

Attachment A

BJ Hilton is the President of Midwest Energy Alliance LLC. Her professional experience is as follows:

BJ Hilton is an energy agent, advisor and consultant with more than thirty-five years' experience in the energy field. Ms Hilton has represented Honeywell, Inc in energy sales, worked as Energy Engineer for the State of Illinois Capital Development Board, held the position of Corporate Energy Manager for Capitol Records in the US and Canada and started her own energy consulting business in 1985 that led to founding Midwest Energy Alliance LLC in 2000. She is President of Midwest Energy Alliance LLC.

Ms Hilton has been advising clients of their options to procure energy in a deregulated environment, assisting them with the informal/formal complaint process at the ICC which have resulted in substantial refunds to customers, participating on behalf of clients in numerous Utility Company rate cases at the ICC and advising clients on various tariff-related matters. Ms Hilton has been a frequent Speaker at Community College workshops, Grain and Feed Association educational session, GEAPS conventions and other energy-related seminars throughout the United States. She has authored numerous articles on energy issues for grain publications and published reports through the IL DCEO on energy purchasing opportunities for the IL grain industry and Community Colleges. She was responsible for introducing, to the IL grain industry, the concept of purchasing natural gas in an open marketplace in 1987 and similarly purchasing electricity starting in 2000. She was a founding member of the (national) Association of Energy Engineers and a member of the (Illinois) Association for Professional Energy Consultants.

Angela Woodworth is Vice President of Midwest Energy Alliance, LLC. Her professional experience is as follows:

Angela Woodworth is an energy agent, advisor and consultant with more than twenty years' experience in the energy field. She is Vice President of Midwest Energy Alliance, LLC.

Ms. Woodworth has been working with clients throughout the state of Illinois to control and reduce electricity and natural gas costs in a deregulated environment since 1991. She has managed natural gas purchasing programs for nearly two hundred grain drying locations served by Ameren and Nicor throughout Illinois since 1993. She has assisted clients in finding the lowest-cost options for their energy supply, through rates and riders available from Ameren, ComEd and Nicor or through alternate suppliers. She assists clients in resolving utility billing issues and understanding various tariff options and market opportunities to reduce costs. Ms. Woodworth holds a bachelor's degree from Illinois College (1990).
