

ICC Docket No. 11-0281
The Peoples Gas Light and Coke Company's Response to
Interstate Gas Supply Data Requests IGS 4.01-4.03
Dated: August 2, 2011

REQUEST NO. IGS 4.01:

If an unaffiliated company selling warranty products (*i.e.* products that compete with Peoples Home Energy Services' Peoples Energy Protection Program) requested to have the Companies bill customers for a warranty product on the utility bill, on what terms would the Companies provide that service? If the Companies would not provide that service on any terms, please fully describe in detail the basis for the Companies' position.

RESPONSE:

Peoples Gas has not provided such a service to unaffiliated companies due to concerns related to 1) cost recovery mechanisms, 2) systems programming, 3) credit and collection procedures, and 4) standards for accepting third party billing of services.

Retail Gas Suppliers participating in the Company's Choices For You program and utilizing the LDC Billing Option may have line item charges (which could include warranty charges) presented on the utility's bill (per Rider AGG), for customers for whom the Supplier is providing gas supply services under that rider.
