

**ICC Docket No. 10-0467**

**Commonwealth Edison Company's Response to  
Illinois Commerce Commission ("STAFF") Data Requests  
PL 8.01 – 8.02**

**Date Received: October 15, 2010**

**Date Served: October 25, 2010**

**REQUEST NO. PL 8.01:**

This question pertains to the section of ComEd's response to CG 2.10 which states as follows:

"Please note that ComEd is not proposing that the exemplar rate design and structure presented in its supplemental direct testimony (ComEd Ex. 21.0 Revised) should be adopted. ComEd's proposed rate design and structure is presented in ComEd's direct testimony (ComEd Ex. 16.0 Revised)":

- a. Is it also correct that ComEd is not proposing that the ECOSS in ComEd Ex. 22.1 Revised) should be adopted?
- b. Are there any statements in ComEd's direct filing testimony where a Company witness discusses the issue of whether or not ComEd will be proposing that the exemplar rate design and structure or cost of service study presented in its supplemental direct testimony be adopted? If so, please provide a citation to all such statements.
- c. Are there any statements in ComEd's supplemental direct filing testimony where a Company witness discusses the issue of whether or not ComEd will be proposing that the exemplar rate design and structure or cost of service study presented in its supplemental direct testimony be adopted? If so, please provide a citation to all such statements.
- d. Please identify and explain each of the reasons why the Company is not proposing that the exemplar rate design presented in its supplemental direct testimony be adopted in this case.
- e. Please define the word "exemplar" as used in ComEd's supplemental direct testimony.

**RESPONSE:**

- a. Yes.
- b. No.
- c. Yes. In ComEd Ex. 21.0 Revised, Mr. Alongi notes that one of the purposes of his supplemental direct testimony is to "provide an exemplar rate design and exemplar tariff revisions that would be implemented in the event the Commission directs ComEd to utilize the primary/secondary analyses presented in this testimony and the ECOSS in ComEd Ex. 22.1 for rate making purposes." (ComEd Ex. 21.0 Revised at 1:23-2:26). In this passage Mr. Alongi is stating that the exemplar rate design and structure presented in ComEd Ex. 21.0 Revised and its associated exhibits, as well as the embedded cost of service study (ECOSS) presented in ComEd Ex. 22.1 would be used for rate making purposes only if the Commission ordered ComEd to use them for such purposes.

- d. Please see ComEd's Response to Staff Data Request PL 6.10, particularly subparts (b)(i), (b)(ii), (b)(iii), (b)(ix), and (b)(x) of such response.
- e. The word "exemplar" as used in ComEd's supplemental direct testimony means illustrative.
