Michael D. Porreca, *Strategic Energy Sourcing Engineer*

As an employee of Co-eXprise, Michael has worked as a project lead for Natural Gas & Electricity and has sourced over \$500 million in energy. He is currently serving hundreds of schools throughout Pennsylvania and Washington DC, and has repeatedly assisted them to save money, aggregate volumes, and find budget certainty. Prior to Co-eXprise, Michael worked for FreeMarkets/Ariba as a Market Maker and led teams to help Fortune 500 companies strategically source over \$2.5B in services and goods. His roles and responsibilities included market analysis, client/supplier relationships, consulting, bidding strategies, data management, project execution, and team leadership. Michael was responsible for over 150 unique sourcing projects including markets such as transportation, services, plastics, metals, electronics, bulk lubricants, and other goods and services. Michael graduated from the University of Michigan with a Math of Finance and Risk Management degree.

Mike is a key member of the project team that serves customers such as: Children's Hospitals, George Washington University, District of Columbia Government, District of Columbia Public Schools, Carnegie Mellon University, Expedient, Washington Convention Center, University of the District of Columbia, Washington Metropolitan Transit Authority.

Doug Keeley, *Strategic Energy Sourcing Engineer*

Since joining Co-eXprise in December 2005, Doug has provided energy analyst data to support over \$800 million of commercial energy requirements and \$450 million of governmental energy requirements. Prior to joining Co-eXprise, Doug held multiple roles at MEDRAD, Inc. between 2004 – 2005 in Accounting and Finance as well as multiple Marketing projects. While working in Europe for MEDRAD, Doug successfully led and participated in projects including: Sarbanes Oxley Assessment, Accounts Receivable Improvement Programs and International Marketing Projects. Prior to joining MEDRAD, Doug held summer internships with RedZone Robotics (2003), Marconi (2002), and FreeMarkets (2001). Doug holds a BS in Marketing & International Business and a minor in Business Logistics from Penn State University (PSU) where he graduated with Distinction in December 2003. Doug also studied abroad for one semester at the University of Bath in the UK as part of a PSU exchange program.

Doug is a key member of the project team that serves customers such as: Heinz, Chicago Stock Exchange, Columbia University, Columbia University Medical Center, Kellogg Company, Qwest Communications, Leggett & Platt and Burlington Coat Factory.

Brenda R. Rossman, *Strategic Energy Sourcing Engineer*

Brenda has extensive experience over her seven years in the energy sector in purchasing millions of megawatt hours of electricity and decatherms of natural gas on behalf of customers, as well as conducting bill audits on those purchases. Brenda has worked on comprehensive energy solutions by analyzing customer energy consumption patterns on a monthly basis over the term of a customer's contract to ensure that the nomination pattern is normalized according to the customers' previous load profile and budget projections. Brenda has served as office manager, conducted bill audits, and procured energy in many different market sectors including nationwide hospitality management companies, telecommunication enterprises, local school districts, and various governmental agencies.

Brenda is a key member of the project team that serves customers such as: Ericsson, Grubb & Ellis, Giant Eagle Grocery Stores, City of Pittsburgh, County of Allegheny, NA VTEQ Corporation and Domino's Pizza (MD, NY, IL, TX, MI) .

Jack Allamon, *Supplier Services & Technology*

Jack has 38 years experience in Purchasing and Software Development at GE and FreeMarkets and manages Co-eXprise supplier and buyer quality assurance and software support. Jack was instrumental to the first online auction at GE serving as key supplier services lead during the launch of the business model. Prior to his shift to the online sourcing market, Jack developed and implemented an automated payment system for shop floor automation staff, and managed and implemented online plans for locomotive testing. While at FreeMarkets Jack developed productivity tools for Market Making Engineering staff and help to design and implement the innovative Spend Visibility Solution.
