5. Financial Licensing Requirements:
  - a. Attachment M - \$5,000 Qualifying Surety Bond

**Corporate Statement in Support of the ABC Licensing Application  
GLOBAL ENERGY ENTERPRISES, LLC – Presented 10/28/09**

Global Energy Enterprises, LLC is a contracted broker of electricity and natural gas services to commercial customers in deregulated states. Global Energy Enterprises is a Florida based LLC formed in 2007. Global Energy offers three divisions serving the commercial customer - Electricity and Natural Gas Services, PJM Energy Curtailment Programs (Synchronized Reserves Demand Response) and a fuels transaction division. Global Energy has customers in seven US states embracing utility deregulation.

Within the scope of the Electricity and Natural Gas Services offered, Global Energy provides utility services comparisons; assisting commercial customers to evaluate their current electricity and natural gas supply services against the offered services of licensed ARES providers contracted with Global Energy. Global Energy provides a side by side comparison of these offers to the customer along with relevant education about energy deregulation. It is the purpose of this comparison to create opportunities for new products and services for commercial customers and stabilize or lower costs for users of electricity.

In Illinois, Global Energy currently has contracted relationships with three ARES serving the Illinois commercial marketplace and has completed over 1500 customer analysis to date. In the scope of the customer utility services analysis, Global Energy provides historical and current supply rates specific to the customer's usage and demand needs with data collected from the utility usage portals (Com Ed Power Path and Ameren Non-Residential Electric Rate Estimator) and application of economic historical information affecting the wholesale price of the commodity. All contracting and billing documents are executed between the customer and the ARES directly. Global does not have access to monthly customer billing, however is provided a usage report by the ARES providers monthly. We have a history of transacting our services in a transparent model to our commercial customers, answering any issues of our broker fee before the completion of any ARES provider paperwork.

On a corporate level, Global Energy Enterprises maintains Illinois offices in Chicago and a corporate website ([www.globalenergy.net](http://www.globalenergy.net)). Commercial customers are identified to Global Energy through numerous corporate referral partners in the Illinois marketplace and through marketing programs and Global Energy's integration within the Chicagoland business community. Global Energy has no direct employees. Day to day operation is handled by co-owners and founders Tiffany and James Bland.

After creating a business presence in the NE states, Global Energy centered on serving the Illinois marketplace in early 2008. To date, Global Energy has approximately 50 MW of annualized business boarded over multiple terms, divided between the three ARES providers contracted with Global Energy to serve the state.

We respectfully submit this statement for the review of the Illinois ICC Licensing Committee for compliance and approval of this application.

Sincerely,

Tiffany H. Bland, Principal & Founder  
Global Energy Enterprises, LLC

## GLOBAL ENERGY TODAY

### Smart Business. Real Choices.

Global Energy is a unique, new kind of Energy Services Company – created out of the need for transparent, unbiased guidance through today's energy marketplace and services.

**Global Energy Enterprises, LLC ([www.globalenergy.net](http://www.globalenergy.net))** formed in 2007 as an Independent **Energy Services company** helping large energy suppliers and corporate clients capitalize on the opportunities created by **US Electricity deregulation**. As a core business, Global Energy works on behalf of both the Energy Supplier and the client to manage electricity and natural gas supply offers, as well as revenue-producing Demand Response curtailment programs. **The company has offices in Chicago, Illinois and has served over 1500 commercial and industrial businesses across seven states.**

In early 2009, **Global Energy formed its latest division, Global Energy Fuels**. Specializing in crude and petroleum transactions, this new division offers completion to the company's **existing contracted relationships with 13 of the largest US Electricity, Natural Gas and Coal producers and the end buyers of their products and services.**

**Global Energy is affiliated with the largest licensed Retail Energy Providers in the US** and our proprietary comparison systems allow Global Energy to focus all of our efforts on managing our Supplier's offers and matching them to our Buyer's needs. Global Energy works solely on behalf of corporate clientele to research and present **transparent** Energy plans, services and products.

To learn more about Global Energy and our services, please visit our website - [www.globalenergy.net](http://www.globalenergy.net).

## GLOBAL ENERGY SERVICES

- **Electricity and Gas Supply Management** (Cost/Risk Management) –Global Energy has a simple, no-risk way to search and offer the Energy Supply options available to the customer today. Global Energy's process reviews current energy rates and profiles the goal of the company's bottom line (such as overall savings or long term price stability). After processing this information through our network of Global Energy Supply Providers (which include many of the largest in the US) we deliver a customized, risk & cost free proposal with the best options for the company's power needs compared to their current provider.
- **Demand Response / Energy Curtailment Programs** (Revenue Producing Programs) – Global Energy's Demand Response Programs are an ideal solution for the megawatt user clients as a means to create a residual stream of revenue and offset facility operating costs. Demand Response Customers agree to reduce their electricity usage and are then compensated for the current market value of that unused electricity. Global Energy has a unique Synchronized Reserves program which offers a higher revenue opportunity to the end client.
- **Fuels Division** Global Energy is a single source, cohesive Intermediary group, creating reputable relationships between the buyers and sellers of Crude, Diesel, Petroleum and Coal products. Global Energy Fuels Division runs on the same core principles successfully applied in its Energy Services division – offering streamlined, simplified oversight on large transactions of Petroleum and related products.

## GLOBAL ENERGY TODAY

Proudly contracted with the following Energy Suppliers and Corporate Partners

## GLOBAL ENERGY OFFERS

- **Electricity and Gas Supply Management** - Offers include multiple term fixed price Electricity Supply offers, Indexed priced Electricity and Natural Gas Supply offers, Aggregated and Managed Energy Services. These services are available to corporate, industrial and manufacturing clientele.
- **Demand Response / Energy Curtailment Programs** - Global Energy's Demand Response Programs are an ideal solution for the megawatt user located within the PJM US grid. These programs create a residual stream of revenue offsetting facility operating costs. Global Energy offers a unique Synchronized Reserve program creating a higher revenue opportunity for the end client.
- **Fuels Division** - Global Energy Fuels is a unified group of Energy Partners, dedicated to offering an independent atmosphere of real time market and commodity conditions for facilitation of the purchase and sale of Crude, Diesel, Petroleum and Coal products. Global Energy is equipped to manage the World Wide economy and brings knowledge and integrity to each transaction.
