RE: ICC Second Proposed Order #T90-0022
Village of Franklin Park

Mr. Bernard L. Morris
Chief Railroad Engineer
Illinois Commerce Commission
527 East Capitol Avenue
Springfield, IL 62794

Dear Mr. Morris:

We have reviewed the Hearing Examiner's second proposed Order and have the following comments:

1. The last sentence of the second full paragraph on Page 10 should end "...provided approval is granted by the Illinois Department of Transportation".
2. Add (13) and (14) to the described findings under the heading Improvement in Appendix A.
3. The third line of the full paragraph in Appendix A should include Findings (13) and (14).
4. As requested in our March 13, 1991 letter, please change the portion of Appendix A that reads "IDOT, as it has voluntarily agreed to do, will bear 10% of the project cost in exchange for the jurisdictional transfer of Grand Avenue to the Village; any remaining cost should be borne by the Village and IDOT equally (IDOT has also voluntarily agreed to pay 50% of this remaining cost)"; to read "IDOT, as it has voluntarily agreed to do, will bear 10% of the project cost in exchange for the jurisdictional transfer of Grand Avenue to the Village upon the issuance of this Order; the Village will pay 50% with a contribution by North Central Council, which IDOT will match. After all the above costs are deducted, IDOT will pay 50% of the balance with the Village picking up the other 50%".
5. We request that the following comment be included in Appendix A. "The division of cost listed in this order is proportioned between the parties in accordance with the September 20, 1990 revised letter of understanding between the Village and IDOT, and the conditions of the letter shall prevail". This change was also requested in our March 13, 1991 letter.

DOCKETED

If you have any questions, please let us know.

Very truly yours,

William T. Sunley, P.E.
Engineer of Local Roads
and Streets
