- Notes:
- (1) ComEd's Geographical Information System (CEGIS) is ComEd's electronic mapping software.
  - (2) Aurora pole count is estimated.
  - (3) Poles over 50 feet are estimated in the table below. Wood poles 50 feet or less in length are assumed to be poles that may have both primary wire and secondary wire on them. The estimated number of poles 50 feet or less in each region is estimated by taking the total number of wood poles in the plant data 50 feet or less divided by the total number of wood poles in the plant data (1.305 million/1.373 million).
  - (4) The percentage of poles estimated to have secondary attached is based on the field sampling.
