ENBRIDGE™

Enbridge Pipelines (Illinois) L.L.C.
1100 Louisiana Suite 3300
Houston, Texas 77002

DATE: April 18, 2008

The Honorable Mayor Jeffery A. Schwartz
Village of Downs
P.O. Box 18
Downs, IL 61736-0018

Dear Mayor Schwartz:

Enbridge has received and reviewed the "**Comprehensive Plan for the Village of Downs**" ("**Village**") along with the detailed information filed in your response to the Illinois Commerce Commission's (ICC) Data Request. Based on this relevant information and the exhibits that were provided, the Southern Access Extension pipeline has been identified to be installed at a location that may potentially interfere with the Village's future sanitary sewer construction plans. Enbridge is committed to working with its neighboring communities and is also prepared to work with the Village of Downs in addressing these concerns by constructing/installing its pipeline in a manner that will accommodate the utility crossing(s) for the planned sanitary sewer lines.

Please be advised that Enbridge is experienced in building pipelines that are located within current and planned utilities corridors, and has a full time "crossing coordinator" who works directly with communities in the design of planned or future utility crossings. Enbridge believes that both pipelines can co-exist within the same utility corridor, and is therefore committed to revising the pipeline installation design at specified pre-determined location(s) identified by the Village of Downs for the utility crossing(s) of its planned sanitary sewer lines. If these utility crossing(s) are identified, Enbridge will be able to redesign its pipeline so that it will not adversely impact the Villages' planned sanitary sewer system.

In order to accomplish the above stated objectives and accommodate the Village of Downs, Enbridge must be formally and specifically advised of the location and depth of the proposed sanitary sewer lines on or before July 1, 2008. Further, Enbridge will need the Village of Downs' sewer planning engineers to provide the lat/long coordinates of its proposed sanitary sewer lines plotted on a U.S.G.S. 7.5 quad map. This detailed information will be required by July 1, 2008, in order to accommodate the construction timelines and requirements for both parties. In the event that additional coordination of more detailed information may be necessary in the development of the proposed utility crossing(s), it will be

imperative that both parties commit to a good faith effort to exchange adequate information in a timely manner. Thus, Enbridge is requesting that all inquiries, written correspondence and requested materials regarding this matter be directed to Mr. Keith McLaughlin, Project Engineer. Mr. McLaughlin can be reached at the following.

Mr. Keith McLaughlin
Project Senior Engineer
1409 Hammond Ave
Second Floor
Superior, WI 54880
