QDRO ADMINISTRATION	BQDR	This activity captures labor, employee expenses and other costs associated with administering Qualified Domestic Relations Orders.
RESOURCE PLANNING	BRSP	Activities associated with the analysis of generating units, power sale proposals, pump storage, physical assets and purchase of power.
CASH MANAGEMENT	BSCM	This is a general activity associated with the disbursement/receipt/transfer of funds, maintenance, analysis, forecasting, and daily/monthly reporting of eight companies' cash positions as well as maintenance and reconciliation of the companies' bank acco

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
SO2 ALLOWANCE TRADING	BSO2	Activities associated with buying, selling, and banking of emission allowances on a least cost basis in conjunction with the fuel procurement process.
BANKING PMT & RECEIPT PROCESS	BSPR	This activity includes but is not limited to check preparation/distribution, preparation of bank deposits, Form 7's and Form 1353s, stop payments, cash-in-transit, and reconciliation with Accounts Payable.
SPECIAL STUDIES	BSPS	Activities associated with projects and programs specific to one or more functions, where there is a need to identify and track related time and expenses. This activity requires user definition as appropriate.
STRATEGIC SOURCING INITIATIVES	BSSI	Activity to track the costs and the savings related to the Strategic Sourcing Initiatives.
STRATEGIC PLANNING	BSTP	This activity includes corporate joint strategic planning with Ameren business lines to align corporate strategy with business line goals and objectives and to identify global resource requirements to meet this goals and objectives.
UNEMPLOYMENT ADMINISTRATION	BUNM	Work related to the administration of employee unemployment claims.
BACKUP POWER ENERGY CHARGE	BUPE	Cost of energy for Backup Power customers with generation of 5MW or more.
BENEFITS WEB ENROLLMENT	BWEB	This activity captures the costs associated with the ongoing administration of benefit plans including internal labor costs and external Third Party Administration contracts.
WELLNESS PROGRAMS	BWEL	This activity will collect charges related to the Ameren Wellness Programs.
CFG CTRL-All Gen'l Stn Supp	C1SS	All activities associated with the maintenance of the configuration control process. This includes all processes required to ensure that any alteration of the plant operational configuration, design configuration or design basis is documented and maintained through construction and operation, until decommissioning. Configuration control ensures that information, including design requirements, final safety analysis reports, inspection records, as-built data, and unit specific differences are uniquely identified, accessible, and controlled so that a paper trail may be followed when trying to understand previous decisions or changes. Configuration control is also a mechanism to document non-conforming issues and the disposition of those issues. for STATION SUPPORT - NUC
DES CHNG-All Turbine-Gen Syst	C2A6	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for TURBINE GENERATOR - NUC

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
DES CHNG-All Main & Aux Steam	C2A7	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for MAIN & AUXILIARY STEAM - NUC
DES CHNG-All Feedwater Systems	C2A8	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for FEEDWATER - NUC
DES CHNG-All Condensate Syst's	C2A9	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for CONDENSATE - NUC
DES CHNG-All CVCS Systems	C2B9	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for CHEMICAL & VOLUME CONTROL - NUC

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
DES CHNG-Reactor Coolant	C2BB	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for REACTOR COOLANT - NUC
DES CHNG-All Circ Water Syst's	C2D9	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for CIRCULATING WATER - NUC
DES CHNG-All Accessory Elec Eq	C2E9	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for ACCESSORY ELECTRIC EQUIPMENT - NUC
DES CHNG-Service Water	C2EA	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for SERVICE WATER - NUC

DES CHNG-Training Simulator	C2IS	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for TRAINING CENTER SIMULATOR - NUC
DES CHNG-All Fire Prot Systems	C2K8	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for FIRE PROTECTION - NUC
DES CHNG-All Air & Gas Systems	C2K9	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for AIR & GAS SYSTEMS - NUC
DES CHNG-All Switchyrd, Sub Eq	C2M8	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for SWITCHYARD AND SUBSTATION - NUC

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
DES CHNG-All Misc Plant Equip	C2M9	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for MISCELLANEOUS NUCLEAR PLANT - NUC
DES CHNG-All Emerg D-G Systems	C2N9	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for EMERGENCY DIESEL GENERATOR - NUC
DES CHNG-All Accessory RPV Eq	C2R9	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for ACCESSORY REACTOR EQUIPMENT - NUC
DES CHNG-All Nuclear I&C Sys	C2S9	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for NUCLEAR INSTRUMENTATION & CONTROL - NUC

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
DES CHNG-All Gen'l Stn Supp	C2SS	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for STRUCTURES, BUILDINGS & GROUNDS - NUC
DES CHNG-All Misc Bldgs & Grds	C2U9	All activities associated with the development of design changes. This includes all processes required to ensure that all design changes are justified based on the value added to safety, plant reliability, and efficiency. Also included are all processes to control plant design configuration alterations while maintaining the plant within approved design bases. Additional tasks such as providing alternate replacement items, modifications, setpoint changes, temporary plant alterations, and minor physical changes are included. Developing new or modifying existing documents based on project requirements may include design analysis, calculations, drawings, instructions, etc. Design changes also include the planning, identifying, tracking and reconciliation of documents and procedures needing revision as a result of a change in design or specification. for STRUCTURES, BUILDINGS & GROUNDS - NUC
DSGN BAS-All Gen'l Stn Supp	C3SS	All activities associated with the provisions required for design basis changes. Including all processes required to ensure that the design bases are supplemented by, and make reference to, design codes, standards and conventions, engineering analysis, federal, state, or local requirements. All of these tasks must be performed in addition to those tasks mentioned in CC002. for STATION SUPPORT - NUC
FUEL MGT-All Gen'l Stn Supp	C4SS	All activities associated with the provisions required for fuel management services. This includes developing core designs, providing safety analysis calculations and support, monitoring fuel performance, providing strategies for reactivity management, maintaining the tools (computer programs and hardware) used to support the described tasks. Also included in this action are all tasks associated with monitoring and analyzing the fuel market. for STATION SUPPORT - NUC
DECOM PLNG for NUC DECOM	C5ND	All activities associated with the provisions required for a decommissioning plan of any station or plant. for NUCLEAR DECOMMISSIONING
DECOM PLNG-All Gen'l Stn Supp	C5SS	All activities associated with the provisions required for a decommissioning plan of any station or plant -- for All General Station Support
CAREER TRANSITION PROGRAMS	CACT	Arrange, schedule and implement Outplacement Services for employees on a case basis as required to meet employee transition needs as a result of corporate downsizing or reorganization.
COAL&ALT FUELS-PROCUREMENT	CAFP	Activities required to procure fuel (coal and alternate fuels excluding pet coke and oil) and feedstock for the plants. Major activities include contract negotiation and RFP's.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for AIR HEATING	CAHS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests & submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for AIR HEATING
INCENTIVE PLAN DESIGN & ADMIN	CAIP	The design, development and ongoing management of corporate compensation, performance management and/or recognition programs.
AIR INLET SYSTEM	CAIS	Activities related to planned, periodic and preventive maintenance, installation of, repair, restore, re-work of and operating activities of structures, systems, components or equipment relating to the Air Inlet System. This includes all tasks associated with emergent work for the Air Inlet System.
CONSTRUCTION AUDIT	CAMG	This activity records the time and expense required to provide the construction audit function for the business lines. This service includes reviewing invoices, processing retentions, applying accounting in API and working with various people to resolve related issues.
COAL&ALT FUELS-PLANNING &ADMIN	CAPA	Activities required to identify fuel (coal and alternate fuels excluding pet coke and oil) needs for the plants and verify compliance with existing contracts and monitor performance. Major activities include fuel planning and contract administration.
MTCE - CORR for ASH POND SYST	CAPS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests & submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for ASH POND SYSTEM.
PAYROLL ADMIN	CAPY	Captures the labor costs related to payroll accounting (deduction reconciliation, file maintenance, administration of outside payroll processing, and payroll taxes), and employee non-productive time.
SALARY ANALYSIS	CASA	All analysis and reporting activities designed to support management decision making. Includes the reporting associated with core compensation programs (EPB, Tech Path, etc.), ad-hoc requests from leadership, senior-level summary reports provided to senior leadership and regulatory data requests.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
SPECIAL COMPENSATION	CASC	Administration of the systems and processes involved in the corporate annual merit and incentive cycle. Includes all planning, communication and consulting activities completed as part of the pay and performance process. Also covers planning meetings, merit budget development, performance appraisal preparation, the development of communication materials, consultation with leadership and administration of the ePrism and MeritNet Compensation system, etc.
SALARY DETERMINATION	CASD	Management of Ameren's overall compensation structure and salary administration including decisions regarding offer packages, promotional increases and market rates.
COMMERCIAL & TRANSMISSION ANALYSIS	CATV	Activity to evaluate strategies to optimize Ameren's generation and load portfolio.
MTCE - CORR for AUX BOILER	CAXB	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for AUXILIARY BOILER
MTCE - CORR for AUX STEAM	CAXS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests & submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for AUXILIARY STEAM

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for BTM ASH RMVL	CBAR	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOTTOM ASH REMOVAL
MTCE - CORR for BLR CHM CLNG	CBCC	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests & submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER CHEMICAL CLNG
MTCE - CORR for BLR CHM FD	CBCF	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER CHEMICAL FEED AND SAMPLE

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for BLR CIRC WTR	CBCW	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER CIRC WATER
COMMODITY SETTLEMENTS	CBDR	Activities associated with all customer system activities surrounding the deregulated sales accounts. To include maintaining, billing, printing and mailing of bills to customers of deregulated sales.
MTCE - CORR for BLR DFT SYS	CBDS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER DRAFT SYSTEM
MTCE - CORR for BLR FD WTR	CBFW	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER FEEDWATER
BILLING - LARGE COMM&INDUSTRIA	CBLC	Activities associated with all customer system activities surrounding the LCI sales accounts. To include maintaining, billing, printing and mailing of bills to customers of LCI sales.
BLACKBERRY SUPPORT	CBLK	Activities associated with Blackberry support.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for BOILER	CBLR	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER
BILLING - MISC	CBMC	Activities associated with manual or special preparation of customer bills which includes certain types of special billing. To include "charge back's", "mutual assistance" and "miscellaneous ledger" billings.
MTCE - CORR FOR BOAT & MARINE EQ	CBME	Corrective Mtce for BOATS & MARINE EQUIPMENT. This activity is used to maintain a fleet of pontoon boats and trailers for our mosquito spraying operation each summer. This includes engine purchase and repair, and boat/trailer purchase and repair.
MV90 SYSTEM SUPPORT	CBMV	Activities associated the operation and support of MV90 system interface with CSS and any other electronic billing system used by the Company.
BILLING - RES & SMALL COMM	CBRS	Activities associated with all customer system activities surrounding the residential and small commercial sales accounts. To include maintaining, billing, printing and mailing of bills to customers of residential and small commercial sales.
MTCE - CORR for BLR SU BYPS	CBSB	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER STARTUP AND BYPASS
BILLING- SUPERVISION & SUPPORT	CBSS	Administrative activities associated with supervising and supporting Customer Accounts and all billing-related functions. To include supervision, management, evaluations, projects, studies, performance management and meetings.
BILLING - UNREGULATED	CBUR	Printing bills and sending them to the customers for unregulated sales. This includes inserting, calculating, sequencing, and verifying the bills.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for BLDG YD STCR	CBYS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests & submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BUILDINGS, YARDS AND STRUCTURES
CRITICAL CYBER ASSET COSTS	CCAC	To track North American Reliability Council (NERC) Cyber Security Standard compliance costs.
MTCE - CORR for COMP AIR	CCAS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for COMPRESSED AIR
CUSTOMER & BILLING INQUIRY	CCBI	Activities associated with receiving and resolving a customer inquiry for billing or any other purpose. Inquiries can be in person, by phone or by written correspondence for any class of customer including wholesale customers.
CBT TRAINING DEVELOPMENT	CCBT	Activities associated with developing computer-based training programs such as CD ROMs and other interactive type media.
REG COMPLIANCE ISRS-CI REPLACE-CON	CCCI	Construction activities required to ensure compliance with various regulatory codes that are ISRS qualified.
CONTRIBUTION&MEMBERSHIP ADMIN	CCCM	The labor and other resource costs associated with planning and administration of the Company's contribution program, including donations for charitable, civic, or community welfare purposes. This activity also includes membership administration.
Reg. Compliance - Construct	CCCO	Construction activities required to ensure compliance with various regulatory codes.
Reg. Compliance - Cathodic Pro	CCCP	Cathodic protection activities done as part of a regulatory compliance program.
COMMUNITY RELATIONS	CCCR	All actions associated with involving the company in the community for the betterment of the community and the economic well-being of the company (includes visitor center and public communications).
EMPLOYEE COMMUNICATIONS	CCEC	This activity captures all tasks associated with the administration, development, monitoring, and distribution of internal and external employee communication instruments.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
EDUCATION PROGRAMS	CCEP	The expenses of providing education programs to Company's customers and others in the community.
CALL CENTER ENGINEERING SUPP	CCES	This activity involves evaluation of call center options, telecom systems design, definition of technical specifications, and daily support of call center system operations.
MTCE - CORR for CYCLONE FUEL	CCFS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for CYCLONE FUEL
MTCE - CORR for COAL HNDLG	CCHP	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for PLANT COAL HANDLING
CALL CENTER HOME AGENT SUPPORT	CCHS	This activity involves evaluation of Home Agent options, telecom systems design, and definition of high level and detailed technical specifications.
CUST CHARGE DAILY USE >10,000	CCHO	No definition supplied.
CUST CHARGE DAILY USE <10,000	CCHU	No definition supplied.
CUST CHARGE IP SEASONAL TIER 1	CCH1	No definition supplied.
CUST CHARGE IP SEASONAL TIER 2	CCH2	No definition supplied.
CUST CHARGE IP SEASONAL TIER 3	CCH3	No definition supplied.
Reg. Compliance - Inspect	CCIP	Inspections required to comply with regulatory programs.
Reg. Compliance - CI Svc Repl	CCIS	Cast iron service replacements done to comply with regulatory requirements.
LIBRARY ADMINISTRATION	CCLA	This activity captures the cost of tasks and expenses associated with administering the cost of library services, news, subscriptions, periodicals, and books.
LOBBYING EXPENSES	CCLE	Expenditures for the purpose of influencing public opinion with respect to elections, legislation or influencing the decisions of public officials.
Reg. Compliance - Leak Survey	CCLS	Gas leak surveys performed as required for regulatory compliance
CTI/VRU APPLICATIONS - MAINT	CCMC	Work performed on the CTI/VRU system to either prevent failure or to restore the system to operation after a failure has occurred.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
Reg. Compliance -Other Mn Repl	CCMR	Gas main replacements done on other than cast iron mains as part of regulatory compliance.
CALL CENTER MOVE/UPGRADE/ADD	CCMU	This activity covers the resource costs associated with physically moving, adding, or upgrading call center telephone equipment.
Reg. Compliance - Odorization MTCE - CORR for COMM	CCOD CCOM	Activities associated with the odorization of gas. All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for COMMUNICATIONS
MTCE - CORR for COND & AUX	CCON	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for CONDENSER AND AUXILIARIES
CONTROL OIL SYSTEM	CCOS	Activities related to planned, periodic and preventive maintenance, installation of, repair, restore, re-work of and operating activities of structures, systems, components or equipment relating to the Control Oil System. This includes all tasks associated with emergent work for the Control Oil System.
Reg. Compliance - Patrolling	CCPA	Patrolling of the gas/electric system required for regulatory compliance
CONTRACTED CAPACITY CHARGE-NEW	CCPC	Unbundled charge assessed to Rider RTP-L customers to recover the cost of securing capacity to serve these customers. The charge is based on customer's on-peak KW-day demand. The charge is also applied to Rider RTP customers.
PHOTOGRAPHY	CCPH	This activity includes the labor, expenses, and outside consultant fees associated with photography for insurance claims, newsletters, employee portraits, public relations coverage, etc.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
PIPELINE INTEGRITY	CCPI	Pipeline integrity inspections and maintenance-This activity includes all labor and materials for completing the pipeline integrity management requirements including close interval surveys, smart pigging, consulting services, direct assessments, identification of high consequence areas, transmission mapping and all maintenance activities performed as a result of the pipeline integrity management requirements.
PUBLIC RELATIONS	CCPR	All actions associated with involving the company in gaining publicity through the media.
REG COMPLIANCE - PVC REPL	CCPV	Gas main replacements done on PVC mains as part of regulatory compliance.
CAPACITY COST REIMBURSEMENT	CCRB	Take-or-pay type charge for customers leaving RTP-L service before the end of the Capacity Obligation Period (4 summer months unless advance notice provided and each non summer month.)
MTCE - CORR for COAL RECLAIM	CCRC	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for COAL RECLAIM
Reg. Compliance - Regltr Insp	CCRI	Activities associated with regulator station inspections required for regulatory compliance.
Reg. Compliance-Routine Repair	CCRP	Non-emergency equipment repairs made as part of a regulatory compliance program
Reg. Compliance-Regulator Repl	CCRR	Gas regulator replacements done to comply with regulatory requirements.
MTCE - CORR for COAL RCVG	CCRS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for COAL RECEIVING
CALL CENTER SOFTWARE MAINT	CCSM	Work performed on the software associated with the call center system to either prevent failure or to restore the system to operation after a failure has occurred.
Reg. Compliance-Steel Svc Repl	CCSR	Gas service piping replacements done to comply with regulatory requirements.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for CT GEN	CCTG	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for COMBUSTION TURBINE GENERATOR
Reg. Compliance - Veg Control	CCTT	Tree trimming/vegetation control associated with work required for regulatory compliance.
Reg. Compliance - Valve Survey	CCVS	Activities associated with valve inspections required for regulatory compliance.
MTCE - CORR for CIRC WTR-GEN	CCWS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for CIRCULATING WATER
COMP WATER WASH SYSTEM	CCWW	Activities related to planned, periodic and preventive mainenance, installation of, repair, restore, re-work of and operating activities of structures, systems, components or equipment relating to the Comp Water Wash System. This includes all tasks associated wiht emergent work for the Comp Water Wash System.
DB2 DATABASE ADMINISTRATION	CDB2	Activities associated with maintaining the physical database structure of the DB2 Enterprise. Includes database definition, performance monitoring and tuning, backup/recovery environment and procedures, reorganizations, data refresh upon request, capacity planning and reporting.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for DEMIN	CDEM	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for DEMINERALIZER
MTCE - CORR for EMER GEN	CEGS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for EMERGENCY / LETDOWN GENERATOR
MTCE - CORR for ELEV CRN HST	CELV	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for ELEVATORS, CRANES AND HOISTS
CEP CREDIT ADJUSTMENT	CEPC	This is for Rider CEP - Customer Elect Plan where we are giving customers a cents/kWH credit during the 3 year accrual period and then seeking repayment during a subsequent 3 year repayment period.
ENTERPRISE MIDDLEWARE ADMIN	CEMA	Activities associated with maintaining the Enterprise Middleware infrastructure. Includes definitions, performance monitoring and tuning, backup/recovery environment and procedures, capacity planning and reporting.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for EXTR STEAM	CEXS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for EXTRACTION STEAM
MTCE - CORR for FLYASH RMVL	CFAR	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for FLYASH REMOVAL
MTCE - CORR for FLOOD CNTL SYS	CFCS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for FLOOD CONTROL SYSTEM-GENERAL

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for FLUE GAS CND	CFGC	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for FLUE GAS CONDITIONING
MTCE - CORR for FUEL GAS DELIV	CFGD	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for FUEL GAS DELIVERY SYSTEMS
CORP FORECASTING & MODELING	CFMO	Activities involved with corporate financial modeling and forecasting.
FP CAPACITY CHARGES	CFP1	No definition supplied.
FUEL OIL SYSTEM	CFOS	Activities related to planned, periodic and preventive maintenance, installation of, repair, restore, re-work of and operating activities of structures, systems, components or equipment relating to the Fuel Oil System. This includes all tasks associated with emergent work for the Fuel Oil System.
MTCE - CORR for FIRE PROT-GEN	CFPS	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for FIRE PROTECTION
GOVT COMPLIANCE ADJUSTMENT-GAS	CGAC	No definition supplied.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
AUDITS & REVIEWS	CGAR	Activities associated with scheduling, conducting, reporting, and coordinating audits and reviews to ensure compliance with corporate policies and effective operations. This includes operational and capital project reviews.
MTCE-CORR for GOVERNOR CTL EQU	CGCE	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for GOVERNOR CONTROL EQUIPMENT
MTCE - CORR for MAIN GEN	CGEN	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for MAIN GENERATOR
MTCE - CORR for GAS FUEL SYSTM	CGFS	Corrective Mtce for the Gas Fuel System which is composed of equipment that provides fuel to the "Combustion Turbine Assembly" (CTG) and the "Heat Recovery Steam Generator" (HRSG).
MTCE - CORR for I&C BOILER	CGIB	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests & submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for INSTRUMENTS & CONTROLS - BOILER

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE-CORR for GEN INSTR & CTRL	CGIC	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for GENERAL INSTRUMENT AND CONTROLS
MTCE - CORR for I&C ELEC	CGIE	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests & submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for INSTRUMNT & CONTRLS-ELECTRICAL
MTCE-CORR for TURBINE GENERATO	CHGT	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for TURBINE GENERATOR-GENERAL

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for HEAT RECOV STM	CHRG	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for HEAT RECOVERY STEAM GENERATOR
MTCE - CORR for HVAC-GEN	CHVA	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for HEATING, VENTILATION AND A/C
MTCE-CORR for HYDRO PLANT	CHYD	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also, includes quality control activities such as, ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for HYDRO PLANT
Cont. in Aid of Construction	CIAC	This activity is used to track contributions in aid of construction.
CLIMATE CHANGE	CISD	This activity is used to track development of coalitions, development of strategies to inform and impact climate legislation and regulation and coordinate development of strategies to implement and comply with federal and state requirements.
INLET WET COMP SYSTEM	CIWC	Activities related to planned, periodic and preventive maintenance, installation of, repair, restore, re-work of and operating activities of structures, systems, components or equipment relating to the Inlet Wet Comp System. This includes all tasks associated with emergent work for the Inlet Wet Comp System.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for JKT&AUX CLNG	CJAW	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also, includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program for JACKET/AUXILIARY COOLING.
MTCE - CORR for LAB&TST EQUIP	CLAB	All activities directly related to the repair, restoration, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also, includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work order, and implementing a non-destructive examination program for LABORATORY AND TEST EQUIPMENT.
COLLECTIONS - LG COMM & INDUS	CLCI	Activities associated with collection of past due large commercial or industrial customer accounts, such as account analysis, payment schedules, and/or correspondence with customers and collection agents.
CELLULAR SERVICE MAINTENANCE	CLMC	Work performed on the cellular phone user equipment to either prevent failure or to restore the equipment to operation after a failure has occurred.
COLLECTIONS - NON-UTILITY	CLNU	Activities associated with property damage collections, scrap item sales, facilities work (including line extensions, house moving, loaned crews, overtime call outs, etc.) and miscellaneous collections.
GOVT AFFAIRS - LOCAL	CLOC	Activities associated with analyzing local legislative issues and the like but not actual lobbying of legislators or other government officials.
LUBE OIL SYSTEM	CLOS	Activities related to planned, periodic and preventive maintenance, installation of, repair, restore, re-work of and operating activities of structures, systems, components or equipment relating to the Lube Oil System. This includes all tasks associated with emergent work for the Lube Oil System.
COLLECTIONS - RES & SM COMM	CLRS	Activities associated with collection of past due residential and small commercial customer accounts, such as account analysis, payment schedules, and/or correspondence with customers and collection agents.
CELLULAR SERVICE - REGULAR	CLSR	This activity covers the processing and payment of bills on Cellular service for regular use as well as ordering new service and issuing removals/additions to existing service.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for LIGHTING	CLTG	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for LIGHTING.
CORPORATE METRICS DEVELOPMENT	CMDV	Activities associated with the development, analysis, feedback and action planning of various human capital and satisfaction metrics.
MTCE - CORR for MISC	CMIS	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for MISCELLANEOUS.
MTCE - CORR for PYRT RMVL	CMPR	All activities directly related to the repair, restoratio, or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for MILL PYRITE REMOVAL.
COMMUNITY TREE REPLACEMENT	CMTR	This activity is for payments to communities to support tree replacement programs.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for OTH ASH RMVL	COAR	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for OTHER ASH REMOVAL.
DATABASE ADMINISTRATION	CODA	Activities associated with maintaining the physical database structures of the enterprise. Includes database definition, performance monitoring and tuning, backup/recovery environment and procedures, reorganizations, data refresh upon request, capacity planning and reporting.
ORACLE DATABASE ADMINISTRATION	CODB	Activities associated with maintaining the physical database structure of the Oracle Enterprise. Includes database definition, performance monitoring and tuning, backup/recovery environment and procedures, reorganizations, data refresh upon request, capacity planning and reporting.
COMPUTER EQUIP INSTALLATION	COEI	Activities which include the labor, materials and equipment required to install computer equipment which may include PCs, printers and other peripherals, servers, mainframe equipment, hubs, routers, cable or any other computer equipment related component .
Email System Mte & Supt	COEM	Activities which include the labor, materials, software and equipment required to maintain, support and upgrade the corporate email system.
MTCE - CORR for OTH FUEL SPRT	COFS	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for OTHER FUEL SUPPLY.
HARDWARE MTCE AND UPGRADES	COHU	Activities which include the labor, materials and equipment required to install upgrades or other enhancements to new or existing computer equipment which includes PCs, Printers, Servers, Mainframe equipment and any other network component .
OTHER MIDDLEWARE ADMIN	COMA	Activities associated with maintaining other Middleware infrastructures. Includes definitions, performance monitoring and tuning, backup/recovery environment and procedures, capacity planning and reporting.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MAINFRAME COMPUTER SYS MTCE & SUPT	COMV	All activities associated with the maintenance, repair, upgrade, software systems programming and management of mainframe infrastructure. All hardware and software related activities related to mainframe servers and associated peripheral equipment should be included.
LAN Server Mte & Supt	CONL	Activities which include the labor, materials, software and equipment required to maintain, support and upgrade the infrastructure of the LAN/WAN.
Network Print Mte & Supt	CONP	Activities which include the labor, materials, software and equipment required to maintain, support and upgrade Network Printing within the LAN/WAN.
WAN MAINTENANCE SUPPORT	CONW	Activities associated with WAN maintenance support.
OUTPUT PROCESSING	COOP	All activities associated with production processing of computer output including but not limited to; printing, distribution of paper, microfiche, and other media. Also includes support and assistance for generally used tools and utilities in the product
PRODUCTION CONTROL	COPC	All activities associated with production processing of computer networks, systems and applications (online and batch) including but not limited to; setup, scheduling, monitoring, failure diagnosis, restart/rerun, complete verification and result notifica
Remote Ntwk Access Mte & Supt	CORA	Activities which include the labor, materials, software and equipment required to maintain, support and upgrade remote access to the LAN/WAN.
REQUIREMENTS & TECHNICAL ANAL	CORT	This activity involves evaluation of technology options and definition of high level and detailed technical specifications.
COMPUTER SYSTEM SECURITY ADMIN	COSA	All activities associated with processing computer user authentication and authorization requests. Includes routine administration such as issuing users ideas and passwords for computer networks and systems.
SYSTEM BACKUP	COSB	Activities associated with ensuring that computer systems/platforms are properly backed up in case of a failure. These activities are not associated with Disaster Recovery which contains hot site planning and recovery and associated charges.
MTCE - CORR for OIL STORAGE	COSC	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for OIL STORAGE AND CONDITIONING.
SYSTEM SECURITY DESIGN	COSD	Activities associated with developing, maintaining, administering and monitoring compliance across the entire network to ensure security of computing/telecommunications equipment and software along with the data residing on it.
SOFTWARE MAINTENANCE&UPGRADES	COSM	Activities associated with the analysis, programming, testing, distribution and implementation of system or other non-application software upgrades, enhancements, software fixes, maintenance or minor improvements.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
COMPUTER SYSTEM OPERATIONS	COSO	All activities associated with production operation of computer networks, systems (hardware and software) and application processing (on-line and batch). Includes support and implementation of fire protection equipment, equipment inspections, equipment problem identification, maintenance of operations logs, reports and records regarding equipment performance and any engineering evaluations in support of this action. Also includes writing routine and emergency operating procedures which address computer operations.
SYSTEM PROGRAMMING	COSP	Activities associated with operating system software programming necessary to operate the core infrastructure.
COST OF SERVICE STUDIES	COSS	Activities associated with inside or outside resources performing cost of service studies for the purpose of establishing revenue requirements and functionalizing these costs in such a manner that they can be assigned to tariff rate classes. Includes rate structure and tariff design.
COMPUTER STORAGE MANAGEMENT	COST	Activities which include the labor, materials, software and equipment required to maintain, support and upgrade the computer storage infrastructure, excluding backups.
TAPE OPERATIONS	COTO	All activities associated with production processing of tape operations including but not limited to; printing, distribution of paper, microfiche and other media. Also includes support and assistance for generally used tools and utilities in the product
COAL TRADING	COTR	Activities required to market or trade coal.
UNIX COMPUTER SYS MTCE & SUPT	COUX	All activities associated with the maintenance, repair, upgrade, system administration and management of Unix based systems including but not limited to Solaris, AIX and HP-UX systems. All hardware and software related activities related to servers and associated peripheral equipment should be included.
Windows Server Mte & Supt	COWI	Activities which include the labor, materials, software and equipment required to maintain, support and upgrade the Windows NT infrastructure
MTCE - CORR FOR PUMPBACK STATION	CPBS	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for PUMPBACK STATIONS.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR PUMPBACK RELATED SYS	CPBK	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for PUMPBACK RELATED SYSTEMS.
MTCE - CORR for PCB RETROFIL	CPCB	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for PCB RETROFILLING.
PERSONAL COMPUTER MTCE & SUPT	CPCS	All activities associated with the maintenance, repair, upgrade, software support and management of PC infrastructure. All hardware and software related activities related to desktop computers and associated peripheral equipment should be included.
SCH 10 CAPACITY	CPCY	MISO administrative costs recovered on a capacity basis for RTP-LI customers.
MTCE - CORR for POTABLE WTR	CPDW	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for DOMESTIC/POTABLE WATER.
CAPITAL PROJECT EVALUATION	CPEV	Activities associated with assisting other departments with capital project analysis as well as maintaining the Company project evaluation models. This activity also includes support to the Capital Funding Committee for budgetary purposes.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for PULV FUEL	CPFS	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for PULVERIZED FUEL.
MTCE - CORR for POLL MON	CPMS	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for POLLUTION MONITORING.
MTCE - CORR for PRECIP	CPRC	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for PRECIPITATOR.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for PRI WTR TRT	CPWT	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for PRIMARY WATER TREATMENT.
ROTOR AIR COOLER SYSTEM	CRAC	Activities related to planned, periodic and preventive maintenance, installation of, repair, restore, re-work of and operating activities of structures, systems, components or equipment relating to the Rotor Air Cooler System. This includes all tasks associated with emergent work for the Rotor Air Cooler System.
CREDIT ASSISTANCE	CRCA	Activities associated with life support collections, energy assistance programs, and moratorium activities (local authority notification, third party notification, etc.).
CREDIT RISK ASSESSMENT	CRCR	Activities associated with credit investigations for new customer accounts, which may involve phone or personal interviews, performing credit bureau checks or reviewing other sources of information to determine credit worthiness.
CONVENTIONAL RADIO ENG SUPT	CRES	This activity involves evaluation of conventional radio options, telecom systems design, definition of technical specifications, and daily support of Trunked radio system operations.
CONVENTIONAL RADIO MAINT	CRMC	This activity covers the maintenance of conventional radio infrastructure and user equipment.
CONVEN RADIO MOVE/UPGRADE/ADD	CRMU	This activity covers the resource costs associated with physically moving, adding, or upgrading conventional radio equipment.
MTCE-CORR FOR RICH REAGENT INJECTION	CRRI	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for RICH REAGENT INJECTION SYSTEM.
RTP CAPACITY CHARGES	CRTP	No definition supplied.
CREATE WEB PAGES	CRWP	Create web pages for the corporate intranet using Front Page, Photo Shop, and HTML.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for RAW WTR SYS	CRWS	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for RAW WATER SYSTEM.
MTCE - CORR for SOOT BLOWING	CSBS	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for SOOT BLOWING.
SYBASE DATABASE ADMINISTRATION	CSDA	Activities associated with maintaining the physical database structure of the Sybase Enterprise. Includes database definition, performance monitoring and tuning, backup/recovery environment and procedures, reorganizations, data refresh upon request, capacity planning and reporting.
DIRECTORS' RELATIONS	CSDR	This activity captures tasks/costs associated with fees and retainer paid to / deferred by active board members, and pension benefits paid for retired directors (such deferral of fees and payment of director retirement benefits set forth under terms of applicable Company-sponsored plans). Also includes payment/reimbursement of expenses to directors in connection with their service on the board.
MTCE - CORR for SFTY 1ST AID	CSFA	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for SAFETY AND FIRST AID.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MORTGAGE COMPLIANCE	CSMC	Activities associated with compliance filings under the various indentures.
CELLULAR SERVICE - METER READG	CSMR	This activity covers the processing and payment of bills on Cellular service used specifically for automated meter reading equipment as well as ordering new service and issuing removals/additions to existing service.
COMMUNICATIONS MGMT SUPPORT	CSMS	Support provided for Ameren Corporation management communications projects.
CUSTOMER SALES - NON-WHOLESALE	CSNW	Selling of products or services to prospects within and outside Ameren service territories.
SOCIAL MEDIA ACTIVITIES	CSOM	Meetings and projects involving company communication in the social media community; Facebook, You Tube, Twitter, etc.
PO/RECEIVING VERIFICATION	CSPO	Activities associated with verification that purchase orders and receivables match.
STARTING PACKAGE SYSTEM	CSPS	Activities related to planned, periodic and preventive mainenance, installation of, repair, restore, re-work of and operating activities of structures, systems, components or equipment relating to the Starting Package System. This includes all tasks associated wiht emergent work for the Starting Package System.
MS-SQL DATABASE ADMINISTRATION	CSQL	Activities associated with maintaining the physical database structure of the MS-SQL Enterprise. Includes database definition, performance monitoring and tuning, backup/recovery environment and procedures, reorganizations, data refresh upon request, capacity planning and reporting.
CUSTOMER SALES - RETAIL	CSRE	This activity captures the resource costs associated with scheduling, marketing, trading of retail electric power.
RECORDS MANAGEMENT	CSRM	Activities associated with disposition and storage of Company documents along with administering any records retention policy.
MTCE - CORR for SAN SWG DISP	CSSD	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for SANITARY SEWAGE DISPOSAL.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for STN SVC ELEC	CSSE	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for STATION SERVICE ELECTRICAL.
STOCKHOLDER MEETINGS	CSSM	Activities associated with setting-up and hosting annual stockholder meetings.
GOVT AFFAIRS - STATE	CSTA	Activities associated with analyzing state legislative issues and the like but not actual lobbying of legislators or other government officials.
MTCE-CORR for STEAM PLANT	CSTE	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for STEAM PLANT.
VIDEO PRODUCTION	CSVP	This activity captures the tasks of writing, production, shooting, directing, editing, and distribution of video productions to the appropriate audiences.
CUSTOMER SALES - WHOLESALE	CSWH	This activity captures the resource costs associated with scheduling, marketing, trading of wholesale electric power.
MTCE - CORR for SWITCHYRD-GEN	CSYE	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for SWITCHYARD.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for TOOLS & EQUIP	CTOL	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for TOOLS AND EQUIPMENT.
MTCE - CORR for MAIN TURB	CTRB	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for MAIN TURBINE.
CONTINGENCY SUPPLY FACTOR	CTSF	The purpose of the Contingency Supply Factor (CSF) is to determine the appropriate charges to be included in the Market Value Adjustment (MVA) in the event that the provisions of the Limitations and Contingencies part of Rider MV are employed.
CLAIMS - TEMP TOTAL DISABILITY	CTTD	Activities that capture the resource costs associated with investigation and evaluation of temporary total disability benefits.
CUSTOMER CHARGE	CUCH	An amount to be paid monthly by a retail customer for customer-related costs which includes costs such as service line, billing, customer-support functions - call center, credit, collections, and certain meter-related costs such as current and potential meter transformers.
CUSTOMER DEMAND CHARGE	CUDC	No definition supplied.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for MOBILE EQUP	CVME	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for VEHICLES AND MOBILE EQUIPMENT.
CASH WORKING CAPITAL ADJ	CWCA	This adjustment to Competitive Procurement Process Retail Supply Charges which compensates the utility for the amount of funds required to finance the day-to-day operations for utility-supplied power and energy.
MTCE - CORR for WELL WATER	CWEL	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for WELL WATER.
WATER INJECTION SYSTEM	CWIS	Activities related to planned, periodic and preventive mainenance, installation of, repair, restore, re-work of and operating activities of structures, systems, components or equipment relating to the Water Injection System. This includes all tasks associated with emergent work for the Water Injection System.
MTCE-CORR FOR WTR TRT	CWTP	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for WATER TREATMENT.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - CORR for WASTE WATER	CWWS	All activities directly related to the repair, restoration or rework of structures, systems, components or equipment that fail to perform designed function. Includes all tasks associated with emergent work (excluding minor maintenance and Fix-It-Now maintenance where these programs exist), staging parts, tagout requests/submittals, cost to repair fuel assemblies or core components which were damaged after receipt inspection, performance of the work, post maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage) and any engineering evaluations in support of this action. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders and implementing a non-destructive examination program for WASTE WATER.
DAY AHEAD ENERGY CHARGE	DAEC	This is the hourly energy price, equal to the Day Ahead LMP used in MISO administered markets, multiplied by energy submitted in the customer's day-ahead nomination. This charge is for RTP-LI customers.
MTCE - PRED for AIR HEATING	DAHS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for AIR HEATING
Data Acctng - Interchange Bill	DAIB	Activities associated with providing data relating to interchange transactions, including billing.
DAY AHEAD LOAD FORECASTING	DALF	Activity to record day ahead hourly load forecasting

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for ASH POND SYST	DAPS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for ASH POND SYSTEM
DATA ARCHITECTURE SERVICES Data Acctng - Statistical Rpts	DARC DASR	To provide Data Architecture services for the enterprise. Activities associated with developing various statistical reports on energy system operation (unit generation reports, system load reports, inadvertent reports, etc.).
MTCE - PRED for AUX BOILER	DAXB	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for AUXILIARY BOILER

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for AUX STEAM	DAXS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for AUXILIARY STEAM
MTCE - PRED for BTM ASH RMVL	DBAR	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOTTOM ASH REMOVAL
MTCE - PRED for BLR CHM CLNG	DBCC	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER CHEMICAL CLNG

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for BLR CHM FD	DBC F	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER CHEMICAL FEED AND SAMPLE
MTCE - PRED for BLR CIRC WTR	DBCW	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER CIRC WATER
MTCE - PRED for BLR DFT SYS	DBDS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER DRAFT SYSTEM

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
DEPT BUDGETING & FORECASTING	DBFO	Activities associated with the departmental financial forecasting and the preparation, strategic and financial analysis, development, submission, and tracking of the budget.
MTCE - PRED for BLR FD WTR	DBFW	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER FEEDWATER
MTCE - PRED for BOILER	DBLR	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for BLR SU BYPS	DBSB	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for BOILER STARTUP AND BYPASS
MTCE - PRED for BLDG YD STCR CLAIMS - 3RD PARTY PROPERTY	DBYS DC3P	Need Definition for BUILDINGS, YARDS & STRUCTURES Activities that capture the resource costs associated with investigation, evaluation, defense, and settlement of third party property damage claims against the Company.
CLAIMS - AMEREN PROPERTY	DCAP	Activities associated with investigation, evaluation, defense, and settlement related to filing property damage claims against a third party for damage to Company property resulting from construction activities and normal daily operations of that third party.
MTCE - PRED for COMP AIR	DCAS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for COMPRESSED AIR
DEMAND CHARGES - BASE LOAD	DCBL	The portion of the charge of electric service based upon the electric capacity consumed for base load, billed on the basis of billing demand under applicable rate schedule.
CLAIM WORK - COLLECTIONS	DCCL	Activities associated with collection of past due damage claim accounts, such as account analysis, payment schedules, and/or correspondence with the damaging party or collection agents.
DAMAGE CLAIMS-T&D CLAIM WORK	DCCW	Activities performed to repair damage caused by the public, other utilities, or contractors.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for CYCLONE FUEL	DCFS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for CYCLONE FUEL
MTCE - PRED for COAL HNDLG	DCHP	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for PLANT COAL HANDLING
DELIVERY CHG INADEQUATE CAPACITY	DCIC	No definition supplied.
DEMAND CHARGES - INTCHG SALES	DCIS	The portion of the charge of electric service based upon the electric capacity consumed for interchange sales, billed on the basis of billing demand under an applicable rate schedule.
DEMAND CHARGE MDCQ	DCMD	No definition supplied.
DELINQUENT CALLS - NON RES	DCNR	This activity covers the cost to answer calls involving non-residential customers who have had their service cut off or are about to have their service cut off due to bill non-payment.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for COMM	DCOM	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for COMMUNICATIONS
MTCE - PRED for COND & AUX	DCON	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for CONDENSER AND AUXILIARIES
CLAIMS-PERSONAL INJ LITIGATION	DCPI	Activities associated with investigation, evaluation, defense, and settlement of personal injury claims against the Company.
CLAIMS - PROPERTY LITIGATION	DCPL	Activities associated with investigation, evaluation, defense, and settlement of injury, property damage, or other non-personal injury claims against the Company.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for COAL RECLAIM	DCRC	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for COAL RECLAIM
DELINQUENT CALLS - RES	DCRE	This activity covers the cost to answer calls involving residential customers who have had their service cut off or are about to have their service cut off due to bill non-payment.
MTCE - PRED for COAL RCVG	DCRS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for COAL RECEIVING

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for CT GEN	DCTG	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for COMBUSTION TURBINE GENERATOR
CLAIMS - VEHICLE	DCVE	Activities capturing the resource costs associated with investigation, evaluation, defense, and settlement of vehicle damage claims against the Company.
DEMAND CHARGES - WHOLESALE	DCWH	To record demand (capacity charges) for wholesale customers.
DEBT - CWIP	DCWP	An allowance to the company for borrowed funds used to finance Construction Work in Progress. This amount is credited on the income statement as a reduction to the net interest charges.
MTCE - PRED for CIRC WTR-GEN	DCWS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for CIRCULATING WATER

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for DEMIN	DDEM	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for DEMINERALIZER
DECOMMISSIONING COSTS	DECO	Cost accumulated by a company to transform a nuclear power plant into an out-of-service state and eventually, provide for its complete removal. Decommissioning activities are intended to place the facility in a condition that provides for the health and safety of the general public and the environment.
MTCE - PRED for EMER GEN	DEGS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for EMERGENCY / LETDOWN GENERATOR

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for ELEV CRN HST	DELV	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for ELEVATORS, CRANES AND HOISTS
DEPRECIATION	DEPR	Activities that capture the resource costs associated with depreciation.
DEMAND - REVENUE	DERE	The rate at which electric energy is delivered to or by a system, part of a system, or a piece of equipment expressed in kilowatts at a given instant or averaged over any designated time period.
DELIVERY SERVICES	DESE	Services provided by the local electric utility, included standard metering and billing, that are necessary for the delivery of power to customers.
MTCE - PRED for EXTR STEAM	DEXS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for EXTRACTION STEAM
DIRECTORS FEES AND EXPENSES	DFAE	Fees and expenses of the Board of Directors paid in connection with the general management of the utility.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for FLYASH RMVL	DFAR	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for FLYASH REMOVAL
MTCE-PRED for FLOOD CNTL SYS	DFCS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for FLOOD CONTROL SYSTEM-GENERA;
MTCE - PRED for FLUE GAS CND	DFGC	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for FLUE GAS CONDITIONING

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for FUEL GAS DELIV	DFGD	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for FUEL GAS DELIVERY SYSTEMS
MTCE - PRED for FIRE PROT-GEN	DFPS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for FIRE PROTECTION
MTCE-PRED for GOVERNOR CNTL EQ	DGCE	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for GOVERNOR CONTROL EQUIPMENT

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for MAIN GEN	DGEN	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for MAIN GENERATOR
MTCE - PRED for GAS FUEL SYSTM	DGFS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for GAS FUEL SYSTEM.
MTCE - PRED for I&C BOILER	DGIB	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for GENERAL INSTRUMENT AND CONTROLS

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED GEN INSTR & CTRL	DGIC	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for GENERAL INSTRUMENT AND CONTROLS
MTCE - PRED for I&C ELEC	DGIE	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for INSTRUMENTS & CONTROLS - ELECTRICAL
MTCE-PRED for TURBINE GENERATO	DHGT	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for TURBINE GENERATOR-GENERAL

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for HEAT RECOV STM	DHRG	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for HEAT RECOVERY STEAM GENERATOR
MTCE - PRED for HVAC-GEN	DHVA	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for HEATING, VENTILATION AND A/C
MTCE-PRED for HYDRO PLANT	DHYD	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for HYDRO PLANT

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
DATA INTEGRATION SERVICES	DINT	Activities associated with data integration services, business intelligence, data warehousing and service-oriented architecture.
DIVERSITY COUNCIL	DIVC	This activity includes all diversity activities associated with the Ameren Corporate Diversity Council including meetings, consultants, training and development diversity committee support within business lines and program development and support.
DIVERSITY SERVICES	DIVS	This activity is for diversity services which includes consultation, planning administration of diversity programs and initiatives, community outreach and program development.
MTCE - PRED for JKT&AUX CLNG	DJAW	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for JACKET/AUXILIARY COOLING
MTCE - PRED for LAB&TST EQUIP	DLAB	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for LABORATORY AND TEST EQUIPMENT

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for LIGHTING	DLTG	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for LIGHTING
DDOS MAS COMMUNICATIONS MAINT	DMCM	Work performed on the DDOS MAS communication system to either prevent failure or to restore the system to operation after a failure has occurred.
DDOS MAS COMMUNICATION ENG SUP	DMES	This activity involves evaluation of DDOS MAS communication technology options, systems design, definition of technical specifications, and daily support of the DDOS MAS communication system operations.
MTCE - PRED for MISC	DMIS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for MISCELLANEOUS
DDOS MAS COMM MOVE/UPGRADE/ADD	DMMU	This activity covers the resource costs associated with physically moving, adding, or upgrading DDOS MAS communication system equipment.
T&D Direct Ovhd - Clerical Spt	DOCS	Clerical support time associated with District/Region construction operations, performed by personnel located at the District Region.
DOE DECOMMISSIONING	DOED	Payments made to the Uranium Enrichment Decontamination and Decommissioning Fund by any domestic utility which has purchased separative work units from the Department of Energy (DOE) for the purpose of commercial electrical generation during the period 1945 to October 23, 1992. The fund will be used to pay for the costs of decontamination and decommissioning and remedial action activities at DOE's uranium enrichment facilities.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
T&D Direct Ovhd - Engineering	DOEN	Engineering time associated with District and Region construction operations, performed by District/Region personnel.
T&D Direct Ovhd - Estimating	DOES	Estimating time associated with District/Region construction operations, performed by District/Region personnel.
MTCE - PRED for OTH FUEL SPRT	DOFS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for OTHER FUEL SUPPLY
T & D DIRECT OVHD-MAJOR TOOLS	DOMT	This activity captures the cost of major tools (Class 84 items) issued to district/region personnel that are not associated with a specific job or activity.
MTCE - PRED for OIL STORAGE	DOSC	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for OIL STORAGE AND CONDITIONING
T&D Direct Ovhd - Supervision	DOSV	Supervision costs for District and Region personnel supporting construction operations.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED PUMPBACK RELATED SYS	DPBK	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for PUMPBACK RELATED SYSTEMS.
MTCE - PRED FOR PUMPBACK STATION	DPBS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for PUMPBACK STATIONS.
MTCE - PRED for PCB RETROFIL	DPCB	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for PCB RETROFILLING

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for POTABLE WTR	DPDW	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for DOMESTIC / POTABLE WATER
MTCE - PRED for PULV FUEL	DPFS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for PULVERIZED FUEL
MTCE - PRED for POLL MON	DPMS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for POLLUTION MONITORING

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for PRECIP	DPRC	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for PRECIPITATOR
MTCE - PRED for PRI WTR TRT	DPWT	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for PRIMARY WATER TREATMENT
APPLICATION DISASTER RECOVERY	DRAD	This activity captures all costs associated with the coordination, testing, and maintenance of a Disaster Recovery plan for each major Corporate software application including recovery exercises.
INFRASTRUCTURE DISASTER RECOVR	DRID	This activity captures all costs associated with the coordination, testing, and maintenance of a Disaster Recovery plan for the computer/network/voice network infrastructure, which includes hardware, software, and data recovery. Also includes on-going recovery exercises.
DEMAND RATE LIMITER CREDIT	DRLA	For DS-3 and DS-4 customers whose average Distribution Delivery and Transformation Charges exceed the limit.
MTCE-PRED RICH REAGENT INJECTION	DRRI	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
DISASTER RECOVERY PLANNING	DRRP	This activity captures all costs associated with the coordination and maintenance of the overall Corporate Disaster Recovery plan for all information systems components and software applications including overall monitoring of recovery exercises.
MTCE - PRED for RAW WTR SYS	DRWS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for RAW WATER SYSTEM
CHARGEOFF/RECOVERY DS RATE 1	DS01	Activity to track any chargeoff/recovery on revenue billed as DS1 (SB1299).
CHARGEOFF/RECOVERY DS RATE 2	DS02	Activity to track any chargeoff/recovery on revenue billed as DS2 (SB1299).
CHARGEOFF/RECOVERY DS RATE 3	DS03	Activity to track any chargeoff/recovery on revenue billed as DS3 (SB1299).
CHARGEOFF/RECOVERY DS RATE 4	DS04	Activity to track any chargeoff/recovery on revenue billed as DS4 (SB1299).
CHARGEOFF/RECOVERY DS RATE 5	DS05	Activity to track any chargeoff/recovery on revenue billed as DS5 (SB1299).
CHARGEOFF/RECOVERY DS RATE 6	DS06	Activity to track any chargeoff/recovery on revenue billed as DS6 (SB1299).
CHARGEOFF/RECOVERY DS RATE 3A	DS3A	Activity to track any chargeoff/recovery on revenue billed as DS3A (SB1299).
CHARGEOFF/RECOVERY DS RATE 3B	DS3B	Activity to track any chargeoff/recovery on revenue billed as DS3B (SB1299).
MTCE - PRED for SOOT BLOWING	DSBS	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for SOOT BLOWING
DISTRIBUTION DELIVERY CHARGE	DSDL	An amount to be paid by a retail customer for the delivery of electric power and energy based upon costs incurred for the state-jurisdictional distribution system; varies with demand or energy consumption.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
DDOS SCADA ENGINEERING SUPPORT	DSES	This activity involves evaluation of DDOS SCADA technology options, systems design, definition of technical specifications, and daily support of the DDOS SCADA system operations.
MTCE - PRED for SFTY 1ST AID	DSFA	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for SAFETY AND FIRST AID
DDOS SCADA MAINTENANCE	DSMC	Work performed on the DDOS SCADA system to either prevent failure or to restore the system to operation after a failure has occurred.
DDOS SCADA MOVES/UPGRADES/ADDS	DSMU	This activity covers the resource costs associated with physically moving, adding, or upgrading DDOS SCADA system equipment.
MTCE - PRED for SAN SWG DISP	DSSD	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for SANITARY SEWAGE DISPOSAL

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for STN SVC ELEC	DSSE	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for STATION SERVICE ELECTRICAL
MTCE-PRED for STEAM PLANT	DSTE	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for STEAM PLANT
MTCE - PRED for SWITCHYRD-GEN	DSYE	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for SWITCHYARD

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PRED for TOOLS & EQUIP	DTOL	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for TOOLS AND EQUIPMENT
MTCE - PRED for MAIN TURB	DTRB	All activities directly related to the implementation of predictive maintenance for structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post-maintenance testing, cleanup of job site during and after work, writing of procedures, documentation closeout (signatures and delivery for storage), and any engineering evaluations in support of this action. All activities related to planning, performing, evaluating and monitoring repetitive testing of components or systems. Includes calibrating/cataloging/maintaining/testing equipment, in-service inspections and tests (ISI/IST), performance of LLRT or ILRT or other code required hydrostatic testing (when not included in support of corrective maintenance or modification action), any engineering evaluations in support of testing requirements or evaluating results, and all tests required by the plant technical specifications. Also includes quality control activities such as ensuring and verifying component integrity, performing quality inspections, quality monitoring, reviewing safety related and quality related work orders, and implementing a non-destructive examination program. for MAIN TURBINE
DAILY USAGE INFORMATION CHARGE	DUIC	No definition supplied.

E&C CONSTRUCTION MANAGEMENT	ECCM	Activities associated with general field oversight and coordination of contractors working on construction projects.
E&C CONSTRUCTION	ECCO	This activity covers the material, equipment, and labor required to construct or install equipment facilities or modifications.
E&C DRAFTING	ECDR	Activities associated with the preparation, revision, and maintenance of drawings.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
E&C ENGINEERING & DESIGN	ECED	Actions associated with preparation of calculations, specifications, general arrangement drawings, construction drawings, bid packages, system sizing, design and material requirements, surveying, studies, consulting, and procurement.
E-BUSINESS CHANGE MANAGEMENT	ECHM	Manage implementation of internal policy, process and procedure changes necessary for effective and efficient integration of eBusiness initiatives into the organization.
E-BUSINESS COMMUNICATIONS	ECOM	Communicate with internal and external stakeholders.
E&C PROJECT MANAGEMENT	ECPM	Activities associated with oversight and guidance for activities, including cost and schedule management, expediting, issue resolution, and engineering contractor management.
EQUITY - CWIP	ECWP	An allowance to the company for internal funds used to finance Construction Work in Progress. This amount is credited on the income statement as an increase to the net income.
RIDER EDR UNCOLLECTIBLES	EDRU	No definition supplied.
DRUG TESTING	EDTE	Captures costs related to administration of drug and alcohol testing programs.
ELECTRIC ENVIRONMENTAL ADJ	EEAC	An adjustment factor to recover the costs of environmental activities (commonly referred to as Coal Tar Costs) from retail customers taking electric service. (Note: As of 1/2007, AmerenCILCO did not have this adjustment for electric customers.)
ENERGY EFFICIENCY	EECY	To support energy efficiency policy development, planning and implementation.
EEO COMPLIANCE	EEOC	This activity captures all tasks associated with the compliance of EEOC regulations and administration of employee investigations.
ES&H MONITORING & SPEC STUDIES	EESH	This activity covers labor and resource costs associated with special studies and monitoring to support corporate planning and facilities. Interface with customers, regulators and/or outside consultants to define work scope. Collect field data, analyze
EMS Support - EMS/SCADA Spt	EMES	Activities associated with the support of the EMS/SCADA systems.
E-BUSINESS METRICS	EMET	Develop and implement metrics to measure the effectiveness of eBusiness initiatives.
MEDICAL EVALUATIONS	EMEV	This activity covers the resource costs associated with providing employee medical evaluations required by OSHA as well as utilizing external occupational medicine specialists for the evaluation of employees' abilities to perform the essential functions of their positions.
EMS Support - Eqpt Test	EMTS	Testing activities performed to enhance system reliability.
ENERGY	ENER	Portion of the charge for electric service based upon the electric energy consumed or billed.
ENERGY IMBALANCE SERVICE	ENIS	Debits or Credits provided when a difference occurs between the scheduled and the actual delivery of energy to a load located within a Control Area over a single hour.
ENVIRONMENTAL PERMITTING	ENPE	This activity covers the resource cost associated with obtaining and maintaining environmental permits and other approvals required for facility construction, modification, operation and maintenance in accordance with regulatory requirements, coordinating
SCH 10 ENERGY	ENRG	MISO administrative costs recovered on an energy basis for RTP-LI customers.
ENVIRONMENTAL-ENFORCEMENT SPRT	ENSU	This activity covers the labor and resource cost associated with responding to and negotiation with regulatory agencies on enforcement issues and supporting corporate and operating groups in resolution.
ENERGY THEFT	ENTH	This activity captures all tasks associated with the administration, investigation, review, monitoring, and remediation of all theft of energy services by customers.
E-BUSINESS PROJ PLANNING & MGT	EPLN	Plan and manage the development and implementation of eBusiness initiatives.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MISC EMPLOYEE PROGRAMS	EPME	Activities associated with labor for enrollment, recordkeeping, analysis and reporting related to the Company's benefit plans. Note this excludes administration of medical and dental benefits which is covered under another activity.
E-BUSINESS POL'S, PROC'S & STDS	EPOL	Develop policies, procedures and standards necessary for effective and efficient integration of eBusiness initiatives into the organization.
SERVICE AWARDS	EPSA	The expenses associated with providing monetary or other awards to employees based on years of service.
RECRUITING&EMPLOYMENT-EXTERNAL	EREE	Activities associated with interviewing prospective external resources, performing background investigations, and other activities related to locating and hiring consultants as well as ongoing followup.
RECRUITING&EMPLOYMENT-INTERNAL	EREI	Activities associated with interviewing prospective employees, performing background investigations, and other activities related to locating and hiring employees as well as providing new employee orientation.
E-BUSINESS RESEARCH	ERES	Research developments in eBusiness in the utilities market as well as industry in general. Work with business units to evaluation potential opportunities.
ELECTRIC REGULATORY MATTERS	ERMA	This activity captures the costs related to rate cases, hearings, testimony, and other regulatory proceedings related to electric rate matters.
EMERGENCY RESPONSE PLAN & SPRT	ERPS	This activity covers the resource costs associated with developing, presenting and administering emergency response plans, procedures, and training programs for oil spills, chemical spills and fire protection. It also includes providing on-site support i
ES&H INFORMAL COMPLIANCE	ESCA	This activity covers labor and resource costs associated with the Informal Compliance Assistance Program. This program provides for regular visits by environmental specialists to review compliance with regulations at over 130 Ameren facilities on an informal basis.
ENGINEERING SUPPORT-ED APPLICATIONS	ESED	This activity is for engineering support for energy delivery computer applications.
ESOS ENGINEERING SUPPORT	ESES	This activity involves evaluation of ESOS technology options, systems design, definition of detailed technical specifications, and daily support of ESOS EMS/SCADA system operations.
SAFETY GLASSES	ESGL	This activity covers labor and resource costs associated with providing prescription safety glasses as determined by company policy or labor contract.
ES&H COMPLIANCE REVIEW & SPRT	ESHC	This activity covers the resource cost associated with developing and implementing programs to monitor environmental compliance, identifying and advising where improvement or corrective action is needed, assisting in the development of solutions to proble
ENV SAFETY & HEALTH SVCS & SPRT	ESHS	This activity covers the labor and resource cost associated with developing programs, procedures and training to interpret and communicate regulatory requirements to operating groups and coordinating with operating groups to develop cost effective impleme
ES&H FIELD SAFETY HEALTH	ESIH	This activity covers labor and resource costs associated with Industrial Hygiene studies, monitoring, data collection, reporting and research required by safety and health regulations/policy in support of operating groups.
ESOS MAINT	ESMC	Work performed on the ESOS EMS/SCADA system to either prevent failure or to restore the system to operation after a failure has occurred.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
ESOS MOVES/UPGRADES/ADDITIONS	ESMU	This activity covers the resource costs associated with physically moving, adding, or upgrading ESOS EMS/SCADA system equipment.
ENVIRONMENTAL ON-SITE	ESSC	This activity covers labor and resource costs associated with providing on-site environmental support to operations personnel. This activity code is to be used by ES&H department personnel specifically assigned to designated facilities.
SAFETY SHOES	ESSH	This activity covers the resource costs associated with providing safety shoes as determined by labor contract.
CUSTOMER BILLING AND RECONCILIATION	EUCB	Activities associated with billing and billing reconciliation for customers of gas end user transportation services.
RATE DESIGN & ANALYSIS	EUDA	Activities associated with rate design and analysis performed in support of gas end user transportation services.
CUSTOMER NOMINATIONS AND USAGE	EUNU	Activities associated with collecting, managing, and administering gas customer nomination and usage.
EXCESS USAGE POINT-TO-POINT EMERGENCY & OUTAGE CALLS	EUPP EWEO	NEC 916 This activity includes work to respond to a customer contact. Such contacts could be due to a storm or accident or any other occurrence that leaves a customer without electric or gas service. Such occurrences could also result in limited service as in p
ARCHITECTURE -ENTERPRISE WIDE TECHNOLOGY	EWTA	Attending meetings and performing other associated planning activities related to the Information Technology Enterprise Wide Technical Architecture process.
FUEL BURNED BASE LOAD - FOSSIL	FBFO	The cost of fuel used in the production of steam for the generation of electricity for base load. Also includes expenses in unloading fuel from the shipping media and handling thereof up to the point where the fuel enters the boiler plant structure.
FUEL BURNED BASE LOAD-NUCLEAR	FBNU	Amortization of the net cost of nuclear fuel assemblies used in the production of energy for base load.
CONTRACTED CTG O & M	FCTG	Expenses associated with contracted, routine O & M services for Combustion Turbine Generators. Includes maintenance activities that normally recur at time intervals less than one year.
COMPLIANCE WITH ENVIRONMENTAL REGULATIONS	FENV	This activity captures expenditures necessary to comply with environmental regulations. Examples would be asbestos abatement and disposal, lamp waste disposal, lead abatement, pcb disposal.
FERC ELECTRIC PROGRAM COSTS	FEPC	An annual assessment from FERC passed on through MISO Sch 10 charges for RTP-LI customers.
EXT REPORTING - FERC	FERC	The labor involved in preparing financial and other reports for the Federal Energy Regulatory Commission.
FINANCIALLY FIRM ENERGY	FFEN	An energy transaction with a customer whereas delivery is required for an agreed upon price regardless of any supplier cost or system problems which may arise. In this type of transaction the supplying utility must deliver or pay damages.
AUCTION FTR FP1	FFP1	This activity is used for financial transmission rights (FTRs) related to the Post 2006 auction process for product FP (first interval).
AUCTION FTR FP2	FFP2	This activity is used for financial transmission rights (FTRs) related to the Post 2006 auction process for product FP (second interval).
AUCTION FTR FP3	FFP3	This activity is used for financial transmission rights (FTRs) related to the Post 2006 auction process for product FP (third interval).

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
GARAGE MAINTENANCE	FGMA	This is a general activity intended to capture all garage building and garage equipment maintenance, custodial and janitorial tasks when it is not more feasible to charge such work to a more specific activity.
HVAC MTCE - CORRECTIVE	FHVC	This activity captures all tasks associated with the corrective maintenance, investigation, repair, to HVAC equipment in Company operated buildings or facilities.
HVAC MTCE - MOD & INSTALL	FHVM	Activities associated with O&M modification/installation of HVAC building systems.
HVAC MTCE - PREVENTIVE	FHVP	This activity captures all tasks associated with preventive maintenance to HVAC equipment in Company operated buildings or facilities.
FINANCING - LONG TERM	FILT	Activities associated with financing or refinancing of long term debt for Ameren or it's affiliates. This includes regulatory filings, testimony, underwriters' fees, and on-going remarketing and auction costs for floating rate debt issuances. This also
FINANCIAL TRANSACTION SETTLEMENTS	FINL	Activities associated with financial transaction settlements.
FINANCING - SHORT TERM	FIST	Activities associated with maintaining short term borrowing capacity for both Ameren Corporation and the individual business units. This includes committed credit lines and revolving credit facilities.
FLOW-THRU COMPONENT OF BGS UNBILLED	FLOW	To capture the flow-thru component of BGS unbilled.
AUCTION FTR - LFP	FLFP	This activity is used for financial transmission rights (FTRs) related to the Post 2006 auction process for product LFP.
ASH MARKETING	FMAM	Activities required to market ash. Major activities include market development, customer contacts, and sales contract negotiation.
BUILDING OPERATIONS	FMBO	This activity captures all resource costs associated with the operation of company owned or operating buildings including rentals, utilities, and any other building non-maintenance cost not included in another activity.
CAFETERIA OPERATIONS	FMCO	This activity covers the operating and maintenance costs associated with operating the Ameren GOB cafeteria.
CAFETERIA MTCE - PREVENTIVE	FMCP	This activity covers the preventive maintenance costs associated with operating the Ameren GOB cafeteria.
BUILDING MTCE - CORRECTIVE	FMCR	This activity captures all tasks associated with the general maintenance and repairs to Company owned or operated buildings.
FACILITIES ENGINEERING	FMFE	Engineering of a general nature relating to facilities operations & maintenance, including HVAC, roofing, paving, electrical systems, etc.
FACILITY IMPROVEMENTS	FMFI	Activities associated with installation of capital projects.
BUILDING GENERAL MTCE	FMGM	This activity captures all tasks associated with the general maintenance and repairs to Company owned or operated buildings.
BUILDING MTCE - HONEYWELL SYS	FMHS	Activities associated with operation and maintenance of the Honeywell Building Management System.
JANITORIAL	FMJA	Activities associated with routine janitorial or housekeeping services to maintain Company facilities in a safe and sanitary manner. Includes but not limited to daily cleaning and trash collection.
Family and Medical Leave Act	FMLA	Administration of the Family and Medical Leave Act and processing of the Sick Leave Control Agreement forms, 4801's, for the entire corporation.
MOWING & GROUNDSKEEPING	FMMG	Activities associated with routine groundskeeping services necessary to maintain Company facilities in a safe and eye-pleasing manner. Includes, but is not limited to: mowing, landscaping, etc.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
BUILDING MTCE - MOD & INSTALL	FMMI	Activities associated with O&M modification/installation of non-HVAC building systems.
BUILDING MTCE - PAINTING	FMPA	This activity captures all costs associated with painting the interior or exterior of Company owned or operated buildings.
BUILDING MTCE - PREVENTIVE	FMPR	This activity captures all tasks associated with preventive maintenance to Company owned or operated buildings. This activity excludes HVAC maintenance or any type of corrective maintenance.
BUILDING MTCE - PAVING	FMPV	This activity captures all costs associated with paving walkways or roadways at Company owned or operated buildings.
OFFICE RELOCATION&MODIFICATION	FMRM	Activities associated with employee time, expenses and other costs related to movement of employee offices and modifications to those offices or facilities.
BUILDING MTCE - ROOFING	FMRO	This activity captures all costs associated with repairing roofs on Company owned or operated buildings.
SPACE PLANNING	FMSP	Activities associated with planning, lay-out, and reconfiguring office space and movable partitions and or work stations.
SNOW REMOVAL	FMSR	This activity covers the labor or contractor costs to remove snow from walks and roads that are part of Company owned or operated buildings or other facilities.
FACILITY MGMT - TOWER LEASING	FMTL	Activities associated with the leasing of communications towers, transmission towers and distribution poles to communication service providers and other entities
WASTE MGMT & RECYCLING	FMWM	Activities associated with supporting, developing, identifying, evaluating, measuring, and implementing specific processes related to procurement, use recycle and disposal of products and materials to minimize pollution.
FRAUD INVESTIGATION	FRIN	This activity captures all tasks associated with the administration, investigation, review, monitoring, and remediation of attempts by customer or other parties to use electronic or other non-physical means to steal energy or reduce the price paid for it
AUCTION FTR - RTP	FRTF	This activity is used for financial transmission rights (FTRs) related to the Post 2006 auction process for product RTP.
FUEL TRANS - OPERATIONS	FTOP	Activities required to arrange for the delivery of fuel (coal and alternate fuels excluding pet coke and oil) and feedstock to the plants. Major activities include operational coordination.
FUEL TRANS - PLANNING & ADMIN	FTPA	Activities required to identify transportation logistical needs for the delivery of fuel (coal and alternate fuels excluding pet coke and oil) to the plants and verify compliance with existing contracts and monitor performance. Major activities include t
FUEL TRANS - PROCUREMENT	FTPR	Activities required to procure resources to transport fuel (coal and alternate fuels excluding pet coke and oil) and feedstock to the plants. Major activities include contract negotiation and RFP's.
FIRM TRANSPORT RESERVATION	FTRR	No definition supplied.
TELECOM TOWER MTCE & INSPCT	FTTM	Activity for the costs & labor associated with the inspection and the maintenance of Telecommunications towers.
FUEL-OTHER	FUOT	The cost delivered at the station of all fuel used in other power generation.
VEHICLE DAMAGE REPAIRS	FVDR	This activity captures all tasks associated with the body and other damage repair work performed on Company fleet vehicles which is the result of either a collision or abnormal wear and tear. Minor vehicle repairs or those required due to normal wear and
VEHICLE INSPECTIONS - CONTRACT	FVIC	This activity covers the labor and other resource costs to perform vehicle inspections required by the bargaining unit agreement.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
VEHICLE INSPECTIONS-REGULATION	FVIR	This activity covers the labor and other resource costs to perform vehicle inspections required by state or federal regulation.
VEHICLE MTCE - CORRECTIVE	FVMC	This activity captures all tasks associated with maintenance work to repair broken or worn out parts and body repairs due to either rust or normal wear and tear performed on Company fleet vehicles and which is required to keep the vehicles operating safe
PETROLEUM	FVMP	This activity captures all tasks associated with the fueling of vehicles. This includes the purchase of fuel and the administration of a fueling program.
VEHICLE - OTHER	FVOT	This activity captures labor and resource costs not directly associated with maintenance or repairs performed on Company vehicles. Examples of items that should be included are vehicle licenses, vehicle fuel, or other miscellaneous operating costs direct
GOVERNMENTAL ADVOCACY - ES&H	GAES	This activity covers the resource costs associated with monitoring and reviewing federal, state and local environmental, safety and health laws and regulations affecting Company operations. It also includes influencing as appropriate these laws and regu
BENCHMARKING ACTIVITIES	GBMA	All activities associated with benchmarking activities in support of the GBP.
REC. COMPL.-ATMOSPHERIC CORROSION	GCAC	Atmospheric corrosion activities done as part of the gas regulatory compliance program.
GAS COSTS-FIXED COSTS	GCFC	No definition supplied.
GAS CAP RELEASE&OFF SYS SALES	GCSS	This activity captures resources for performing capacity releases, off-system sales, and other non-traditional trading activities.
GAS COSTS-VARIABLE COSTS	GCVC	No definition supplied.
GAS DAILY SYSTEM OPS	GDSO	Daily operation of gas supply including load forecasting, nominations, scheduling, storage mgt., balancing.
ENVIRONMENTAL ACTIVITIES ADJUSTMENT	GEAC	An adjustment factor to recover the costs of environmental activities from retail customers taking gas service.
RIDER GER CHARGES PRIOR PERIOD	GECP	No definition supplied.
RIDER GER UNCOLLECTIBLES PRIOR PER	GEUP	No definition supplied.
GAS SUPPLY PLANNING	GGSP	This activity captures resources required for gas supply planning and gas supply portfolio management involving forecasting, system modeling, demand analysis, weather analysis, financial risk assessment associated with gas derivatives, etc.
GAS SCADA MAS COMM MAINT	GMCM	Work performed on the Gas SCADA MAS communication system to either prevent failure or to restore the system to operation after a failure has occurred.
GAS SCADA MAS COMM ENG SUPPORT	GMES	This activity involves evaluation of Gas SCADA MAS communication technology options, systems design, definition of technical specifications, and daily support of the Gas SCADA MAS communication system operations.
GAS SCADA MAS COMM MOVE/UP/ADD	GMMU	This activity covers the resource costs associated with physically moving, adding, or upgrading Gas SCADA MAS communication system equipment.
GAS PROCUREMENT - CAPACITY	GPCA	All activities associated with the evaluation and procurement of pipeline and storage capacity. Includes capacity sourcing, invoice processing, contract negotiation, administration of capacity contracts, and any other matters directly related to transport
GAS PROCUREMENT-GAS GENERATING	GPGG	No definition supplied.
GAS PROCUREMENT - GAS SUPPLY	GPGS	All activities associated with the evaluation and procurement of gas supply. Includes gas supply trading (spot & term), invoice processing, contract negotiation, administration of gas supply contracts, and any other matters directly related to gas supply

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
PLANT IMPLEMENT.-DELIVERABLES	GPID	All activities associated with the implementation of the GBP's task team deliverables
GAS RESEDENTIAL ASSISTANCE PROGRAM	GRAP	No definition supplied.
GAS SUPPLY CHARGE	GSCG	No definition supplied.
GAS SCADA ENGINEERING SUPPORT	GSES	This activity involves evaluation of Gas SCADA technology options, systems design, definition of technical specifications, and daily support of the Gas SCADA SCADA system operations.
GAS SCADA MAINTENANCE	GSMC	Work performed on the Gas SCADA system to either prevent failure or to restore the system to operation after a failure has occurred.
GAS SCADA MOVES/UPGRADES/ADDS	GSMU	This activity covers the resource costs associated with physically moving, adding, or upgrading Gas SCADA system equipment.
TEAM DELIVERABLE TRAINING	GTDT	All activities associated with the required training on the new processes developed by the GBP Task Teams.
GAS TRANSPORTED FOR OTHERS	GTFO	Revenue from transporting gas for other companies through the production, transmission, and distribution lines, or compressor stations of the utility.
TASK TEAM SUPPORT OF GBP	GTTS	All activities associated with the GBP team members efforts to design, build, implement and Business support team deliverables as defined in their team charter
UNAUTHORIZED USE	GUAU	No definition supplied.
GAS VOLUME BALANCING ADJUSTMENT	GVBA	No definition supplied.
HSS ENERGY CHARGE	HSEC	No definition supplied.
HSS SUPPLIER CHARGE	HSSC	No definition supplied.
HSS CUPPLY COST ADJ MKT SET. COST	HSSM	No definition supplied.
HSS SUPPLY COST ADJ-PROCUREMENT	HSSP	No definition supplied.
HSS SUPPLY COST ADJ UNCOLLECTIBLE	HSSU	No definition supplied.
HSS SUPPLY COST ADJ WORKING CAPITAL	HSSW	No definition supplied.
HAZARDOUS MATERIALS ADJ	HZMA	This adjustment addresses the recovery of costs related to the utility's asbestos liability. (Note: This adjustment has only been filed and approved for AmerenIP at this time.)
PROJ - INSTL for AIR HEATING	IAHS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for AIR HEATING
PROJ - INSTL for ASH POND SYST	IAPS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for ASH POND SYSTEM
PROJ - INSTL for AUX BOILER	IAXB	Costs attributed to the labor, materials and equipment required to install systems or equipment. for AUXILIARY BOILER
PROJ - INSTL for AUX STEAM	IAXS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for AUXILIARY STEAM
PROJ - INSTL for BTM ASH RMVL	IBAR	Costs attributed to the labor, materials and equipment required to install systems or equipment. for BOTTOM ASH REMOVAL
PROJ - INSTL for BLR CHM CLNG	IBCC	Costs attributed to the labor, materials and equipment required to install systems or equipment. for BOILER CHEMICAL CLNG
PROJ - INSTL for BLR CHM FD	IBCF	Costs attributed to the labor, materials and equipment required to install systems or equipment. for BOILER CHEMICAL FEED AND SAMPLE
PROJ - INSTL for BLR CIRC WTR	IBCW	Costs attributed to the labor, materials and equipment required to install systems or equipment. for BOILER CIRC WATER

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
PROJ - INSTL for BLR DFT SYS	IBDS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for BOILER DRAFT SYSTEM
PROJ - INSTL for BLR FD WTR	IBFW	Costs attributed to the labor, materials and equipment required to install systems or equipment. for BOILER FEEDWATER
PROJ - INSTL for BOILER	IBLR	Costs attributed to the labor, materials and equipment required to install systems or equipment. for BOILER
PROJ - INSTL FOR BOAT & MARINE EQ	IBME	Install for BOATS & MARINE EQUIPMENT. This activity is used to maintain a fleet of pontoon boats and trailers for our mosquito spraying operation each summer. This includes engine purchase and repair, and boat/trailer purchase and repair. It also inclu
PROJ - INSTL for BLR SU BYPS	IBSB	Costs attributed to the labor, materials and equipment required to install systems or equipment. for BOILER STARTUP AND BYPASS
MTCE - INSTL for BLDG YD STCR	IBYS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for BUILDINGS, YARDS & STRUCTURES
PROJ - INSTL for COMP AIR	ICAS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for COMPRESSED AIR
INTERNAL COMPLIANCE CONTROL	ICCL	Activities associated with maintaining the controls between financial systems as well as maintaining current procedures in the finance area.
PROJ - INSTL for CYCLONE FUEL	ICFS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for CYCLONE FUEL
PROJ - INSTL for COAL HNDLG	ICHP	Costs attributed to the labor, materials and equipment required to install systems or equipment. for PLANT COAL HANDLING
PROJ - INSTL for COMM	ICOM	Costs attributed to the labor, materials and equipment required to install systems or equipment. for COMMUNICATIONS
PROJ - INSTL for COND & AUX	ICON	Costs attributed to the labor, materials and equipment required to install systems or equipment. for CONDENSER AND AUXILIARIES
PROJ - INSTL for COAL RECLAIM	ICRC	Costs attributed to the labor, materials and equipment required to install systems or equipment. for COAL RECLAIM
PROJ - INSTL for COAL RCVG	ICRS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for COAL RECEIVING
INDIVIDUAL CSF RATE	ICSF	Amount received through the Contingency Supply Factor for RTP-LI customers.
PROJ - INSTL for CT GEN	ICTG	Costs attributed to the labor, materials and equipment required to install systems or equipment. for COMBUSTION TURBINE GENERATOR
PROJ - INSTL for CIRC WTR	ICWS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for CIRCULATING WATER
DIVIDEND DISBURSEMENT	IDDI	This activity captures costs associated with the calculation and payment of dividends and interest on common stock, preferred stock, and bonds.
PROJ - INSTL for DEMIN	IDEM	Costs attributed to the labor, materials and equipment required to install systems or equipment. for DEMINERALIZER
DIVD REINVSTMT PLAN ADMIN	IDRP	This activity captures all costs associated with the administration and maintenance of the dividend reinvestment plan.
ESCHEATMENT ADMIN	IEAD	This activity captures costs associated with administration and maintenance of lost stockholders.
ILLINOIS ELECTRIC DISTRIBUTION TAX	IEDT	No definition supplied.
PROJ - INSTL for EMER GEN	IEGS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for EMERGENCY / LETDOWN GENERATOR

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
PROJ - INSTL for ELEV CRN HST	IELV	Costs attributed to the labor, materials and equipment required to install systems or equipment. for ELEVATORS, CRANES AND HOISTS
PROJ - INSTL for EXTR STEAM	IEXS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for EXTRACTION STEAM
TRANSMISSION INTERCONNECTION FACILITY EXP/REV	IFAC	This activity code will capture expense and revenue payments that various Ameren companies make/receive for Transmission Interconnection Facility use with other companies.
PROJ - INSTL for FLYASH RMVL	IFAR	Costs attributed to the labor, materials and equipment required to install systems or equipment. for FLYASH REMOVAL
PROJ-INSTL for FLOOD CNTL SYS	IFCS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for FLOOD CONTROL SYSTEM-GENERAL
PROJ - INSTL for FLUE GAS CND	IFGC	Costs attributed to the labor, materials and equipment required to install systems or equipment. for FLUE GAS CONDITIONING
PROJ - INSTL for FUEL GAS DELV	IFGD	Costs attributed to the labor, materials and equipment required to install systems or equipment. for FUEL GAS DELIVERY SYSTEMS
PROJ - INSTL for FIRE PROT	IFPS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for FIRE PROTECTION
PROJ-INSTL for GOVERNOR CTL EQ	IGCE	Costs attributed to the labor, materials and equipment required to install systems or equipment. for GOVERNOR CONTROL EQUIPMENT
PROJ - INSTL for MAIN GEN	IGEN	Costs attributed to the labor, materials and equipment required to install systems or equipment. for MAIN GENERATOR
PROJ - INSTL for I&C BOILER	IGIB	Costs attributed to the labor, materials and equipment required to install systems or equipment. for INSTRUMENTS & CONTROLS - BOILER
PROJ-INSTL for GEN INSTR & CTRL	IGIC	Costs attributed to the labor, materials and equipment required to install systems or equipment. for GENERAL INSTRUMENT AND CONTROLS
PROJ - INSTL for I&C ELEC	IGIE	Costs attributed to the labor, materials and equipment required to install systems or equipment. for INSTRUMENTS & CONTROLS - ELECTRICAL
PROJ-INSTL FOR TURBINE GENERATOR	IHGT	Costs attributed to the labor, materials and equipment required to install systems or equipment for TURBINE GENERATOR.
PROJ - INSTL for HEAT RECOV ST	IHRG	Costs attributed to the labor, materials and equipment required to install systems or equipment for HEAT RECOVERY STEAM GENERATOR
PROJ - INSTL for HVAC	IHVA	Costs attributed to the labor, materials and equipment required to install systems or equipment. for HEATING, VENTILATION AND A/C
PROJ-INSTL for HYDRO PLANT	IHYD	Costs attributed to the labor, materials and equipment required to install systems or equipment. for HYDRO PLANT
INVESTOR CORRESPONDENCE	IICO	Captures costs related to administration and maintenance of telephone and written inquiries from investors.
PROJ - INSTL for JKT&AUX CLNG	IJAW	Costs attributed to the labor, materials and equipment required to install systems or equipment. for JACKET/AUXILIARY COOLING
ILLINOIS AUCTION ANCILLARY CHARGES	ILAA	This activity will contain charges related to the Illinois Auction Ancillary charges.
PROJ - INSTL for LAB&TST EQUIP	ILAB	Costs attributed to the labor, materials and equipment required to install systems or equipment. for LABORATORY AND TEST EQUIPMENT
ILINOIS SWAP SETTLEMENT	ILSW	No definition supplied.
PROJ - INSTL for LIGHTING	ILTG	Costs attributed to the labor, materials and equipment required to install systems or equipment. for LIGHTING

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
PROJ - INSTL for MISC	IMIS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for MISCELLANEOUS
PROJ - INSTL for PYRT RMVL	IMPR	Costs attributed to the labor, materials and equipment required to install systems or equipment. for MILL PYRITE REMOVAL
ILLINOIS MUNICIPAL PERCENT TAX	IMPT	This activity will be used to track the Illinois Municipal Percent Tax.
INDIVIDUAL MVAFA RATE	IMVF	Amount received through the Market Value Adjustment Factor for RTP-LI customers.
EXTERNAL INVESTIGATIONS	INEX	This activity captures all tasks associated with the administration, review, and monitoring of external investigations.
INTERNAL INVESTIGATIONS	ININ	This activity captures all tasks associated with the administration, review, and monitoring of internal investigations.
INDIVIDUAL TREE REPLACEMENT	INTR	This activity is for payments to individuals to support tree replacement programs.
INVENTORY ADJUSTMENTS	INVA	All costs associated with inventory write-off.
INVENTORY ADJUSTMENTS - OBSOLETE	INVO	This activity code will be used to capture the adjustments for obsolete inventory.
PROJ - INSTL for OTH ASH RMVL	IOAR	Costs attributed to the labor, materials and equipment required to install systems or equipment. for OTHER ASH REMOVAL
PROJ - INSTL for OTH FUEL SPRT	IOFS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for OTHER FUEL SUPPLY
CUT IN & CUT OUT - NP	IONP	Activities associated with the physical connection and disconnection of electric and gas services in the field for customers with delinquent account balances.
PROJ - INSTL for OIL STORAGE	IOSC	Costs attributed to the labor, materials and equipment required to install systems or equipment. for OIL STORAGE AND CONDITIONING
PROJ - INSTL PUMPBACK RELATED SYS	IPBK	Costs attributed to the labor, materials and equipment required to install systems or equipment. for Pumpback Related Systems.
PROJ - INSTL FOR PUMPBACK STATION	IPBS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for Pumpback Stations.
PROJ - INSTL for PCB RETROFIL	IPCB	Costs attributed to the labor, materials and equipment required to install systems or equipment. for PCB RETROFILLING
PROJ - INSTL for POTABLE WTR	IPDW	Costs attributed to the labor, materials and equipment required to install systems or equipment. for DOMESTIC / POTABLE WATER
PROJ - INSTL for PULV FUEL	IPFS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for PULVERIZED FUEL
PROJ - INSTL for POLL MON	IPMS	Costs attributed to the labor, materials and equipment required to install systems or equipment. for POLLUTION MONITORING
PROJ - INSTL for PRECIP	IPRC	Costs attributed to the labor, materials and equipment required to install systems or equipment. for PRECIPITATOR
PROJ - INSTL for PRI WTR TRT	IPWT	Costs attributed to the labor, materials and equipment required to install systems or equipment. for PRIMARY WATER TREATMENT
ADVERTISING - INVESTOR	IRAI	This activity includes the labor, expenses, and outside consultant fee associated with the creation of advertising to shareholders and prospective shareholders.
INVESTOR COMMUNICATIONS	IRIC	This activity captures the cost of responding to analyst's requests, calls, and other inquiries.
INVSTR RELATN - PRESENTATIONS	IRPR	Captures costs related to trips and presentations for investor relations.
PROJ-INSTL FOR RICH REAGENT INJECTION	IRRI	Costs attributed to the labor, materials and equipment required to install systems or equipment for RICH REAGENT INJECTION SYSTEM.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
INFRASTRUCTURE REPLACEMENT CHG 0808	IRS2	Activity to track the infrastructure replacement surcharge on customer's bills.
INFRASTRUCTURE REPLACEMENT CHG 0509	IRS3	Activity to track the infrastructure replacement surcharge on customer's bills.
INFRASTRUCTURE REPLACEMENT CHG 0410	IRS4	Activity to track the infrastructure replacement surcharge on customer's bills.
PROJ - INSTL for RAW WTR SYS	IRWS	Costs attributed to the labor, materials and equipment required to install systems or equipment for RAW WATER SYSTEM
DISTRIBUTION INFO SYSTEM APPS AND OPERATIONAL SUPPORT	ISAS	This activity is for Energy Delivery operational system analysis.
PROJ - INSTL for SOOT BLOWING	ISBS	Costs attributed to the labor, materials and equipment required to install systems or equipment for SOOT BLOWING
PROJ - INSTL for SFTY 1ST AID	ISFA	Costs attributed to the labor, materials and equipment required to install systems or equipment for SAFETY AND FIRST AID
FUEL BURN INTCHG SALES-FOSSIL	ISFO	The cost of fuel used in the production of steam for the generation of electricity for interchange sales. Also includes expenses in unloading fuel from the shipping media and handling thereof up to the point where the fuel enters the boiler plant structure
IL STATE GAS USE TAX	ISGU	No definition supplied.
FUEL BURN INTCHG SALES-NUCLEAR	ISNU	Amortization of the net cost of nuclear fuel assemblies used in the production of energy for interchange sales.
EXTERNAL AUDIT FEES & CONSULTING	ISPA	Activities associated with projects and programs specific to one or more functions, where there is a need to identify and track related time and expenses. This activity requires user definition as appropriate. No new definition provided after activity name change.
INFRASTRUCTURE REPLACEMENT SURCHG	ISRS	Activity to track the infrastructure replacement surcharge on customer's bills.

NOMINATION SCHEDULING CHARGE	NMSC	A fixed monthly fee paid by RTP-LI customers for the privilege to submit hourly demand schedules to be passed on to MISO.
IT NETWORK OPERATIONS CNTR SUPPORT	NOPS	All activities associated with the operation of Ameren IT networks (data, telephone and wireless), the support and operation of the Network Operations Center and it's associated systems.
NEW PROJECT EVAL & MONITORING	NPEM	Activities associated with review and support for the analysis of non-regulated, new venture projects as well as support for the New Venture Committee. This also includes support for CIPSCO Investment Co. investments and the day-to-day operation of CIPSC
PROCUREMENT - NON STOCK (PO's)	NSPO	All activities associated with preparing, obtaining and evaluating proposals and preparing purchase orders for non-stock material.
NETWORK INTEGRATION CHARGE	NWIC	MISO Sch 9 demand charge for use of Ameren Illinois (AMIL) transmission lines for RTP-LI customers.
OP SYS-All Elect Prod Eq	O1EL	All activities associated with preparing and placing systems and components in and out of service (e.g., tag-outs and clearances) to support normal and off-normal system operations. Includes support and implementation of fire protection programs, plant w
OP SYS-All Misc Plant Equip	O1M9	All activities associated with preparing and placing systems and components in and out of service (e.g., tag-outs and clearances) to support normal and off-normal system operations. Includes support and implementation of fire protection programs, plant w
OP SYS-All Steam Prod'n Eq	O1SP	All activities associated with preparing and placing systems and components in and out of service (e.g., tag-outs and clearances) to support normal and off-normal system operations. Includes support and implementation of fire protection programs, plant w
OP SYS-All Gen'l Stn Supp	O1SS	All activities associated with preparing and placing systems and components in and out of service (e.g., tag-outs and clearances) to support normal and off-normal system operations. Includes support and implementation of fire protection programs, plant w
EFFL CTRLS-All Elect Prod Eq	O2EL	All activities associated with treatment, measurement, control, minimization, collection, compaction, storage, filtration, ion exchange and other processing, reporting, handling, shipping, disposing of low-level waste and effluents. Includes industrial s
EFFL CTRLS-All Steam Prod'n Eq	O2SP	All activities associated with treatment, measurement, control, minimization, collection, compaction, storage, filtration, ion exchange and other processing, reporting, handling, shipping, disposing of low-level waste and effluents. Includes industrial s
EFFL CTRLS-All Gen'l Stn Supp	O2SS	All activities associated with treatment, measurement, control, minimization, collection, compaction, storage, filtration, ion exchange and other processing, reporting, handling, shipping, disposing of low-level waste and effluents. Includes industrial s
CHEM CTRLS-All Elect Prod Eq	O3EL	All activities associated with establishing and maintaining chemistry program, monitor and control plant chemistry, and manage chemical use and safety program in order to maintain component integrity and optimize plant efficiency. Also collecting and pro
CHEM CTRLS-All Steam Prod'n Eq	O3SP	All activities associated with establishing and maintaining chemistry program, monitor and control plant chemistry, and manage chemical use and safety program in order to maintain component integrity and optimize plant efficiency. Also collecting and pro

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
CHEM CTRLS-All Gen'l Stn Supp	O3SS	All activities associated with establishing and maintaining chemistry program, monitor and control plant chemistry, and manage chemical use and safety program in order to maintain component integrity and optimize plant efficiency. Also collecting and pro
ANALYSIS-UNIT AVAILABILITY	OAAV	Activities associated with analyzing unit availability.
Analysis - Fossil Fuel Sched	OAFB	Activities associated with forecasting fossil fuel requirements.
OPER for AIR HEATING	OAHS	Operating activity relating to AIR HEATING
Analysis - Pwr Plnt Ops Anl	OAOA	Activities associated with the analysis of power plant operations.
Analysis - Unit Outage Anylsis	OAOS	Activities associated with generating unit outage scheduling.
OPER for ASH POND SYSTEM	OAPS	Operating activity relating to ASH POND SYSTEM
Analysis - Unit Cntrl/Dispatch	OAUC	Activities associated with unit commitment, economic dispatch, the coordination of generating unit dispatch between AmerenEnergy and Energy Supply, and activities associated with meeting system performance requirements.
OPER for AUX BOILER	OAXB	Operating activity relating to AUXILIARY BOILER
OPER for AUX STEAM	OAXS	Operating activity relating to AUXILIARY STEAM
OPER for BTM ASH RMVL	OBAR	Operating activity relating to BOTTOM ASH REMOVAL
OPER for BLR CHM CLNG	OBCC	Operating activity relating to BOILER CHEMICAL CLNG
OPER for BLR CHM FD	OBCF	Operating activity relating to BOILER CHEMICAL FEED & SAMPLE
OPER for BLR CIRC WTR	OBCW	Operating activity relating to BOILER CIRC WATER
OPER for BLR DFT SYS	OBDS	Operating activity relating to BOILER DRAFT SYSTEM
OPER for BLR FD WTR	OBFW	Operating activity relating to BOILER FEEDWATER
OPER for BOILER	OBLR	Operating activity relating to BOILER
OPER for BLR SU BYPS	OBSB	Operating activity relating to BOILER STARTUP AND BYPASS
OPER for BLDG YD STCR	OBYS	Operating activity relating to BUILDINGS, YARDS & STRUCTURES
OPER for COMP AIR	OCAS	Operating activity relating to COMPRESSED AIR SYSTEM
OPER for CYCLONE FUEL	OCFS	Operating activity relating to CYCLONE FUEL SYSTEM
OPER for COAL HNDLG	OCHP	Operating activity relating to PLANT COAL HANDLING
OPER for COMM	OCOM	Operating activity relating to COMMUNICATIONS
OPER for COND & AUX	OCON	Operating activity relating to CONDENSER AND AUXILIARIES
OPER for COAL RECLAIM	OCRC	Operating activity relating to COAL RECLAIM
OPER for COAL RCVG	OCRS	Operating activity relating to COAL RECEIVING SYSTEM
CHEM CNTRLS for STM PROD-GEN	OCSP	All activities associated with establishing and maintaining chemistry program, monitor and control plant chemistry, and manage chemical use and safety program in order to maintain component integrity and optimize plant efficiency. Also collecting and pro
OPER for CT GEN	OC TG	Operating activity relating to COMBUSTION TURBINE GENERATOR
OPER for CIRC WTR	OCWS	Operating activity relating to CIRCULATING WATER SYSTEM
OD-CONSULTING	ODCN	Activities associated with the identification, data gathering, diagnosis, action planning, implementation, and evaluation of projects focused on organizational effectiveness, and change management.
OPER for DEMIN	ODEM	Operating activity relating to DEMINERALIZER
OTHER ELEC EQUIP REPAIRS	OEER	All activities directly related to the repair, restoration, or rework of miscellaneous electric equipment that fails to perform the designed function where the purpose is to restore them to a condition where they can be sent back out to a job or put back
OPER for EMER GEN	OEGS	Operating activity relating to EMRGNCY&LETDOWN GENERATOR SYST
OPER for ELEV CRN HST	OELV	Operating activity relating to ELEVATORS, CRANES AND HOISTS

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
ENV CONTROLS for STM PROD	OESP	All activities associated with treatment, measurement, control, minimization, collection, compaction, storage, filtration, ion exchange and other processing, reporting, handling, shipping, disposing of low-level waste and effluents. Includes industrial s
OPER for EXTR STEAM	OEXS	Operating activity relating to EXTRACTION STEAM
OPER for FLYASH RMVL	OFAR	Operating activity relating to FLYASH REMOVAL
OPER for FLOOD CONTROL SYS	OFCS	Operating activity relating to FLOOD CONTROL SYSTEM-GENERAL
OPER for FLUE GAS CND	OFGC	Operating activity relating to FLUE GAS CONDITIONING
OPER for FUEL GAS DELIVERY SYS	OFGD	Operating activity relating to FUEL GAS DELIVERY SYSTEMS
OPER for FIRE PROT	OFPS	Operating activity relating to FIRE PROTECTION SYSTEM
MV RETAIL SUPPLY CHG OFF PK SUMMER	OFSM	The Market Value Retail Supply Charge Off Peak Summer means the retail supply charge for the summer periods as determined pursuant to Rider MV (and mitigated where appropriate) applicable to retail customers electing electric power and energy supply from the utility under BGS 3 for the hours from 10 PM - 10 AM.
MV RETAIL SUPPLY CHG OFF PK WINTER	OFWT	The Market Value Retail Supply Charge Off Peak Winter means the retail supply charge for the non-summer periods as determined pursuant to Rider MV (and mitigated where appropriate) applicable to retail customers electing electric power and energy supply from the utility under BGS 3 for the hours from 10 PM - 10 AM.
OPER for GOVERNOR CONT EQUIP	OGCE	Operating activity relating to GOVERNOR CONTROL EQUIPMENT
OPER for MAIN GEN	OGEN	Operating activity relating to MAIN GENERATOR
OPER for GAS FUEL SYSTEM	OGFS	Operations for the Gas Fuel System which is composed of equipment that provides fuel to the "Combustion Turbine Assembly" (CTG) and the "Heat Recovery Steam Generator" (HRSG).
OPER for I&C BOILER	OGIB	Operating activity relating to INSTRUMENTS & CONTROLS - BOILER
OPER for GEN INSTRUMENT & CTRL	OGIC	Operating activity relating to GENERAL INSTRUMENT AND CONTROLS
OPER for ELEC	OGIE	Operating activity relating to INSTRUMENTS & CONTROLS - ELECTRICAL
OPER for TURBINE GENERATOR-GEN	OHGT	Operating activity relating to TURBINE GENERATOR-GENERAL
OPER for HEAT RECOV STM GEN	OHRG	Operating activity relating to HEAT RECOVERY STEAM GENERATOR
OPER for HVAC	OHVA	Operating activity relating to HEATING, VENTILATION AND A/C
OPER for HYDRO PLANT	OHYD	Operating activity relating to HYDRO PLANT
OPER for JKT&AUX CLNG	OJAW	Operating activity relating to JACKET & AUXILIARY COOLING
OPER for LAB&TST EQUIP	OLAB	Operating activity relating to LABORATORY AND TEST EQUIPMENT
OPER for LIGHTING	OLTG	Operating activity relating to LIGHTING
OPER for MISC	OMIS	Operating activity relating to MISCELLANEOUS
OPER for PYRT RMVL	OMPR	Operating activity relating to MILL PYRITE REMOVAL
MGMT SUPV OPS for STN SUPPORT	OMSS	Activities associated with supervisory personnel performing general operations oversight and coordination of employees when it is not feasible to charge time to a single more specific activity. for STATION SUPPORT
MV RETAIL SUPPLY CHG ON PK SUMMER	ONSM	The Market Value Retail Supply Charge Off Peak Summer means the retail supply charge for the summer periods as determined pursuant to Rider MV (and mitigated where appropriate) applicable to retail customers electing electric power and energy supply from the utility under BGS 3 for the hours from 10 AM - 10 PM.
MV RETAIL SUPPLY CHG ON PK WINTER	ONWT	The Market Value Retail Supply Charge Off Peak Winter means the retail supply charge for the non-summer periods as determined pursuant to Rider MV (and mitigated where appropriate) applicable to retail customers electing electric power and energy supply from the utility under BGS 3 for the hours from 10 AM - 10 PM.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
OPER FOR OTHER ASH REMOVAL	OOAR	Operating activity relating to Ash Removal.
OPER for OTH FUEL SPRT	OOFS	Operating activity relating to OTHER FUEL SUPPLY
OPER for OIL STORAGE	OOSC	Operating activity relating to OIL STORAGE AND CONDITIONING
OIL-PLANNING&ADMIN&PROCUREMENT	OPAP	Activities required to identify and procure oil needs for the plants and verify compliance with existing contracts and monitor performance. Major activities include oil planning, contract negotiation and administration, and RFP's.
OPER FOR PUMPBACK RELATED SYS	OPBK	Operating activity relating to Pumpback Related Systems.
OPER FOR PUMPBACK STATION	OPBS	Operating activity relating to Pumpback Stations.
OPER for PCB RETROFIL	OPCB	Operating activity relating to PCB RETROFILLING
OPER for POTABLE WTR	OPDW	Operating activity relating to DOMESTIC & POTABLE WATER
OPER for PULV FUEL	OPFS	Operating activity relating to PULVERIZED FUEL SYSTEM
OPER for POLL MON	OPMS	Operating activity relating to POLLUTION MONITORING SYSTEM
OPER for PRECIP	OPRC	Operating activity relating to PRECIPITATOR
OPER for PRI WTR TRT	OPWT	Operating activity relating to PRIMARY WATER TREATMENT
OPER FOR RICH REAGENT INJECTION	ORRI	Operating activity relating to RICH REAGENT INJECTION SYSTEM.
OPER for RAW WTR SYS	ORWS	Operating activity relating to RAW WATER SYSTEM
OPER for SOOT BLOWING	OSBS	Operating activity relating to SOOT BLOWING SYSTEM
OP SYS & EQUIP for ELEC PRD-GEN	OSEP	All activities associated with preparing and placing systems and components in and out of service (e.g., tag-outs and clearances) to support normal and off-normal system operations. Includes support and implementation of fire protection programs, plant w
OPER for SFTY 1ST AID	OSFA	Operating activity relating to SAFETY AND FIRST AID
OP SYS & EQUIP for FUEL HNDLNG	OSFH	All activities associated with preparing and placing systems and components in and out of service (e.g., tag-outs and clearances) to support normal and off-normal system operations. Includes support and implementation of fire protection programs, plant w
Ops Supv - Forced Outages	OSFO	Activities associated with responding to transmission forced outages.
Ops Supv - Unit Outage Sch	OSOS	Activities associated with generating unit outage scheduling.
OP SYS & EQUIP for OTHER	OSOT	All activities associated with preparing and placing systems and components in and out of service (e.g., tag-outs and clearances) to support normal and off-normal system operations. Includes support and implementation of fire protection programs, plant w
OPER for SAN SWG DISP	OSSD	OPER for SANITARY SEWAGE DISPOSAL
OPER for STN SVC ELEC	OSSE	Operating activity relating to STATION SERVICE ELECTRICAL
Ops Supv - System Monitor	OSSM	Activities associated with monitoring the transmission system.
OPER for Steam Plant	OSTE	Operating activity relating to STEAM PLANT
Ops Supv - Trns Outage Schd	OSTO	Activities associated with transmission system outage scheduling.
Ops Supv - Unit Cmtmt/Cntrl	OSUC	Activities associated with unit commitment, economic dispatch, the coordination of generating unit dispatch between AmerenEnergy and Energy Supply, and activities associated with meeting system performance requirements.
Ops Supv - WPA & Switch	OSWP	Activities associated with administration of the transmission workers' protection assurance program and routine switching operations in support of normal system operations.
OPER for SWITCHYARD	OSYE	Operating activity relating to SWITCHYARD
OPER for TOOLS & EQUIP	OTOL	Operating activity relating to TOOLS AND EQUIPMENT
OPER for MAIN TURB	OTRB	Operating activity relating to MAIN TURBINE
OPER for MOBILE EQUIP	OVME	Operating activity relating to VEHICLES AND MOBILE EQUIPMENT
OPER for WELL WATER	OWEL	Operating activity relating to WELL WATER

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
OPER for WTR TRT	OWPT	Operating activity relating to WATER TREATMENT.
OPER for WASTE WATER	OWWS	Operating activity relating to WASTE WATER SYSTEM
HOLIDAY	PAHO	This activity captures costs related to holiday pay. It does not include Holiday hours or dollars for employees on fixed accounting distribution.
MTCE - PREV for AIR HEATING	PAHS	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
NON-PRODUCTIVE OFFSET	PANP	This activity captures all costs to offset vacation, sick, holiday, and other allowed time.
OTHER ALLOWED	PAOA	This activity captures costs related to other allowed paid absences with the exclusion of holiday, vacation, or sick pay. It does not include Other Allowed hours or dollars for employees on fixed accounting distribution.
MTCE - PREV for ASH POND SYST	PAPS	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
SICK	PASI	This activity captures costs related to sick pay. It does not include Sick Leave hours or dollars for employees on fixed accounting distribution.
PORTFOLIO & TRADING ANALYSIS	PATA	Commercial analytical services to trading organizations for evaluation of commodity hedging strategies to optimize the generation portfolios.
VACATION	PAVA	This activity captures costs related to vacation pay. It does not include Vacation hours or dollars for employees on fixed accounting distribution.
MTCE - PREV for AUX BOILER	PAXB	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for AUX STEAM	PAXS	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for BTM ASH RMVL	PBAR	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for BLR CHM CLNG	PBCC	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for BLR CHM FD	PBCF	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for BLR CIRC WTR	PBCW	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for BLR DFT SYS	PBDS	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for BLR FD WTR	PBFW	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin

MTCE - PREV for FIRE PROT-GEN	PFPS	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
AUCTION PURCHASE - FP1	PFP1	This activity is used for energy purchases related to the Post 2006 auction process for product FP (first interval).
AUCTION PURCHASE - FP2	PFP2	This activity is used for energy purchases related to the Post 2006 auction process for product FP (second interval).
AUCTION PURCHASE - FP3	PFP3	This activity is used for energy purchases related to the Post 2006 auction process for product FP (third interval).
PJM CONGESTION & FTR ANALYSIS	PFTR	A PJM charge for analysis and management of transmission congestion and financial transmission rights.
PROVISION FOR UNCOLLECTIBLES	PFUC	A fund set up to be charged with amounts sufficient to provide for losses from uncollectible utility revenues.
CHARGEOFF/RECOVERY PGA SUPPLY	PGAS	Activity to track any chargeoff/recovery on revenue PGA related (SB1299).
MTCE-PREV for GOVERNOR CNTL EQ	PGCE	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
PURCHASED GAS - DEMAND	PGDE	The portion of the charge of gas purchased for resale based on the gas capacity consumed and billed on the basis of billing demand under an applicable rate schedule.
PURCHASED GAS - ENERGY	PGEG	The portion of the charge of gas purchased for resale based on the gas energy consumed or billed.
MTCE - PREV for MAIN GEN	PGEN	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for GAS FUEL SYSTM	PGFS	Preventive Mtce for the Gas Fuel System which is composed of equipment that provides fuel to the "Combustion Turbine Assembly" (CTG) and the "Heat Recovery Steam Generator" (HRSG).
MTCE - PREV for I&C BOILER	PGIB	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE-PREV for GEN INSTR & CTRL	PGIC	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for I&C ELEC	PGIE	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
PURCHASED GAS - RESERVATION	PGRE	To be used by Corporate Fuel Accounting only. Related to gas purchased for resale.
PURCHASED GAS REFUNDS	PGRF	Money returned from gas suppliers for gas which was previously bought and paid for.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
PURCHASED GAS - STORAGE	PGST	The cost of purchased gas delivered to storage during the year including all costs incurred in underground storage operations and maintenance.
PAGING SERVICE	PGSV	This activity covers the processing and payment of bills on Pagers use as well as ordering new service and issuing removals/additions to existing service.
PURCHASED GAS-TRANSITION COSTS	PGTC	To be used by Corporate Fuel Accounting only. Related to gas purchased for resale.
PURCHASED GAS - TAKE OR PAY	PGTP	To be used by Corporate Fuel Accounting only. Related to gas purchased for resale.
PURCHASED GAS - TRANSPORTATION	PGTR	The cost involved in operating transmission and distribution systems for gas purchased for resale.
MTCE-PREV for TURBINE GENERATO	PHGT	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for HEAT RECOV STM	PHRG	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for HVAC-GEN	PHVA	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE-PREV for HYDRO PLANT	PHYD	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
PJM INADVERTENT DISTRIBUTION AMT	PIDV	No definition supplied.
PERCENT OF INC PAYMENT PROGRAM	PIPP	No definition supplied.
PJM ACTIVITIES	PISO	No definition supplied.
PJM TRANSMISSION FEES	PITR	Activities associated with support of and coordination with PJM.
MTCE - PREV for JKT&AUX CLNG	PJAW	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for LAB&TST EQUIP	PLAB	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
AUCTION PURCHASE - LFP	PLFP	This activity is used for energy purchases related to the Post 2006 auction process for product LFP.
DISTRIBUTION PLANNING & ASSET PERFORMANCE	PLND	Activities associated with planning and asset performance for the electric distribution system.
PJM LOSSES CHARGES/CREDITS	PLOS	No definition supplied.
MTCE - PREV for LIGHTING	PLTG	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
CORPORATE BUDGETING	PMCB	Activities associated with the preparation, strategic and financial analysis, development, and coordination of the corporate budget.
PERSONNEL DEVELOPMENT & ADMIN	PMDA	This activity captures the cost to administer and develop individual personal development plans and oversee progress against those plans and performing employee evaluations.
PROJECT MGMT CERTIFICATION COSTS	PMIC	This activity captures costs associated with project management certification costs.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
MTCE - PREV for MISC	PMIS	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for PYRT RMVL	PMPR	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
CORPORATE SCORECARD DEVELOPMNT	PMSD	This activity involves the labor and other costs to develop and administer the corporate performance scorecard effort including but not limited to gathering both financial and non-financial data in order to make KPI calculations, distribution and/or reporting. Also development, analysis and feedback/action planning of various metrics such as culture and engagement, customer satisfaction and human capital.
PROCUREMENT, NON-STOCK (BO's)	PNBO	All activities associated with preparing, obtaining, and evaluating proposals and preparing blanket orders for non-stock material. Includes administration of the blanket contract.
Break	PNBR	This activity is used to track crew non-productive time due to breaks.
Delay-Loading and Services	PNDL	This activity is used to track crew non-productive time due to loading of materials and performing other services.
Delay-DOT Inspections	PNDN	This activity tracks crew non-productive time due to daily DOT inspections of vehicles held at the works headquarters.
Driving	PNDR	This activity is used to track crew non-productive time due to driving to the work site.
Allowed-DOT/CDL	PNDT	This activity is used to track crew non-productive time due to required DOT and CDL inspections of vehicles at off-site locations.
Delay-Vehicle Refueling/Svs	PNDV	This activity is used to track crew non-productive time due to vehicle refueling/servicing.
Delay-Other	PNDX	This activity is used to track crew non-productive time due to delays not described elsewhere.
CSM-Safety Meeting	PNMS	This activity is used to track crew non-productive time due to safety meetings.
CSM-Apprentice Training Mtg	PNMT	This activity is used to track crew non-productive time due to apprentice training meetings.
CSM-Union Affairs	PNMU	This activity is used to track crew non-productive time due to union affairs meetings.
CSM-All Other	PNMX	This activity is used to track crew non-productive time during company sponsored meetings other than those described elsewhere.
Weather-Instructional	PNWI	This activity is used to track crew non-productive time due to instructional activities performed during inclement weather.
Weather-Safety Meeting	PNWS	This activity is used to track crew non-productive time due to safety meetings during inclement weather.
Weather-Unproductive	PNWU	This activity code is used to track crew non-productive time due to inclement weather.
Weather-Other Productive	PNWX	This activity tracks crew productive time during inclement weather.
MTCE - PREV for OTH ASH RMVL	POAR	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
MTCE - PREV for OTH FUEL SPRT	POFS	All activities directly related to the planned, periodic and preventive maintenance of structures, systems, components or equipment. Includes staging/acquiring parts, the actual performance of the work, post maintenance testing, cleanup of job site durin
STENO POOL SUPPORT	POOL	Activities associated with the provision of temporary clerical support to various business line departments.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>

RIDER PSP PARTICIPATION CHARGE	RPSP	The participation charge is a fee to cover Program Administrator costs of managing residential real-time pricing through Rider PSP.
PROJ - RMV for PRI WTR TRT	RPWT	This action captures all costs associated with the removal/retirement of company systems or equipment. for PRIMARY WATER TREATMENT
Cust Requests - St Clearing	RQ21	Street clearing work performed under St. Louis County Ordinance.
Cust Rqsts - Antenna InstlMtc	RQAM	Activities associated with the installation and maintenance of foreign company antennas on transmission facilities at customer request.
CUST RQSTS - BILL BACK CONTRACTOR	RQBB	Bill back when acting as a contractor.
Cust Requests - Accomodation	RQCA	Activities associated with customer accomodation, including holding/securing poles and equipment, installing/removing coverup, temporary line lifting, etc.
Cust Requests - Cut In & Out	RQCI	Gas/Electric disconnections/reconnections done at the customer's request, including temporary disconnections/reconnections, successors, and move in/move out activity.
Cust Requests - Cust Relocate	RQCR	Gas/electric equipment or line relocations performed at the customer's request.
Cust Requests - Construct Subs	RQCS	Activities associated with substation construction performed at customer request on either company-owned or customer-owned facilities.
Cust Requests - Govt CI Relocate ISRS	RQGC	Activities associated with the relocation of gas lines at governmental request and are ISRS qualified.
Cust Requests - Govt Reloc	RQGR	Activities associated with the relocation of gas and/or electric lines at governmental request
Cust Requests - Lighting Work	RQLT	Activities associated with street or dusk-to-dawn lighting performed at the customer's request.
Cust. Requests - Maintain	RQMA	Activities associated with the maintenance of transmission equipment at customer request.
Cust Rqsts-Construct Ovhd Ln	RQOL	Construction work on overhead lines performed at special customer request, including foreign company and CATV requests for facility rearrangements, pole installations, additional pole space, and/or line relocations.
Cust Rqsts-Construct Ovhd Svc	RQOS	Construction work on overhead services performed at special customer request, including foreign company requests for facility rearrangements, pole installations, and/or line relocations.
Cust Requests - Pwr Qlty Invst	RQPQ	Power quality investigations resulting from customer requests/complaints

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
Cust Requests - Svc Removal	RQRM	Activities associated with service removals performed at the customer's request. This includes the removals of substation equipment due to changes in system load or due to specific customer request.
Cust Requests - SCADA Test	RQSC	SCADA testing done on customer owned equipment at customer request.
Cust Requests - Eqpt Testing	RQTS	Equipment testing performed by the Relay Department by specific customer request
Cust Requests - Veg. Control	RQTT	Tree trimming/vegetation control performed at the customer's request.
Cust Rqsts-Construct UG Line	RQUL	Construction work on underground lines performed at special customer request, including foreign company and CATV requests for facility rearrangements.
Cust Rqsts-Construct UG Svc	RQUS	Construction work on underground services performed at special customer request, including foreign company and CATV requests for facility rearrangements, and/or gas service relocations.
Cust Requests - Unsched Test	RQUT	Unscheduled testing of customer owned relays or other equipment performed at the customer's request.
SERC/NERC REG RELIABILITY ORG	RROA	Activities associated with regional reliability organizations.
REPRODUCTION & PRINTING	RRPR	Activities associated with tasks related to producing printed materials for use by other Ameren departments, such as copying, desktop publishing, binding, etc.
RESIDENTIAL BALANCE REDUCTION PRGM	RRR0	Legislative settlement for residential customers with more than \$1000 in arrears who are not on LIHEAP or who have electrically operated medical equipment in their homes.
RATE RELIEF VARIABLE	RRR1	Legislative settlement variable credits applied to non-summer billed use for the period 1/02/07 through the May monthly billing period, per Rider RMC.
RATE RELIEF FIXED	RRR2	Legislative settlement fixed credits covering the period 1/2/07 through 8/07, per Rider RMC.
FIXED CREDIT (RATE RELIEF ON-GOING)	RRR3	Legislative settlement fixed credits covering the monthly billing periods from 9/07 until program termination (12/09), per Rider RMC.
VARIABLE CREDITS (RATE RELIEF ON-GOING)	RRR4	Legislative settlement variable credits applied to non-summer billed use for the period 10/07 through 12/31/07, per Rider RMC.
RATE RELIEF CREDIT-DS2	RRR5	Legislative settlement fixed credits applied to customers with increases projected to be over certain amounts, per Rider CRM.
RATE RELIEF CREDIT-DS3	RRR6	Legislative settlement fixed credits applied to customers under 400KW with increases projected to be over certain amounts, per Rider CRM.
LATE PAY CHARGE WRITE-OFF	RRR7	Legislative settlement provision to waive late payment charges associated with unpaid electric bills for usage on and after 1/02/07 through the 9/07 billing period.
RATE RELIEF CREDIT REIMBURSEMENT-GENERATORS	RRR8	No definition supplied.
RATE RELIEF CREDIT EXPENSE	RRR9	No definition supplied.
RELIEF PROGRAM-RESIDENTIAL COOLING ASSISTANCE	RRRA	No definition supplied.
RELIEF PROGRAM-RESIDENTIAL BILL PAYMENT ASSISTANCE	RRRB	No definition supplied.
RELIEF PROGRAM-RESEIDENTIAL HARDSHIP ASSISTANCE	RRRC	No definition supplied.
RELIEF PROGRAM-% OF INCOME HARDSHIP	RRRD	No definition supplied.
RELIEF PROGRAM-NON-RESIDENTIAL HARDSHIP	RRRE	No definition supplied.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
RELIEF PROGRAM-MUNI STREET LIGHT CONVERSION	RRRF	No definition supplied.
RELIEF PROGRAM-FLUORESCENT BULB DISTRIBUTION	RRRG	No definition supplied.
RELIEF PROGRAM-SPACE HEATING WEATHERIZATION	RRRH	No definition supplied.
PROJ - RMV FOR RRI	RRRI	This action captures all costs associated with the removal/retirement of company systems or equipment for Rich Reagent Injection.
RATE RELIEF PROGRAM REIMBURSEMENT- INTER GEN	RRRJ	No definition supplied.
RATE RELIEF PROGRAM EXPENSE	RRRK	No definition supplied.
RATE RELIEF PROGRAM REIMBURSEMENT- OUT GEN	RRRL	No definition supplied.
RELIEF PRG-RES SPACE HTG	RRRN	Legislative settlement provision for residential electric space heating credits for new premises in 2007 and 2008.
RELIEF PROG-SUP RES ASSISTANCE	RRRP	No definition supplied.
RELIEF PROG-RES RECONNECT ASSISTANCE	RRRS	No definition supplied.
RELIEF PROG-RESIDENTIAL SENIOR RATE RELIEF	RRRT	No definition supplied.
RELIEF PROG-NON RESIDENTIAL SUPPLEMENTAL PROGRAM	RRRU	No definition supplied.
RELIEF PROG - RESIDENTIAL STIMULUS PROJ - RMV for RAW WTR SYS	RRRV RRWS	Rate relief credit for residential. Recipients of credit TBD. This action captures all costs associated with the removal/retirement of company systems or equipment for RAW WATER SYSTEM
PROJ - RMV for SOOT BLOWING	RSBS	This action captures all costs associated with the removal/retirement of company systems or equipment. for SOOT BLOWING
RESERVE CAPACITY ASSURANCE	RSCA	RCA insures the utility has capacity to serve customers returning from RES service and is applicable to Rider RTP-L and any RES served customers.
RTP SUPPLIER CHARGE - NEW	RSCH	Retail supply charge applicable to small RTP customers (Rider RTP-1, -2 and -3). Combines capacity and ancillary services costs into a single price.
EXT REPORTING - SEC	RSEC	This activity is associated with the distribution of financial information to the SEC.
PROJ - RMV for SFTY 1ST AID	RSFA	This action captures all costs associated with the removal/retirement of company systems or equipment. for SAFETY AND FIRST AID
RSG CHARGE	RSGC	Charges for RSG and other MISO settlement costs for RTP-LI customers.
NEW PREMISE 07-08 RES SPACE HT CR	RSHC	No definition supplied.
PROJ - RMV for SAN SWG DISP	RSSD	This action captures all costs associated with the removal/retirement of company systems or equipment. for SANITARY SEWAGE DISPOSAL
PROJ - RMV for STN SVC ELEC	RSSE	This action captures all costs associated with the removal/retirement of company systems or equipment. for STATION SERVICE ELECTRICAL
REG AFFAIRS - STATE	RSTA	This action captures costs related to State filing/reconciliations, including collecting and analyzing data, monitoring regulatory filing, and preparing and filing documents.
PROJ-RMV for STEAM PLANT	RSTE	This action captures all costs associated with the removal/retirement of company systems or equipment. for STEAM PLANT
RIDER S UNCOLLECTIBLE ADJ	RSUA	No definition supplied.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
REACTIVE SUPPLY/VOLTAGE CONT	RSVC	In order to maintain transmission voltages on the Transmission Provider's transmission facilities within acceptable limits, generation facilities are operated to produce (or absorb) reactive power. The transmission customer's charge will be determined by the transmission provider.
PROJ - RMV for SWITCHYARD	RSYE	This action captures all costs associated with the removal/retirement of company systems or equipment. for SWITCHYARD
REAL TIME ENERGY CHARGE	RTEC	This is the hourly energy price, equal to the Real Time LMP used in MISO administered markets, multiplied by energy that differs from nominated energy provided by customer. This could be positive or negative. This charge is for RTP-L customers.
PROJ - RMV for TOOLS & EQUIP	RTOL	This action captures all costs associated with the removal/retirement of company systems or equipment. for TOOLS AND EQUIPMENT
CHARGEOFF/RECOVERY RTP 1	RTP1	Activity to track any chargeoff/recovery on revenue billed as RTP1 (SB1299).
CHARGEOFF/RECOVERY RTP 2	RTP2	Activity to track any chargeoff/recovery on revenue billed as RTP2 (SB1299).
CHARGEOFF/RECOVERY RTP 3A	RT3A	Activity to track any chargeoff/recovery on revenue billed as RTP3A (SB1299).
CHARGEOFF/RECOVERY RTP 3B	RT3B	Activity to track any chargeoff/recovery on revenue billed as RTP3B (SB1299).
CHARGEOFF/RECOVERY RTP 4	RTP4	Activity to track any chargeoff/recovery on revenue billed as RTP4 (SB1299).
CHARGEOFF/RECOVERY RTP 5	RTP5	Activity to track any chargeoff/recovery on revenue billed as RTP5 (SB1299).
1 TIME 07 RTP HPSSC SUMMER BILL ADJ	RTPC	One time 2007 credit applied after summer billing period to reflect difference between charging customers based on maximum on-peak demand (old method) and coincident peak demand (approved August 30, 2007) during summer 2007 billing periods.
PROJ - RMV for MAIN TURB	RTRB	This action captures all costs associated with the removal/retirement of company systems or equipment. for MAIN TURBINE
TRAVEL & EXPENSE REPORT PROCESSING	RTRV	Activity to capture the labor costs related to processing travel and expense report disbursements, cash advance disbursements (direct deposit and checks) and related working fund transfers processed by the Cashiers Working Fund employees.
RATE STABILIZATION ADJ	RTSB	The Rate Stabilization Adjustment allows for the adjustment of customer's billing.
D/A ENER R/T LARGE INT	RTLI	This activity is to replace the Day Ahead Energy cons types EV, VV, VW and VZ on RTP-LI tariffs A45, B45, C45 and D45.
PROJ - RMV for MOBILE EQUIP	RVME	This action captures all costs associated with the removal/retirement of company systems or equipment. for VEHICLES AND MOBILE EQUIPMENT
CUSTOMERS WITH 4 OR MORE OUTAGES PROGRAM	RW49	This activity captures the costs associated with repair/correction of conditions that result in a customer experiencing 4 or more outages in a 3 year period. This program is part of the reliability improvement program.
Reliability-Dist. Automation	RWA9	Activities associated with the addition of automated distribution devices & switches
Reliability-Buried Cable Rep	RWC9	Activities associated with the replacement of failed direct buried cable using flow mole.
WHOLESALE CONTRACT ADMIN	RWCA	All costs associated with performing the wholesale sales contract administrative tasks on customer orders including canceling/updating orders in the various customer systems, calculating and preparing the bills, etc.
Reliability -Cast Iron Replace	RWC1	Cast iron main replacements done as part of a reliability improvement program
Reliability-Conc Neut Cable	RWCN	Activities associated with the replacement of failed concentric neutral primary cable.
RELIABILITY-CIRCUIT PERF IMPRVMT PROG	RWCP	Distribution system improvement and reliability work not mandated by State commissions.
Reliability - Construct Subst	RWCS	Activities associated with substation construction required to increase/improve system reliability.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
DEVICE INSPECTION PROGRAM	RWD9	This activity captures the costs associated with the repair of conditions found during the device inspection program (CDIS). This program is part of the reliability improvement program.
PROJ - RMV for WELL WATER	RWEL	This action captures all costs associated with the removal/retirement of company systems or equipment. for WELL WATER
HENDRIX SPACER CABLE REPLACEMENTS	RWH9	This activity is used to track the costs associated with repairing or replacing Hendrix spacer cable installations.
Reliability - Inspect	RWIP	Inspections associated with insuring the reliability of the electric system
Reliability-Cast Iron Svc Repl	RWIS	Cast iron service replacements done as part of a reliability program.
RELIABILITY - CAPACITOR PRGM	RWK9	Activities associated with the installation of distribution line capacitors in Ameren CIPS region. This is part of a three year initiative to reduce reactive power factor.
Reliability - Lightning Pgm	RWL9	Activities required to correct a lightning problem to improve system reliability
MULTIPLE DEVICE INTERRUPTION PROGRAM	RWM9	This activity captures the costs associated with repair/correction of conditions resulting in customer interruptions due to multiple operations of a circuit protective device. This program is part of the reliability improvement program.
Reliability - Maintain	RWMA	Activities to maintain substation and/or transmission equipment associated with reliability improvement projects.
Reliability - Manhole Cleaning	RWMH	Activities associated with manhole cleaning and cable fireproofing, including refilling underground cable joints with insulating oil, degasifying the oil, processing of oil reservoirs, and filling reservoirs with degasified oil.
Reliability - Other Main Repl	RWMR	Gas main replacements done on other than cast iron mains as part of a reliability improvement program
Reliability - Overhaul	RWOH	Periodic overhaul of substation equipment to maintain/enhance system reliability.
Reliability-Construct Ovhd Ln	RWOL	Activities associated with work on overhead lines required to increase/improve system reliability. This includes work conducted under formal reliability programs such as pole inspection, etc. It also includes the voltage conversion of existing lines to e
Reliability - Pole Inspection	RWP9	Inspections and retreatments of utility poles as part of a program designed to enhance system reliability.
Reliability - Pole Reinforce	RWPR	Activities associated with reinforcing poles to improve system reliability.
Reliability - Infrared Inspect	RWR9	Infrared Inspection of installed equipment as part of a reliability improvement program
RELIABILITY-SUBTRAN REMOTE SWITCHING	RWRA	This activity captures the costs related to the sub transmission remote auto switching.
Reliability - Routine Repair	RWRP	Non-emergency repairs to equipment as part of reliability improvement programs
Reliability-Regulator Replace	RWRR	Gas regulator replacements done as part of a reliability improvement program.
Reliability Work - SCADA Prog	RWS9	Activities associated with the installation of RTUs for SCADA systems in substations.
Reliability - SCADA Testing	RWSC	SCADA testing activities done to enhance system reliability.
Reliability - Scheduled Test	RWST	Scheduled testing of relays and other equipment performed to maintain or enhance system reliability.
Reliability Tap Fusing Pgm	RWT9	Activities associated with fusing unprotected distribution taps as part of a new reliability program.
PROJ - RMV for WTR TRT	RWTP	This action captures all costs associated with the removal/retirement of company systems or equipment for WATER TREATMENT
RELIABILITY WORK - EQPT TEST	RWTS	Equipment testing performed by the Relay Department required to support equipment installations required by reliability programs.
Reliability - Veg. Control	RWTT	Tree trimming/vegetation control associated with reliability improvement projects.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
RELIABILITY - UG INSPECTIONS	RWU9	This activity is used to capture dollars related to repair work resulting from underground facilities inspections.
Reliability-Construct UG Line	RWUL	Activities associated with work on underground electric lines required to increase/improve system reliability. This includes work conducted under formal reliability programs. It also includes the voltage conversion of existing lines to enhance system re
Reliability - Worst Feeders	RWW9	Activities associated with the worst performing feeder reliability improvement program as mandated by State commissions.
PROJ - RMV for WASTE WATER	RWWS	This action captures all costs associated with the removal/retirement of company systems or equipment. for WASTE WATER
INFO SVCS-All Gen'l Stn Supp	S1SS	All activities related to planning, development, maintenance and operation of the company's information systems (enterprise, departmental, individual). This includes the operation and maintenance of the supporting network and mainframe infrastructure. A
BUS SVCS-All Gen'l Stn Supp	S2SS	All activities associated with budgeting, cost control, and accounting. This includes the development and administration of the strategic plan; development, monitoring, forecasting and reporting the budget; executive discretionary funds used for activiti
DOC CNTRL-All Gen'l Stn Supp	S3SS	All costs associated with processing records to ensure they are legible, identifiable and retrievable by establishing and complying with procedures that provide for their collection, review indexing, protection and disposition. Publishing and maintaining
PERS SVCS-All Gen'l Stn Supp	S4SS	All activities associated with providing labor relations, organization and human resources development, and human resource related services, employee relocation expenses, providing performance management guidance (setting individual performance goals, mea
MAINT GNDS-All Gen'l Stn Supp	S5SS	All activities related to the planning, administration and maintenance of buildings, facilities, utilities and grounds maintenance. Includes activities associated with providing transportation services and maintenance of other company vehicles. for STATIO
COM GOV REL-All Gen'l Stn Supp	S6SS	All activities associated with involving the company in the community for the betterment of the community and the economic well-being of the company (includes visitor center and public communications). Also includes activities related to political action
PROF ASSN-All Gen'l Stn Supp	S7SS	All activities associated with efforts to represent the company and provide technical input to committees, owner groups and industry, professional and trade associations that support the electric utilities' interest. Includes dues for these types of acti
SAFETY ADMINISTRATION	SAAD	All costs associated with Safety Administration (excludes Safety training.)
T&D System Admin-Clerical Sprt	SACS	This activity covers clerical support and estimating support at the GOB/headquarters.
T&D System Admin - Drafting	SADF	Drafting expenses incurred by District and GOB personnel in support of T&D operations.
T&D System Admin - Engineering	SAEN	Engineering associated with operation of the T&D system performed by GOB/headquarters personnel.
System Admin - Estimating	SAES	Estimating time associated with District/Region operations not attributable to direct overheads. This includes estimating work done by GOB/headquarters personnel.
SERVICE AREA FRANCHISE ADMIN	SAFA	Activities associated with negotiating rates and administering service area franchise agreements with muni's, coops, etc.
System Admin - Misc.	SAMD	Miscellaneous expenses associated with T&D System administration.
T & D SYSTEM ADMINISTRATION	SAMT	Activities associated with administering T & D system.
System Admin - Office Supplies	SAOS	Activities associated with obtaining office supplies or other office related expenses.
System Admin - Rentals	SARE	Equipment rentals associated with the T&D business line

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
PROF ASSN for STN SUPPORT-GEN	SASS	All activities associated with efforts to represent the company and provide technical input to committees, owner groups and industry, professional and trade associations that support the electric utilities' interest. Includes dues for these types of activities.
T&D System Admin - Supervision	SASV	Supervision costs for GOB/headquarters personnel.
System Admin-Welder Quals	SAWQ	Activities associated with developing and administering welder qualification programs.
SUPPLY BALANCING ADJUSTMENT	SBAD	No definition supplied.
RTO SCH 1-SCH SYS CNTRL & DISPATCH	SC01	Activity to record RTO charges/credits by Schedule number.
RTO SCH 2-REACT SUPP VOLT CNTRL	SC02	Activity to record RTO charges/credits by Schedule number.
RTO SCH 7-FIRM PTP TRANS	SC07	Activity to record RTO charges/credits by Schedule number.
RTO SCH 8-NON FIRM PTP TRANS	SC08	Activity to record RTO charges/credits by Schedule number.
RTO SCH 10-COST RECOVERY ADDER	SC10	Activity to record RTO charges/credits by Schedule number.
RTO SCH 14-REGIONAL THROUGH & OUT	SC14	Activity to record RTO charges/credits by Schedule number.
RTO SCH 16-FTR ADMIN	SC16	Activity to record RTO charges/credits by Schedule number.
RTO SCH 17-DA RT MARKET ADMIN	SC17	Activity to record RTO charges/credits by Schedule number.
RTO SCH 18-SUB REGION RATE ADJ	SC18	Activity to record RTO charges/credits by Schedule number.
RTO SCH 20-TREATMNT PWR STATION	SC20	Activity to record RTO charges/credits by Schedule number.
RTO SCH 21-SECA PAID BY PJM	SC21	Activity to record RTO charges/credits by Schedule number.
RTO SCH 22-SECA PAID BY MISO	SC22	Activity to record RTO charges/credits by Schedule number.
RTO SCH 24-CONTROL AREA RECOVERY	SC24	Activity to record RTO charges/credits by Schedule number.
RTO SCH 26-NTWRK UPGRADE TRANS EXP	SC26	Activity to record RTO charges/credits by Schedule number.
EXPEDITING	SCEX	This activity captures the labor and other costs associated with expediting the delivery of materials or equipment purchased to meet a specific date required by the requisitioner.
FREIGHT & TRANSPORTATION HANDL	SCFT	All activities to move material into and out of Ameren's system including moves internal to the Ameren system.
PGA COMMODITY GAS ADJ STEP 2	SCGA	No definition supplied.
INVOICE PROCESSING	SCIP	This activity captures the task of processing and tracking invoices related to purchases.
MATERIALS MANAGEMENT	SCMM	All actions relating to the identification, tracking, and stock level maintenance of warehoused materials prior to use. Includes inventory planning, inventory control and optimization, tool control and maintenance, consumable/free issue management, record keeping.
MINORITY VENDOR ADMIN	SCMV	All activities associated with Minority and Women owned business development.
CONTRACT NEG & ADMIN	SCNA	All activities associated with contracting for "on-site" services. Includes the development, awarding and maintenance of contracts associated with services rendered from third parties.
CUSTOMER SALES - OFF SYSTEM	SCOF	Activity to capture the cost of Off System Sales
CUSTOMER SALES - ON SYSTEM	SCON	Activity to capture the cost of On System Sales
CONTRACT PROPOSAL & DEVLPMNT	SCPD	Developing proposals and contracts, which includes responding to customer RFPs.
PROCESS & PROCEDURE ADMIN	SCPP	Includes all activities associated with changes, modifications, or improvements in the procurement processes or procedures.
SUPPLIER MANAGEMENT	SCSM	Includes all activities related to new/existing supplier evaluation including adding to the acceptable suppliers' list, resolving disputes, commodity team activities and performance management.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
COM GOV REL for STN SPRT-GEN	SCSS	All activities associated with involving the company in the community for the betterment of the community and the economic well-being of the company (includes visitor center and public communications). Also includes activities related to political action
PGA COMMODITY GAS CHARGE	SCGC	Activity to capture charges for system gas revenue that is the commodity component in determining purchased gas adjustments.
PGA DEMAND GAS CHARGE	SDGC	Activity to capture charges for system gas revenue that is the demand component in determining purchased gas adjustments.
DIELECTRIC OIL RECLAMATION	SDOR	Activities associated with processing dielectric oil for reuse.
SUPPLIER FEE AUCTION PURCHASE	SFAP	The supplier fee is to reimburse for the total costs of the Illinois auction and related costs associated with providing administration to the LFP and FP products.
Storage Field Ops - Construct	SFCO	Construction required for gas storage field operations.
Storage Field Ops - Inspect	SFIP	Inspections associated with gas storage field operations.
Storage Field - Maintain	SFMA	Maintenance of gas storage fields and equipment
Storage Field - Operate	SFOP	Activities associated with the normal operation of gas storage fields and equipment
Storage Field Ops - Patrolling	SFPA	Routine patrolling of gas storage fields as part of normal operations
Storage Field Ops - Well Drill	SFWD	Well drilling associated with gas storage field operations
Storage Fields - Well Workover	SFWW	Well work over work associated with gas storage field operations
System Growth - Construct Subs	SGCS	Activities associated with making improvements to substations, including new substation construction, resulting from load growth not attributable to a specific customer. This includes equipment installation and removal.
Sys Growth-Construct Ovhd Line	SGOL	Activities associated with making improvements to existing electric overhead lines resulting from general load growth not attributable to a specific customer. This includes the voltage conversion of existing lines.
System Growth - SCADA Test	SGSC	SCADA testing associated with additions for system growth.
System Growth - Scheduled Test	SGST	Scheduled testing of relays and other equipment done to support additions due to system growth.
System Growth - Eqpt Testing	SGTS	Equipment testing performed by the Relay Department to support equipment installations required by load growth.
System Growth - Veg. Control	SGTT	Vegetation control activities associated with system improvements due to load growth
Sys Growth - Construct UG Line	SGUL	Activities associated with making improvements to existing electric/gas underground lines resulting from general load growth not attributable to a specific customer. This includes the voltage conversion of existing lines.
INFO SVCS for STN SUPPORT-GEN	SISS	All activities related to planning, development, maintenance and operation of the company's information systems (enterprise, departmental, individual). This includes the operation and maintenance of the supporting network and mainframe infrastructure. A
SLA DEVELOPMENT & ADMIN	SLAD	This activity covers the labor and other costs to prepare and administer service level agreements with any of Ameren's Business Lines or Subsidiaries.
T&D Ops - Comm Eqpt	SOCE	Activities associated with work on Company owned communications equipment by Transmission Department personnel.
CAPACITOR REPAIRS	SOCR	All activities directly related to the repair, restoration, or rework of capacitors that fail to perform the designed function where the purpose is to restore them to a condition where they can be sent back out to a job or put back in inventory.
T&D Operations - Dispatching	SODI	Dispatching labor associated with transmission and distribution system operations
FABRICATION	SOFA	Activities associated with the shop fabrication of special materials or tools, equipment, or other special items not general available for purchase.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
OTHER GAS OPERATIONS	SOGO	Activities associated with other gas operations.
T&D Operations - Inspect	SOIP	Inspections associated with normal operation of the electric system
T&D Ops - Leak Investigations	SOLI	Leak investigations performed as part of routine T&D system operations.
T&D Ops - Load & Unload Matl	SOLM	Loading and unloading material by substations personnel to support system operations.
T&D Ops - Locate	SOLO	Locating and marking underground cable and gas lines as part of routine system operations. This activity is performed under the Missouri One Call and Illinois JULIE programs
T&D Ops - Leak Survey	SOLS	Routine gas leak surveys performed as part of the gas system operations
T&D Operations - Lighting Work	SOLT	Activities associated with work on street or dusk-to-dawn lights as part of normal system operations.
T&D Operations - Operate	SOOP	Routine operation of gas and electric equipment or components to support the normal operation of the T&D system. Gas operations include, but are not limited to, recording chart changing, system pressure checks, rectifier reads, and clearing of drips.
T&D Ops - Patrolling	SOPA	Routine patrolling of the electric system
T&D Ops - Light&Relight Pilots	SOPL	Lighting and/or relighting pilot lights at customer request or as part of the restoration of service. This also includes clearing red tags on gas equipment or appliances.
T&D Ops - Reg Station Insp/Exp	SORI	Activities associated with regulator station inspection and expenses not associated with regulatory code compliance.
T&D Ops - Routine Repair	SORP	Non-emergency equipment repairs performed as part of normal system operations
SWITCH REPAIRS	SOSR	All activities directly related to the repair, restoration, or rework of electric switches that fail to perform the designed function where the purpose is to restore them to a condition where they can be sent back out to a job or put back in inventory.
T&D Ops - Switching	SOSW	Routine switching operations in support of normal system operations
TOOL REPAIRS	SOTR	All activities directly related to the repair, restoration, or rework of major tools that fail to perform the designed function where the purpose is to restore them to a condition where they can be sent back out to a job or put back in inventory.
T&D Ops - Veg. Control	SOTT	Tree trimming/vegetation control associated with normal system operations.
SUPPLY COST ADJUSTMENT	SPCA	This activity represents the Supply Cost Adjustment within Rider MV that allows for the recovery of procurement, cash working capital and uncollectible costs associated with providing Utility supplied power for RTP-L and RTP-LI customers.
SPENT FUEL COSTS	SPFU	An annual fee of all nuclear utilities paid to the Nuclear Waste Fund as provided for in the Nuclear Waste Policy Act of 1997. This money will be used by the D.O.E. for study and provide for spent fuel disposal in the United States.
PROCUREMENT - NON STOCK	SPNS	All activities associated with the evaluation and procurement of non-stock materials. Includes processing and administration of purchase requisitions, purchase orders and internal supply requests. (Note - For procurement of non-stock materials or services
SUPPLY PROCUREMENT ADJ	SPPA	The Supply Procurement Adjustment compensate the utility for all direct and indirect costs of procuring and administering electric power and energy supply for its customers, other than amounts incurred under Supplier Forward Contracts or amounts recovered under the cash working capital adjustment, the uncollectible adjustment, the MVAf, and the CSF.
RTO ANCILLARY SPINNING	SPRS	This service is needed to serve load immediately in the event of a system contingency. It may be provided by generating units that are on-line and loaded at less than maximum output.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
System Repair - Construct Subs	SRCS	Activities associated with substation construction required to make repairs resulting from equipment failures, storm damage, or public induced damage.
System Repair - Emergency Rep	SRER	Emergency repairs of the electric/gas system to restore service interruptions.
OTHER GAS MAINTENANCE	SRGM	Other gas maintenance work
System Repair - Lighting Work	SRLT	Activities associated with the repair of street or dusk-to-dawn lights.
System Repair - Maintain	SRMA	Corrective maintenance on substation and/or transmission equipment performed to restore system operation.
GAS MAIN LEAK REPAIR	SRML	Activities associated with gas main leak repair.
GAS METER MAINTENANCE	SRMM	Activities associated with gas meter maintenance.
SYSTEM REPAIR - MINOR STORMS	SRMR	Emergency repairs of the electric/gas system to restore service interruptions due to minor storms.
Sys Repair-Construct Ovhd Line	SROL	Construction activities required to make repairs to the electric system overhead lines resulting from equipment failures, storm damage, or public induced damage, including defective pole and transformer replacements.
Sys Repair-Construct Ovhd Svc	SROS	Construction activities required to make repairs to electric system overhead services resulting from equipment failures, storm damage, or public induced damage, including defective pole and transformer replacements.
SYSTEM REPAIR-OUTSIDE UTILITY	SROU	Construction activities performed for outside utilities when providing assistance in repairing storm damage. This activity is to be used when AmerenUE/CIPS crews and/or personnel are sent to assist other utilities in storm restoration
SUMMER RATE RELIEF CREDIT	SRRC	The summer rate mitigation credit is the mitigation credit applied to residential use in 2007.
System Repair - Routine Repair	SRRP	Non-emergency repairs made to the gas/electric system
System Repair - SCADA Test	SRSC	SCADA testing done as part of system repairs.
GAS SERVICE LEAK REPAIR	SRSL	Activities associated with gas service leak repair.
System Repair - Storm Repair	SRSR	Activities associated with repairs to the electric system due to storm induced damage.
System Repair - Scheduled Test	SRST	Scheduled testing of relays and other equipment done to support repairs to the electric/gas system.
System Repair - Xfmr Rewind	SRTR	Transformer rewind activities performed by or for the substation group..
System Repair - Eqpt Testing	SRTS	Equipment testing performed by the Relay Department required to support repairs to the electric/gas system
System Repair - Veg. Control	SRTT	Tree trimming/vegetation control associated with repairs to the gas/electric system.
Sys Repair-Construct UG Line	SRUL	Construction activities required to make repairs to the electric/gas system underground lines resulting from equipment failures, storm damage, or public induced damage, including transformer replacements.
Sys Repair-Construct UG Svc	SRUS	Construction activities required to make repairs to the electric/gas system underground services resulting from equipment failures, storm damage, or public induced damage, including transformer replacements.
SCHED SYS CTRL & DISP SERV	SSCD	This is a charge to the transmission customer for scheduling the movement of power through, out of, within, or into a Control Area.
STREET LIGHT REPAIRS	SSLR	All activities directly related to the repair, restoration, or rework of street lights that fail to perform the designed function where the purpose is to restore them to a condition where they can be sent back out to a job or put back in inventory.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
TRANSFORMER REPAIRS	STRR	All activities directly related to the repair, restoration, or rework of transformers that fail to perform the designed function where the purpose is to restore them to a condition where they can be sent back out to a job or put back in inventory.
TASK TEAMS for STN SUPPORT RTO ANCILLARY SUPPLEMENTAL	STSS SURS	Need Definition for STATION SUPPORT This service is needed to serve load in the event of a system contingency; however it is not available immediately to serve load but rather within a short period of time. It may be provided by generating units that are on-line but unloaded, by quick-star
VOLTAGE REGULATOR REPAIRS	SVRR	All activities directly related to the repair, restoration, or rework of voltage regulators that fail to perform the designed function where the purpose is to restore them to a condition where they can be sent back out to a job or put back in inventory.
DVLP TRNG-All Gen'l Stn Supp	T1SS	All activities associated with the development of training programs, including the development of training programs, instructor preparation time, production of class materials and the assessment of the training. Some examples are: INPO accreditation acti
CNDCT TRNG-All Gen'l Stn Supp	T2SS	All activities associated with conducting training. Some examples are: INPO accreditation activities, human performance improvement, qualification/certifications, fire drills, employee development training, job specific (discipline) training and operator
ATND TRNG-All Gen'l Stn Supp	T3SS	All participants time in attending training courses. This includes classroom instruction, one-on-one training, correspondence courses, self-study, computer-based training, specialized training, participation in human performance improvement training, on
Analysis - ATC Posting	TAAT	Activities associated with Available Transmission Capacity determination and posting.
Analysis - Line Loading Relief	TALR	Activities associated with relieving transmission line loading.
TARIFF&CUST RELATIONSHIP ADMIN	TCRA	Activities associated with administering file tariffs. This includes interpretations, complaints, computation of bills, etc.
Contracted CTG O & M OVERTIME	TCTG	Billed overtime associated with contracted O & M services for Combustion Turbine Generators.
Dispatch - Trans Dispatching	TDIS	Activities associated with dispatching transmission services.
TRANSPORT DELIVERY GAS SVC	TDSC	No definition supplied.
TRANSPORT ENGINEERING SUPPORT	TENS	This activity involves evaluation of Transport technology (private microwave, fiber optics) options, telecom systems design, and definition of high level and detailed technical specifications.
TELECOM LOADING	TLCM	This activity captures all costs associated with the telecom loading.
TRANSPORT LEASED CIRCUITS	TLSC	This activity covers the processing and payment of bills on dedicated, single-use, leased circuits as well as ordering new service and issuing removals/additions to existing service.
STOCK MAT'L DELIVERY CALLAWAY	TMEC	Activities associated with the transport of stock material and equipment for Callaway Plant.
MATERIAL & EQUIPMENT DELIVERY	TMED	Activities associated with the transport of material and equipment from one geographic location to another.
STOCK MAT'L DELIVERY METRO	TMEM	Activities associated with the transport of stock material and equipment for T&D Metropolitan Districts.
STOCK MAT'L DELIVERY OTHER	TMEO	Activities associated with the transport of stock material and equipment for other work groups.
POLE DELIVERY	TMEP	Activities associated with the transport of distribution and transmission poles.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
STOCK MAT'L DELIVERY REGIONAL	TMER	Activities associated with the transport of stock material and equipment for Regional Districts
TRANSPORT MAINTENANCE	TMTC	Work performed on the transport system to either prevent failure or to restore the system to operation after a failure has occurred.
TRANSPORT MOVES/UPGRADES/ADDS	TMUA	This activity covers the resource costs associated with physically moving, adding, or upgrading transport system equipment.
TRANSFER PLANT IN SERVICE	TPIS	Activities that capture the costs associated with transfer plant in service.
NON-SAFETY TRAINING IN ILL	TRAI	Activities associated with "attending" non-safety training that meets the requirements for the Illinois tax credit. Generally, requirements for the Illinois tax credit include: 1)Illinois residents attending non-safety training anywhere in Missouri, Illinois or any other place. 2)Non-Illinois residents attending non-safety training in the State of Illinois.
COMMODITY MARGIN RPTG & ANALYSIS	TRCD	Activities associated with the review, negotiation, and administration of Master Trading Agreements (i.e. tariffs, enabling agreements, ISDA's, etc.) with counterparties. No new definition provided after activity name change.
TRADING - CONFIRMATIONS	TRCN	Activities associated with the documentation of transactions with counterparties. This includes written and verbal communications with counterparties and tracking deal status to execution.
TRADING - DATA COLLECT&VERIFIC	TRCV	Activities associated with populating Ameren Energy's operating system with transactional information. This includes set-up and maintenance of the operating system, verification of data accuracy and integrity, and maintenance of counterparty/contact info
TRAINING DEVELOPMENT IN ILLINOIS	TRDI	Activities associated with "developing" training that meets the requirements for the Illinois tax credit. Generally, requirements for the Illinois tax credit include: 1)Employees developing training in the State of Illinois. This could also include employees in Missouri developing training for the State of Illinois. 2)Vendors developing or conducting training in the State of Illinois.
TRUNKED RADIO ENGINEERING SUPP	TRES	This activity involves evaluation of Trunked radio options, telecom systems design, definition of technical specifications, and daily support of Trunked radio system operations.
TRANSFORMATION CHARGE	TRFC	The Transformation Charge is a charge by the utility, for utility-owned and operated transformation, to transform electric energy from Supply Voltage to the Delivery Voltage as required by retail customers under Rates DS-3 and DS-4. The customer's kW for the transformation charge is based on the highest billing demand in the most recent 12 monthly billing periods including the current billing period. The customer is billed a fixed charge per kW.
TRUNKED RADIO INFRASTRUCTR MTC	TRIM	This activity covers the maintenance of the Trunked radio infrastructure.
TRANSMISSION SERVICE KW CHARGE	TRKW	Transmission Service kW Charge represents recovery of transmission-related costs from retail customers taking electric supply service from the utility not recovered otherwise through Rider MV which is based upon a kW basis.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
RIDER TS UNCOLLECTIBLES KWH	TKWH	No definition supplied.
TRUNK RAD MOBILE/CTRL BASE MTC	TRMC	This activity covers the maintenance of mobile radios and control bases for the Trunked radio system.
3RD PARTY COAL TERMINAL ACTIVITIES	TRML	This activity includes the revenues and costs associated with operating 3rd party coal terminals at Meramec Plant and the Gateway Terminal.
TRANSMISSION SERVICE KWH CHARGE	TRMS	Transmission Service kWh Charge represents recovery of transmission-related costs from retail customers taking electric supply service from the utility, not recovered otherwise through Rider MV, which is based upon a kWh basis.
TRUNKED RADIO MOVE/UPGRADE/ADD	TRMU	This activity covers the resource costs associated with physically moving, adding, or upgrading Trunked radio equipment.
TRAINING - ATTEND	TRNA	Activities associated with taking/attending training courses or seminars which are required to satisfy the training requirements of that individual employee's position description or job class or are at the discretion of management (safety training is not
TRAINING - DEVELOP & DELIVER	TRND	Activities associated with developing and delivering training programs. This includes need/gap analyses, developing associated training plans, developing class materials, preparing for and delivering training, and assessing the training. NOTE: Training
LEADERSHIP DEVELOPMENT	TRNL	Providing development experiences to various levels of leadership such as Supervisor Orientation, Management Development Forum and IMS certifications. Increasing effectiveness of existing and future leadership through executive coaching and planning for future capacity through succession planning.
TRUNKED RADIO PORTABLE MAINT	TRPM	This activity covers the maintenance of portable radios for the Trunked radio system.
POWER SCHEDULING	TRPS	This activity captures labor and other expenses associated with physical power scheduling. This includes recording trades in OASIS and PowerWorks
TRAINING - SAFETY MANDATED	TRSF	This activity covers the labor and other costs associated with attending OSHA, DOT, NRC or any other regulatory required safety training.
SAFETY TRAINING IN ILL	TRSI	Activities associated with attending safety training in Illinois. Generally, requirements for the Illinois tax credit include: 1) Illinois residents attending safety training anywhere in Missouri, Illinois or any other place. 2) Non-Illinois residents attending safety training in the State of Illinois.
TRAINING - SAFETY MEETINGS	TRSM	This activity covers the labor costs and any other expenses associated with weekly safety meetings required in the bargaining unit contract.
TRANSMISSION - UNBUNDLED	TRUN	The delivery of electricity from a generating facility to local utility distribution facilities, typically over high voltage power lines.
TELEPHONE SYSTEM ADMIN	TSAD	This activity covers the processing of telephone bills on dedicated circuits, the ordering of new dedicated circuits, and issuing removals/additions to existing circuits.
Trns Sched - Contract Admin	TSCA	Activities associated with contract administration for the transmission system.
TRANSMISSION SALES-ENERGY	TSEN	This is a charge to the Transmission Customer each month for reserved capacity.
TELEPHONE SYSTEM ENG SUPPORT	TSES	This activity involves evaluation of telephone technology options, telecom systems design, definition of detailed technical specifications, and daily support of telephone system operations.
RIDER TS UNCOLLECTIBLE KW DEMAND	TSKW	No definition supplied.
TRANSMISSION SERVICE LOSSES - CAPAC	TSLC	Capacity and energy losses occur when a Transmission Provider delivers electricity across its transmission facilities for a Transmission Customer. This is a charge when the Transmission Customer agrees to have the Transmission Provider supply the capacit

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
LONG DISTANCE TELEPHONE SVCS	TSLD	This activity covers the processing and payment of bills on Long Distance Service as well as ordering new service and issuing removals/additions to existing service.
TRANS SERV LOSSES -ENERGY	TSLE	Capacity and energy losses occur when a Transmission Provider delivers electricity across its transmission facilities for a Transmission Customer. This is a charge when the Transmission Customer agrees to have the Transmission Provider supply the capacity
TELEPHONE SYSTEM MAINT	TSMC	Work performed on the telephone system to either prevent failure or to restore the system to operation after a failure has occurred.
TELEPHONE SYS MOVE/UPGRADE/ADD	TSMU	This activity covers the resource costs associated with physically moving, adding, or upgrading telephone system equipment.
Trns Sched - Procedure Devlpmn	TSPD	Activities associated with the development of procedures for the transmission scheduling system.
TRANSMISSION PLANNING	TSPL	This action serves to consolidate costs associated with the Transmission Planning process.
TRANSMISSION SERV REV-LOSSES	TSRL	Capacity and energy losses occur when a Transmission Provider delivers electricity across its transmission facilities for a Transmission Customer. This is a charge when the Transmission Customer agrees to have the Transmission Provider supply the capacity
Trns Sched - Retail Network	TSRN	Activities associated with developing and administering retail access to the transmission system.
SUBSTATION TELEPHONE SERVICES	TSSB	This activity covers the processing and payment of bills for Substations as well as ordering new service and issuing removals/additions to existing service.
Trns Sched - Scheduling	TSSD	Activities associated with scheduling transmission service by the ESO.
TELEPHONE SYSTM SOFTWARE MAINT	TSSM	Work performed on the software associated with the telephone system to either prevent failure or to restore the system to operation after a failure has occurred.
Trns Sched - Sched System	TSSS	Activities associated with the operation of the transmission scheduling system.
SWITCHED TELEPHONE SERVICES	TSST	This activity covers the processing and payment of bills on Direct In Dials, Out Dials, Central Office Lines, and Incoming trunks as well as ordering new service and issuing removals/additions to existing service.
SCHEDULING	TSTG	Activities associated with the electronic tagging.
Trns Sched - Verify/Billing	TSVB	Activities associated with the verification and billing of scheduled transmission service.
TRANSFORMER HANDLING	TTHA	Activities associated with storeroom receiving, inspecting, storing and redelivery of electric transformers.
TAX PAYMENTS	TXPY	Accrual and/or payment of Federal, State or local taxes for all Ameren entities.
TAX WORK	TXWK	Activities associated with the preparation and filing of federal, state, and local tax returns and the related payment of taxes for all Ameren entities; activities associated with tax accounting and reporting activities; activities associated with federal
CTG MAJOR MAINTENANCE	UCTG	Expenses associated with major maintenance, inspection and overhaul activities that normally recur at time intervals longer than one year.
IND REL-DATA REQUESTS &SURVEYS	UDRS	This activity captures the resource costs associated with responding to external agency data requests and conducting bargaining unit employee surveys.
6D UNCOLLECTIBLE ADJ 08-ELECTRIC DS	UED8	No definition supplied.
6E UNCOLLECTIBLE ADJ 08-ELECTRIC SUPPL	UES8	No definition supplied.
6F UNCOLLECTIBLE ADJ 08-GAS DS	UGD8	No definition supplied.
6G UNCOLLECTIBLE ADJ 08-GAS PGA	UGP8	No definition supplied.

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
6H UNCOLLECTIBLE ADJ-ELECTRIC DS	UNED	No definition supplied.
6I UNCOLLECTIBLE ADJ-ELECTRIC SUPPLY	UNES	No definition supplied.
6J UNCOLLECTIBLE ADJ-GAS DS	UNGD	No definition supplied.
6K UNCOLLECTIBLE ADJ-GAS PGA	UNGP	No definition supplied.
INDUSTRIAL RELATIONS COUNSELNG	UIRC	This activity includes advising and counseling line management functions in the meaning and interpretation of the various labor agreements, past practices, side agreements, arbitration cases, grievance implications, dealing with problems, disciplinary act
LABOR CONTRACT NEGOTIATION	ULCN	This activity captures all tasks associated with the administration, development, review, investigation, filing, and legal counsel fees related to Company labor contract negotiation issues.
UNCOLLECTIBLE ADJ	UNCA	The uncollectible adjustment amount will be based on the utility's uncollectible experience for the utility-supplied electric power and energy. The Uncollectible Adjustment to the Competitive Procurement Auction resulting Retail Supply Charge will only apply to retail customers taking electric power and energy from the utility.
GRIEVANCE ADMIN	URGA	Activities related to labor relations involving dispute resolution and grievance administration.
LABOR ARBITRATION	URLA	This activity captures all tasks associated with the administration, development, review, investigation, filing, and legal counsel fees related to Company labor arbitration issues.
UTILITY SHOP LOADING	USHP	This activity captures all costs associated with the utility shop loading.
VIDEO CONFERENCING ENG SUPPORT	VCES	This activity involves evaluation of video conferencing options, telecom systems design, definition of technical specifications, and daily support of videoconferencing system operations.
VIDEO CONFERENCING MAINT	VCMC	This activity covers the maintenance of videoconferencing systems.
VIDEOCONFERNC MOVE/UPGRADE/ADD	VCMU	This activity covers the resource costs associated with physically moving, adding, or upgrading video conferencing equipment.
CONTRACTED CTG O & M INCENTIVE	VCTG	Performance based incentive compensation for O & M services for Combustion Turbine Generators.
WAREHOUSING	WHSE	All activities relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction,
WAREHOUSING DORSETT	W001	All activities at the Dorsett Warehouse relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reductio
WAREHOUSING CALLAWAY	W003	All activities at the Callaway Plant relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction,
WAREHOUSING UNDERGROUND	W004	All activities at the Underground Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging redu
WAREHOUSING MAJ STORM MATLS	W005	All activities at the Dorsett - Major Storm Materials & Tools Facility relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
WAREHOUSING MERAMEC	W008	All activities at the Meramec Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reductio
WAREHOUSING SIOUX	W009	All activities at the Sioux Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction,
WAREHOUSING LABADIE	W010	All activities at the Labadie Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reductio
WAREHOUSING RUSH ISLAND	W011	All activities at the Rush Island Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging redu
WAREHOUSING ELLISVILLE HQ	W012	All activities at the Ellisville District Headquarters relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, pa
WAREHOUSING RAY HQ	W018	All activities at the Ray Headquarters relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction
WAREHOUSING MACKENZIE HQ	W020	All activities at the Mackenzie District Headquarters relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, pack
WAREHOUSING GOB	W021	All activities at the General Office Building Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, pa
WAREHOUSING BERKELEY HQ	W022	All activities at the Berkley District Headquarters relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packag
WAREHOUSING DORSETT HQ	W025	All activities at the Dorsett District Headquarters relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packag
WAREHOUSING GERALDINE HQ	W026	All activities at the Geraldine District Headquarters relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, pack
WAREHOUSING WATSON	W027	All activities at the Watson Overhead Center relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging red
WAREHOUSING FRANKLIN HQ	W032	All activities at the Franklin District Headquarters relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packa
WAREHOUSING ST CHARLES HQ	W034	All activities at the St Charles District Headquarters relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, pac
WAREHOUSING FESTUS	W036	All activities at the Festus Plant relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction, is

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
WAREHOUSING JEFFERSON HQ	W038	All activities at the Jefferson District Headquarters relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, pack
WAREHOUSING RIVERMINES	W042	All activities at the Rivermines Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduc
WAREHOUSING DORSETT SHOP	W045	All activities at the Dorsett Shop Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging red
WAREHOUSING OSAGE	W046	All activities at the Osage Plant relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction, iss
WAREHOUSING LAKESIDE	W050	All activities at the Lakeside Plant relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction,
WAREHOUSING VENICE	W051	All activities at the Venice Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction
WAREHOUSING E ST. LOUIS	W054	All activities at the East St. Louis Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging r
WAREHOUSING ST CHARLES POLES	W055	All activities at the St. Charles (Poles) Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packag
WAREHOUSING HAYTI	W057	All activities at the Hayti Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction,
WAREHOUSING POTOSI	W058	All activities at the Potosi Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction
WAREHOUSING ALTON	W061	All activities at the Alton Plant relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction, iss
WAREHOUSING CAPE GIRARDEAU	W062	All activities at the Cape Girardeau Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging r
WAREHOUSING CHARLESTON	W063	All activities at the Charleston Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduc
WAREHOUSING DEXTER	W064	All activities at the Dexter Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reduction
WAREHOUSING COLUMBIA	W065	All activities at the Columbia Storeroom relating to the on-site receipt, inspection and reservation, storage and distribution of materials prior to use. Includes receipt/dispatch of materials, warehouse operation, handling and storage, packaging reducti

MIN MTC-All Accessory RPV Eq	W9R9	All activities associated with planning, scheduling and performing maintenance work by a process similar to INPO AP-901. This scope is an abbreviated alternative to the normal planning, scheduling and conduct of work described by INPO AP-915. for ACCESSO
MIN MTC-All Nuclear I&C Syst	W9S9	All activities associated with planning, scheduling and performing maintenance work by a process similar to INPO AP-901. This scope is an abbreviated alternative to the normal planning, scheduling and conduct of work described by INPO AP-915. for NUCLEAR
MIN MTC-All Gen'l Stn Supp	W9SS	All activities associated with planning, scheduling and performing maintenance work by a process similar to INPO AP-901. This scope is an abbreviated alternative to the normal planning, scheduling and conduct of work described by INPO AP-915. for STATION
MIN MTC-All Misc Bldgs & Grds	W9U9	All activities associated with planning, scheduling and performing maintenance work by a process similar to INPO AP-901. This scope is an abbreviated alternative to the normal planning, scheduling and conduct of work described by INPO AP-915. for STRUCTU
ADMINISTRATIVE SUPPORT & OTHER FOR STN SUPPORT	WADM	This is a general activity associated with clerical or other personnel performing general administrative tasks and clerical work when it is not feasible to charge to a more specific activity for STN Support.
MGMT & SUPERVISION FOR STN SUPPORT	WADS	This is a general activity associated with supervisory personnel performing general oversight and coordination of employees when it is not feasible to charge time to a single more specific activity for STN support.
SPV ADMIN DTY for STN SUPPORT	WASS	Need Definition for STATION SUPPORT
BETTERMENT ENGR	WBTR	All activities performed by the Betterment Engineering group of PPM&E including such items as CEM testing & reporting; Pagasus and smart sootblowing; heat rate improvement; turbine testing and mill changeout and boiler studies.
CLAIMS - MEDICAL	WCCM	Activities that capture the resource costs associated with investigation and evaluation of the medical cost of work related injuries.
CLAIMS-LITIGATION	WCLI	Activities associated with investigation, evaluation, defense, and settlement of employee injuries against the Company.
WIRELESS DATA SERVICES	WDDS	Activities associated with the payment and provisioning of wireless data services
WIRELESS DATA ENGINEER SUPPORT	WDES	This activity involves evaluation of wireless data options, wireless data systems design, definition of technical specifications, and daily support of wireless data system operations.
WIRELESS DATA MAINT	WDMC	Work performed on the wireless data system to either prevent failure or to restore the system to operation after a failure has occurred.
WIRELESS DATA MOVE/UPGRADE/ADD	WDMU	This activity covers the resource costs associated with physically moving, adding, or upgrading wireless data equipment.
WIRELESS DATA SOFTWARE MAINT	WDSM	Work performed on the software associated with the wireless data system to either prevent failure or to restore the system to operation after a failure has occurred.
ENG & DSGN for STN SUPPORT	WESS	All activities directly associated with establishing, maintaining and analyzing information in support of maintenance tasks, plant operations, component and system performance, monitoring and testing of equipment, and the evaluation and procurement of mat

<u>Activity Name</u>	<u>Code</u>	<u>Definition</u>
TRAVEL FOR STN SUPPORT	WETR	All travel related activities associated with traveling in support of work at the various company sites.
FLUE GAS DESULFURIZATION	WFGD	This activity will collect charges related to flue gas desulfurization.
GYP SUM STACKOUT	WGPS	This activity will collect charges related to gypsum stackout.
WORKFORCE PLANNING	WKPL	Analysis of staffing levels to identify current or future staffing gaps with the business lines and the development of a mitigation plan.
LT MTCE PLAN for STN SPRT-GEN	WLSS	All aspects of developing a long term maintenance plan to ensure the optimum performance of plant structures, systems, and components. This includes all tasks associated with the implementation of the maintenance rule, the administration of preventive (
MGMT SUPV MNT for STN SPRT-GEN	WMSS	Activities associated with supervisory personnel performing general maintenance oversight and coordination of employees when it is not feasible to charge time to a single more specific activity. for STATION SUPPORT
MAJ OUT PLN for STN SUPPORT	WOSS	All activities associated with the performance of work order planning for major outages. Includes the detailed planning required to maintain all structures, systems and components in optimum condition. This action includes any formal evaluations required
PLANNING for STN SUPPORT	WPSS	All activities associated with the performance of work order planning for other than major outages. Includes the detailed planning required to maintain all structures, systems and components in optimum condition. This action includes any formal evaluatio
REAGENT PREP SYSTEM	WRPS	This activity will collect charges related to reagent prep system.
SELECTIVE CATALYTIC REDUCTION SYS	WSCR	This activity will collect charges related to the selective catalytic reduction system components.
SCHEDULING for STN SUPPORT-GEN	WSSS	All activities associated with the performance of scheduling. Includes the scheduling of outages, corrective, preventive, plant improvement maintenance, and surveillance and performance testing. This action also includes the scheduling of all related s
TRAINING - ATTEND FOR STN SUPPORT	WTRN	Activities associated with taking/attending training courses or seminars which are required to satisfy the training requirements of that individual employee's position description or job class or are at the discretion of management for STN support.
XFRMER/MTR PURCH - METER PURCH	XPMP	Invoice cost of gas and electric meters. This includes the invoice cost of current and potential transformers associated with electric meters.
XFMER/MTR PURCH - XFMER PURCH	XPTP	Invoice cost of line and network transformers.
