate the cost of the extension on a front-foot basis, and if during the term of this Agreement, the Owner or occupant of such property requests water service, the Company shall collect from such new Applicant an amount equal to his pro rata cost of the extension less one and one-half (1-1/2) times the estimated annual revenue to be received from such new Applicant. The Company shall refund money so collected to the original Applicant. One (1) year from the date of completion of this extension, all rights of the original Applicant to refunds under this paragraph shall terminate unless specifically agreed to in a separate agreement.

10. Except as provided in Paragraphs 4, 5, 6 and 9, the Company shall make no refunds of the advance, or any portion thereof, paid by the Applicant under Paragraph 3.

Ninth Revised Sheet No. 16.1  
Canceling Eighth Revised Sheet No. 16.1

APPLICABLE TO ALL TERRITORY SERVED EXCLUDING THE LINCOLN DISTRICT  
METERED LARGE USER WATER SERVICE

Available For

Service under this tariff is available to any Customer whose usage of water supplied by the Company to a common distribution system owned solely by such Customer was 250,000 ccf or greater during the twelve-month period immediately preceding the date upon which the Customer elects to take service under this tariff. For this purpose, "common distribution system" shall include multiple accounts serving the Customer at a single location or premises.

Service Agreement

A Customer which elects to take service under this tariff will be required to execute a 5-year service agreement pursuant to which the Customer agrees to use the Company as its sole source of water supply, other than any source of supply owned solely by the Customer and located wholly on the Customer's premises, during the term of the service agreement. The Service Agreement will specify those mains or service lines serving the Customer's location or premises for which a demand meter will be installed under this tariff. In the event that the Company and Customer agree that a demand meter should not be installed on a given service line, the service for such line shall be billed under a separate account, and not under this tariff.

Customer Charges

All metered Large User Water Service Customers shall pay the Customer Charges by size of meter installed (or multiple meters installed--in which case, the charge is based on the total of all meters installed) as set forth in the Metered General Water Service schedule of rates, plus an additional amount of \$50 per meter per month (for each demand meter).

Usage Rates

In addition to the Customer Charges provided for above, each Customer shall be charged for usage as set forth herein. For a Customer which also takes service under the Standby Water Service Tariff, the charges for usages as set forth herein shall be applicable only to monthly use in excess of a daily average use equal to 2/3 of the Customer's Contractual Demand. For usage up to that daily average, such Customer shall pay the usage rate specified in the Standby Water Service Tariff. For each Customer which maintains annual usage of water supplied by the Company in the amount of 250,000 ccf or greater, as determined monthly on a rolling 12-month basis, the charge for usage each month shall be the lesser of (i) the amount calculated on the basis of the Usage Rates which would otherwise be applicable to that Customer under the Metered General Water Service Schedule of rates or (ii) the amount calculated in accordance with the Usage Rate Formula set forth below. The Usage Rate Formula incorporates the Customer's volumetric and capacity demands through the use of a graduated schedule of rates dependent on the Customer's maximum day demands in relation to the Customer's average day demands (i.e., the maximum day demand ratio), as follows:

Usage Rate per CCF = \$1.2731 + [\$0.8056 x (Maximum Day Demand Ratio - 1.00)]

25. EXTENSION OF DISTRIBUTION MAINS (Cont'd.)  
(D) (Cont'd.)

after the date water is turned into the main, and whose service connections are directly connected to the mains installed under said extension. Estimates of annual revenue will be made by the Company and shall be the average revenue received from similarly situated Customers. Where there are no similarly situated Customers, the Company will make an estimate of the annual revenue, based upon reasonable assumptions.

- (E) Should the main be installed under a Main Extension and Deposit Agreement and should the actual cost of the extension be less than the estimated cost, the Company will refund the difference to the Applicant as soon as the actual cost has been ascertained. Should the main be installed under a Main Extension and Deposit Agreement and should the actual cost of the extension exceed the estimated cost, the difference shall be billed to the Applicant as soon as the actual cost has been ascertained and shall be offset from refunds the Applicant is to receive from the Company, until recouped, in full, by the Company.
- (F) During the first one (1) year after the Main Extension is placed in service or the Applicant transfers the Facilities under the Construction Agreement, whichever is applicable, the Company shall refund to the depositor, for each additional new customer taking service from the main installed pursuant to such Agreement who is not considered an "Original Prospective Customer" thereunder, an amount equal to one and one-half (1-1/2) times the annual average water revenue of similar situated customers. If there are no similar situated customers, the Company shall refund one and one-half (1-1/2) times the actual annual revenue received. Such refund shall be made at the end of each calendar year. In addition, during such ten year period, if the proposed extension abuts property not owned by the Applicant or in which the Applicant has no legal interest, the Company will determine the cost-per-servable-front-foot of the extension, so that if the owner or other party having an interest in the aforementioned non-abutting property should make application to receive water service from the main, the Company will collect from said new Applicant an

the estimated revenue, the difference shall be used as an offset against revenues which would otherwise become the basis for a refund pursuant to subparagraph (b).

(b) During the first one (1) year after the date upon which the Main Extension is placed in service, the WATER COMPANY shall refund to the DEPOSITOR, for each additional new customer taking service from the Main Extension installed pursuant hereto under a regular yearly contract, at the end of the first year's billing for service to such additional new customer (i.e., a customer which was not considered an original customer for purposes of crediting the DEPOSITOR under the calculation set forth on the Supplemental Memorandum), an amount equal to one and one-half (1-1/2) times the annual average water revenue of similarly situated customers. If there are no similarly situated customers, the WATER COMPANY shall refund one and one-half (1-1/2) times the actual annual revenue received.

7. If the proposed extension abuts property not owned by the DEPOSITOR or in which the DEPOSITOR has no legal interest, the WATER COMPANY shall determine the cost-perservable-front-foot of the extension, so that, if during the first ten (10) years after the date upon which the deposit required by paragraph 3 is made, the owner or other party having an interest in the aforementioned property should make application to receive water service from the main installed under this Agreement, the WATER COMPANY shall collect from said new Applicant an amount equal to his pro-rata share of the cost of the Main Extension, based on cost-per-servable-front-foot. For this purpose, the "cost-per-servable-front-foot" shall be determined by dividing costs paid by the DEPOSITOR by the "net-servable-front-footage." Net-servable-front-footage shall be determined by multiplying the length of the main, in feet, by two and subtracting therefrom the length of all non-frontage property and all frontage property from which service may not be provided, due to the physical characteristics of the property (e.g. main under a street or railroad line, or next to a cliff). In this determination; both sides of the main should be considered. Non-frontage property, by definition within these rules, results where a single lot or parcel of property is abutted by the main on more than one side (e.g. a corner lot). In such a case, only the length of main running parallel to the street from which such parcel takes its postal address shall be considered as "servable." If a parcel does not have a street address, it is the length of main which runs most parallel to the lot line which the principal structure located on such parcel faces. If there is no structure on the parcel at the time the calculation is made, the longest length of main abutting a single side of such parcel shall be the portion deemed servable. This amount so collected shall be transferred to the DEPOSITOR, and, other than the refunds to be made pursuant to paragraph 6,

Water Company has estimated the expected revenue to be received from such customer for purposes of the calculation made in Subsection 1(b), upon completion of the first yearly billing period of such customers, the Water Company shall refund an amount equal to one and one-half (1-1/2) times the difference between the annual revenue originally estimated by the Water Company and the actual revenue received, provide that the actual revenue is greater than the estimated revenue. if the actual revenue is less than the estimated revenue, the difference shall be used as an offset against revenues which would otherwise become the basis for a refund pursuant to Subsection (b) of this Section 6.

(b) During the first one (1) year after the date upon which the Facilities are conveyed to the Water Company pursuant to Subsection 3(d), the Water Company shall refund to Developer, for each additional new customer (i.e., a customer which was not considered in the credit given to Developer pursuant to Subsection 1(b)) taking service from the water main(s) constructed by Developer pursuant to this Agreement under a regular yearly contract, at the end of the first year's billing for service to such additional new customer, an amount equal to one and one-half (1-1/2) times the annual average water revenue of similarly situated customers. If there are no similarly situated customers, the Water Company shall refund one and one-half (1-1/2) times the actual annual revenue received.

(c) If the water main(s) constructed by Developer pursuant to this Agreement abut(s) property not owned by the Developer or in which the Developer has no legal interest at the date hereof, the Water Company will determine the cost-per-servable-front-foot of the main(s), so that if the owner or other party having an interest in the aforementioned non-abutting property should make application to receive water service from the main(s) during the first ten (10) years after the date on which Developer transfers the Facilities to the Water Company pursuant to Section 3(d) above, the Water Company will collect from said new applicant an amount equal to his pro-rata share of the cost of the main(s), based on such cost-perservable-front-foot. For this purpose, the "cost-per-servable-front-foot" shall be determined by dividing the actual costs paid by the Developer in constructing the Facilities by the "netservable-front-footage." "Net-servable-front-footage" shall be determined by multiplying the length of the main(s), in feet, by two, and subtracting therefrom the length of all non-frontage property and all frontage property from which service may not be provided, due to the physical characteristics of the property (e.g., where the main is under a street or railroad line, or next to a cliff). In determining "net-servable-front-footage", both sides of the main shall be considered. For purposes of the preceding, non-frontage property will only be deemed to exist
