

services to UNEs or combinations of UNEs. SBC may charge applicable service order charges or record change charges.

10.1.3 SBC will complete CLEC conversion orders in accordance with the OSS guidelines in place in support of the conversion that the CLEC is requesting with any disruption to the end user's service reduced to a minimum or, where technically feasible given current systems and processes, no disruption should occur. Where disruption is unavoidable due to technical considerations, SBC shall accomplish such conversions in a manner to minimize any disruption detectable to the end user. Where necessary or appropriate, SBC and CLEC shall coordinate such conversions

10.1.3.1 When converting from a wholesale service to a UNE or combination of UNEs, the applicable non-recurring charges, if any, as governed by this Agreement and/or Tariff from which the UNE or UNE combination being converted to is ordered, shall apply.

10.1.4 SBC shall perform any conversion from a wholesale service or group of wholesale services to a unbundled Network Element or Combination of unbundled Network Elements in such a way so that no service interruption as a result of the conversion will be discernable to the end user customers.

10.1.5 Except as provided in 10.1.2, in requesting a conversion of an SBC service, CLEC must follow the standard guidelines and ordering requirements that are applicable to converting the particular SBC service sought to be converted.

11.0 FTTH Loops, FTTC Loops, Hybrid Loops and Retirement of Copper Loops.

11.1 The following terms shall apply to FTTH and FTTC Loops.

11.1.1 New Builds. SBC shall not be required to provide nondiscriminatory access to a FTTH or FTTC Loop on an unbundled basis where SBC has deployed such a Loop to premises that previously were not served by any SBC Loop.

11.1.2 Overbuilds. SBC shall not be required to provide nondiscriminatory access to a FTTH or FTTC Loop on an unbundled basis when SBC has deployed such a Loop parallel to, or in replacement of, an existing copper Loop facility, except that:

(a) SBC shall maintain the existing copper Loop connected to the particular customer premises after deploying the FTTH/FTTC Loop and provide nondiscriminatory access to that copper Loop on an unbundled basis unless SBC retires the copper Loop pursuant to the terms of Section 11.1.3.

(b) If SBC maintains the existing copper Loop pursuant to this Section 11.1.2, SBC need not incur any expenses to ensure that the existing copper loop remains capable of transmitting signals. Prior to receiving a request for access by CLEC, upon receipt of a request for access pursuant to this section, SBC shall restore the copper loop to serviceable condition and will maintain the copper loop when such loop is being purchased by CLEC on an unbundled basis under the provisions of this Attachment.

(c) For each copper loop retired pursuant to Section 11.1.3 below, SBC shall offer to provide nondiscriminatory access to a 64 kilobits per second transmission paths capable of voice grade service over the FTTH/FTTC Loop on an unbundled basis on the same rates and terms applicable under the Agreement to a DS-0 Local Loop to the same premises were such a loop available. CLEC is entitled to request any number of 64kbps paths up to the number of copper loops or subloops previously serving the customer premises that were retired.

11.1.3 Prior to retiring any copper loop or copper subloop that has been replaced with a FTTH/FTTC Loop, SBC must comply with the network disclosure requirements set forth in Section 251(c)(5) of the Act and in Rules 51.325 through 51.335 and any applicable state requirements. If a CLEC is leasing a copper loop when SBC submits its notice pursuant to the foregoing sentence, SBC shall also provide CLEC with a copy of such short term notice via an accessible letter. In addition, SBC may not retire a copper loop currently leased by a CLEC unless SBC performs, upon CLEC request, a line station transfer ("LST") where an alternative copper or non-packetized hybrid (TDM)

loop is available. In order to request an LST, CLEC must have the rates, terms and conditions for an LST in the underlying Agreement. CLEC will be billed and shall pay for such an LST at the rates set forth in the Pricing Schedule. If no such rates, terms and conditions exist in the underlying Agreement, CLEC can request an LST pursuant to the rates, terms and conditions in SBC's Generic Interconnection Agreement.

11.1.4 SBC shall not engineer the transmission capabilities of its network in a manner, or engage in any policy, practice, or procedure, that disrupts or degrades CLEC's access to, or ability to tap the full capabilities of, a local loop or subloop. As such, SBC's modification of loop plant (e.g., removing copper feeder facilities and stranding CLEC's access to distribution subloop) shall not limit or restrict CLEC's ability to access all of the loop features, functions and capabilities, including DSL capabilities, nor increase the price of any loop used by, or to be used by, CLEC. Furthermore, SBC will comply with Rules 51.325 through 51.335, and any applicable state requirements.

11.2 Hybrid Loops Generally

11.2.1 Broadband Services. When CLEC seeks access to a Hybrid Loop for the provision of broadband services SBC shall provide CLEC with nondiscriminatory access to the TDM features, functions, and capabilities of that Hybrid Loop, including DS1 or DS3 capacity (subject to CLEC's self-certification in accordance with Section 4 of this Attachment), regardless of the type of DLC systems (e.g., NGDLC, UDLC, IDLC) on an unbundled basis, to establish a complete transmission path between the SBC central office and an end user customer premise. This access shall include access to all features, functions, and capabilities of the Hybrid Loop to the extent that such are not used to transmit packetized information. In instances where both TDM and packetized functionality exist on the Hybrid Loop, SBC is required to only make the TDM functionality available on an unbundled basis. The unbundling obligation associated with DS-1 loops is not limited by the rules adopted in the TRO for hybrid loops.

11.2.2 Narrowband Services. When CLEC seeks access to a Hybrid Loop for the provision to its customer of narrowband services, SBC shall either (a) provide nondiscriminatory access to a spare home-run copper Loop serving that customer on an unbundled basis, or (b) provide nondiscriminatory access, on an unbundled basis, to an entire Hybrid Loop capable of voice-grade service (i.e., equivalent to DS-0 capacity), using time division multiplexing technology at a rate no higher than the DS-0 loop rate in the Pricing Schedule.

11.2.3 Rates. The non-recurring and recurring rates for Hybrid Loops provided pursuant to Sections 11.2.1 and 11.2.2 shall be no higher than for a copper or fiber loop of comparable capacity as set forth in the Pricing Schedule.

11.2.4 IDLC Hybrid Loops. Where a CLEC requests an unbundled loop to a premises to which SBC has deployed an IDLC Hybrid Loop, SBC can only charge the CLEC the least cost technically feasible method of unbundled access. SBC may not impose special construction or other non-standard charges (which does not include routine network modification charges permitted under Section 8.1.5 of this Attachment) to provision unbundled loops where it has deployed IDLC except as provided under this Agreement.

11.2.5 Feeder. SBC shall not be required to provide access to the feeder portion of a Loop on an unbundled, standalone basis.

12.0 Use of Section 251 Unbundled Network Elements

12.1 Except as provided in Section 6.0 of this Attachment, SBC shall not impose limitations, restrictions, or requirements on requests for, or the use of, unbundled network elements provided under Section 251 for the service CLEC seeks to offer.

12.2 CLEC may not access an unbundled network element under Section 251 for the exclusive provision of mobile wireless services or interexchange services.

- 12.3 A CLEC that accesses and uses an unbundled network element provided under Section 251 consistent with paragraph 12.2 may provide any telecommunications services over the same unbundled network elements.

13.0 Section 271 Obligations.

- 13.1 Intentionally left blank.
- 13.2 Intentionally left blank.
- 13.3 Intentionally left blank.
- 13.4 Nothing in this Attachment shall expand or contract SBC's obligation, if any, to provide CLEC access to network elements pursuant to Section 271 in accordance with the terms of the Agreement. Nothing in this Attachment should be interpreted, or deemed as grounds for, amending the rates, terms and conditions (if any) by which SBC provides 271 Elements to CLEC. Provided, however, CLEC may request that any Section 251 unbundled network element or combination of network elements (including any TRO Affected Element or TRO Remand Affected Element) be reclassified as a corresponding 271 Element or Elements, provided that SBC is obligated to provide such elements under Section 271 under the Agreement. SBC will perform such reclassification at no charge.

14.0 Section 13-801 Obligations.

- 14.1 Section 13-801 Obligations are addressed in the attached Rider 1.

15.0 Entrance Facilities and Interconnection Facilities.

- 15.1 Dedicated Transport facilities that do not connect a pair of incumbent LEC wire centers, including but not limited to, the transmission facilities that connect CLEC's networks with SBC's networks, are Entrance Facilities that will no longer be Unbundled Network Elements provided pursuant to 47 U.S.C. § 251(c)(3) under the Agreement. Effective immediately, CLEC shall not place orders for new Entrance Facilities as UNEs. As to existing Entrance Facility UNEs, CLEC must within 90 days of the Effective Date of this Attachment either request disconnection; submit a request for analogous access service; or identify and request another alternative service arrangement.
- 15.2 Notwithstanding Section 15.1, SBC is required to provide access to facilities that CLEC requests to interconnect with SBC's network for the transmission and routing of telephone exchange service and exchange access service, in accordance with the requirements of Section 251(c)(2) of the Act ("Interconnection Facilities").
- 15.3 Intentionally left blank.
- 15.4 For avoidance of doubt, CLEC may request that an Entrance Facility UNE be reclassified as an Interconnection Facility pursuant to Section 15.1 if CLEC will use the facility for interconnection in accordance with Section 15.2. SBC will perform such reclassification at no charge.

RIDER 1

Section 13-801 Obligations

- 1.1 Notwithstanding any determination of non-impairment that may affect SBC's obligations under Section 251 of the Act, CLEC may purchase the network elements (as defined in Section 13-216 of the Illinois Public Utilities Act and referred to herein as "13-801 Elements"), and interconnection required by Section 13-801 of the Illinois Public Utilities Act and applicable ICC orders interpreting Section 13-801 by providing such network elements, combinations thereof and interconnection pursuant to the rates, terms and conditions set forth in SBC's intrastate tariff, ILL. C. C. No. 20, Part 19. Should SBC's intrastate tariff for any or all 13-801 network elements be canceled or withdrawn for any reason other than that SBC is no longer required by law to offer such network elements under Section 13-801, the prices, terms and conditions for 13-801 network elements in such tariff shall nonetheless be deemed to be incorporated into and to continue in effect as part of the Agreement. The prices, terms and conditions to be incorporated shall be as they existed as of the date the tariff was cancelled or withdrawn.
- 1.2 Intentionally left blank.
- 1.3 The recurring monthly rates for UNE-P in the above-referenced tariff shall be increased by \$1. The recurring monthly rates for DS1, DS3 and dark fiber loops and transport in the above-referenced tariffs that SBC is not obligated to provide as unbundled network elements pursuant to Section 251(c) shall be increased by 15%.
- 1.4 If the Parties negotiate rates for Section 13-801 Elements other than those described in Sections 1.1 and 1.3, such revised rates shall be effective on the date of the ICC order approving an amendment to the Agreement adopting such revised rates. If the ICC issues an order in a proceeding of general applicability pursuant to Section 13-801 (g) or other applicable provision of the Illinois Public Utilities Act resulting in rates for network elements and/or interconnection provided by SBC in accordance with Section 13-801 that are different than the rates described in Sections 1.1 and 1.3, such revised rates shall be effective for purposes of this Agreement on the later of the date of the ICC order or the date that revised tariffs resulting from the ICC order become effective.
- 1.5 This Rider applies only to network elements that SBC is not required to offer as UNEs under Section 251 of the Act.
- 1.6 Upon request, SBC will reclassify at no charge any Section 251 UNE or combination of UNEs to any Section 13-801 element or elements, provided such 13-801 element or elements are provided for in this Rider.
- 1.7 On February 25, 2005, SBC Illinois filed a complaint and motion for preliminary injunction in federal district court for the Northern District of Illinois requesting that Court enjoin the Illinois Commerce Commission from enforcing the provisions of Section 13-801 of the Illinois Public Utilities Act, as interpreted by the June 11, 2002 Order in Docket 01-0614, the Order itself and the implementing tariffs, insofar as they would require SBC to provide unbundled access to local switching, related elements and UNE-P after March 11, 2005, on the grounds that any such requirement is inconsistent with and preempted by the federal Telecommunications Act of 1996 and the *TRO*. To the extent the Court enjoins enforcement of one or more of SBC's obligations under Section 13-801 to provide network elements or methods of interconnection, or if SBC's obligation to provide one or more network elements or methods of interconnection under Section 13-801 is otherwise discontinued, enjoined or vacated by any court, the ICC, the FCC or the Legislature, the affected obligation shall automatically terminate and SBC shall no longer be required to provide such Section 13-801 network elements under the Agreement and this Amendment.

Subject: PUA Section 13-801 Declaration

Attached is the signed PUA Section 13-801 Declaration included in the AT&T Notice dated February 17, 2006 regarding *Interconnection Agreement between Cbeyond Communications, LLC ("CLEC") and Illinois Bell Telephone Company d/b/a AT&T Illinois – Notice concerning TRO Declassified Network Elements and TRRO Declassified High Capacity Loops and Dedicated Transport*. Please note that Cbeyond prepared a similar election which was sent to AT&T on February 11, 2006. Our previous election identified the specific circuits that we believe will no longer be available as Section 251 UNEs as of March 11, 2006 and therefore are requesting that they be reclassified from Section 251 UNEs to 13-801 elements. We believe this list identifies the universe of Section 251 UNEs that will no longer be available and request that SBC contact us by March 1, 2006 if you do not agree, otherwise, we will take a non-response as your concurrence with our list. Our previous correspondence and election is attached. Please let me know if you have questions or if you should need additional information.

PUA SECTION 13-801 DECLARATION

X

Yes, Cbeyond Communications, LLC wishes to reclassify its embedded base of TRO UNEs (as defined in the attached letter), High-Capacity Loops and Dedicated Transport that are no longer available as 251 UNEs to 13-801 elements to be purchased under the rates, terms and conditions identified in the Rider to the TRO/TRO Amendment to Cbeyond Communications, LLC's Interconnection Agreement with AT&T Illinois.
