

EX DD-6

RIDER TS – TRANSMISSION SERVICE

AVAILABILITY

Rider TS, Transmission Service, is applicable to Customers taking service under Rate DS-1, DS-2, DS-3, DS-4 or DS-5 and receiving Company-supplied power and energy.

PURPOSE

- * The purpose of this Rider is to provide for the recovery of costs, fees and charges related to Transmission Service and other related services necessary for the provision of power and energy by the Company. Recovery shall be made pursuant to the Transmission Provider's FERC-approved tariffs related to Transmission Service excluding Transmission Service and other related service costs recovered under Rider PER and HSS, as applicable.

CALCULATION OF THE TRANSMISSION SERVICE CHARGE

- * The calculation and application of the Transmission Service Charge (TSC) provides the mechanism necessary for the Company to recover costs, fees and charges related to Transmission Service and related services not otherwise recovered under the Company's Rider PER. All TSC's shall be adjusted by the Uncollectible Adjustment as described Rider PER and Rider HSS.

A. Interval-metered Customers

The TSC for interval-metered customers receiving power and energy from the Company will reflect a direct application of the charges pursuant to the Transmission Provider's FERC-approved tariffs to be applied based upon the interval-metered customer's individual billing determinants as defined by the Company. A kW Transmission Adjustment Factor, if any, will be filed monthly and shall apply to interval-metered Customers to account for prior period adjustments by the Transmission Provider. The TSC for interval-metered retail customers receiving power and energy from the Company will be determined as follows:

Date of Filing, May 14, 2008

Date Effective, June 1, 2008

Filed Pursuant to ICC Order in

RIDER TS – TRANSMISSION SERVICE

$$TSC_i = [TSD_i + TADJF_i]$$

Where:

*TSC_i = Transmission Service Charge for interval-metered Customers in \$/kW-day, rounded to the nearest \$0.00001, to be applied to each kW of Customer's kW load at the time of the peak system load occurring in the Billing Period times the number of days of service in the Billing Period.

*TSD_i = Transmission Service Demand cost equals the sum of the kW daily derived demand costs of the applicable schedules listed in the Transmission Service Charge Informational Sheet filed monthly pursuant to this tariff, expressed in \$/kW-day, rounded to the nearest \$0.00001.

*TADJF_i = Transmission Adjustment Factor, expressed in \$/kW-day, rounded to the nearest \$0.00001, represents an addition to or an offset to the Transmission Service Demand cost for interval-metered Customers to reflect prior period adjustments implemented by the MISO.

B. Lighting Service Customers

The TSC for Lighting Service Customers receiving power and energy from the Company will be determined for the Annual Contract Period as defined in the Customer Terms and Conditions and billed as a fixed kWh charge. The TSC for Lighting Service retail customers receiving power and energy from the Company will be determined as follows:

$$TSC_L = \left[\frac{(ETS_L) \times 100}{E_L} \right]$$

Where:

TSC_L = Transmission Service Charge for BGS-5 – Lighting Service Customers, in ¢/kWh, rounded to the nearest 0.001¢, to be applied to each kWh supplied under BGS-5 – Lighting Service.

*ETS_L = Estimate of applicable transmission costs which equals the estimate of daily demand costs of the applicable schedules listed in the Transmission Service Charge Informational Sheets filed prior to the Annual Contract Period pursuant to this tariff for the Annual Contract Period as defined in the Customer Terms and Conditions.

RIDER TS – TRANSMISSION SERVICE

E_L = Energy, in kWh, forecast to be supplied by the Company for the effective Annual Period for BGS-5 - Lighting Service Customers.

C. Non-interval Non-lighting Service Customers

The TSC for non-interval metered retail customers, receiving power and energy from the Company will be determined as follows:

$$*TSC_n = \left[\frac{(ETS_n \pm TADJ_n) \times 100 + O_n}{E_n} \right]$$

Where:

TSC_n = Transmission Service Charge for non-interval metered Customers, in ¢/kWh, rounded to the nearest 0.001¢, to be applied to each kWh supplied under Rider PER in the monthly billing period.

ETS_n = The sum of the estimated Transmission Service costs, fees or charges, in dollars, for Transmission Service required to deliver the electric power and energy supplied to Customers under Rider PER less any revenues billed to interval-metered Customers and lighting service Customers under Rider TS. Such Transmission Service costs shall include all applicable costs, fees and charges estimated to be incurred by the Company to obtain Transmission Service used to serve retail Customers receiving power and energy from the Company but will not include any estimates of Transmission Service costs and other related services that are recovered under Rider PER.

$TADJ_n$ = Transmission Adjustment, in dollars, represents an addition to or an offset to the estimated Transmission Service costs, fees or charges, as defined above, to reflect differences between the actual results for the prior period as compared to the actual costs incurred by the Company for the same period.

Date of Filing, May 19, 2010

* O_n = Commission ordered adjustment amount, in dollars (\$), resulting from a Commission Order in a reconciliation proceeding, plus the calculated interest attributable to the O component. Interest shall be at the rate established by the Commission under 83 Ill. Adm. Code 280.70(e)(1). Interest on the O component shall be applied from the end of the reconciliation period until the O component is refunded or charged to customers through the TSC_n .

E_n = Energy, in kWhs, forecast to be supplied by the Company in the effective month for non-interval metered Customers receiving Company-supplied power and energy under Rider PER. Effective month shall mean the month following the filing month during which the TSC will be in effect.

ANNUAL REPORTS

Transmission Service Report

The Company must prepare an annual report that summarizes the operation of the Transmission Service Charge mechanisms for the previous contract period. Such report must be submitted to the ICC in an informational filing, with copies of such report provided to the Manager of the Staff's Accounting Department and the Director of the Staff's Financial Analysis Division by April 30, beginning in 2008. Such report must be verified by an officer of the Company.

Internal Audit Report

The Company shall perform annual internal audits of costs and revenues recorded under Rider TS and submit such reports to the Manager of the Commission's Accounting Department with a confidential copy to the Chief Clerk by April 30 for the previous report. The Company may include the Internal Audit Report as part of the verified Transmission Service Report to the Commission.

*** Annual Reconciliation**

The Company shall file a petition annually with the Commission no later than April 30, seeking initiation of an annual review to provide for correction of any accounting errors that may occur in the application of the provisions of this Rider for the prior year. The information submitted shall allow the Commission to verify: 1) costs recoverable through Transmission Service Charges during the reconciliation year, and 2) the revenue arising through the application of the Transmission Service Charges to applicable sales during the reconciliation year. The first such petition shall be filed no later than April 30, 2011, covering the 2007 through 2010 reporting years.
