Responses to Staff's Data Request JZ 6.01 to JZ 6.07

CONFIDENTIAL RESPONSE
JZ 6.01, JZ 6.02 and JZ 6.03

February 6, 2012

- B. The wholesale network must be designed for an unbundled voice-grade loop capability to interconnect with the CLEC's collocation facilities at the central office. This capability is captured in the ECM and referred to as "double-ended" DLC. In CenturyLink's retail model network design, the customer loops can be integrated and directly terminated on the trunk side of the switch. This configuration is referred to as "single-ended" DLC in the ECM. The cost of both the single-ended and the double-ended loops are included in the model files entitled "Part 25.xls" or "25: Electronics Pt 2 and DLC," worksheet entitled "K_Output," columns.
- C. As explained in B. above, they are used for two different purposes and represent a different network capability. Each loop leased to a CLEC must have the double-ended DLC capability.
- D. See B. above.

Respondent: Christy Londerholm
Director, Regulatory Operations
(913) 345-7694

Party: Staff

Request No.: JZ 6.04:

JZ 6.04 In her Rebuttal Testimony at pages 15 and 16, Ms. Londerholm states "[t]he FCC has defined the services that a 2-wire UNE loop must be able to perform (i.e., functionality) and, therefore, the costs to be included for this element. The definition includes service for a copper only loop and a copper/fiber hybrid loop. The copper loop must be free of all encumbrances to allow the CLEC to provision broadband (that is, a broadband capable loop) but should not be a broadband provisioned loop." Please identify the sources of any and all FCC definitions identified by Ms. Londerholm in this passage.

Response:

Report and Order and Order on Remand and Further Notice of Proposed Rulemaking, *In the Matter of Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers, Implementation of the Local Competition Provisions of the Telecommunications Act of 1996, and Deployment of Wireline Services Offering Advanced Telecommunications Capability*, CC Docket Nos. 01-338, 96-98, and 98-147, 18 FCC Rcd 16978, ¶7 (Rel. August 21, 2003):

Unbundling Requirements for Individual Network Elements

• **Mass Market Loops.** Incumbent LECs must offer unbundled access to stand-alone copper loops and subloops for the provision of narrowband and broadband services. Subject to a grandfather provision and a transition period, incumbent LECs do not have to provide unbundled access to the high frequency portion of their loops. Incumbent LECs must offer unbundled access to the Time Division Multiplexing (TDM) features, functions, and capabilities of their hybrid copper/fiber loops. Similarly, only in fiber loop overbuild situations where the incumbent LEC elects to retire existing copper loops must the incumbent LEC offer unbundled access to those fiber loops for narrowband service only. Incumbent LECs do not have to offer unbundled access to newly deployed or "greenfield" fiber loops or to the packet-switching features, functions, and capabilities of their hybrid loops.

Same document at paragraph 200:

200. In addition, we find that different policy considerations, as well as different technical considerations, are associated with copper loops, hybrid copper/fiber loops, and FTTH loops. For

Confidential

example, we decline to require incumbent LECs to provide unbundled access to their hybrid loops for the provision of broadband services.⁶²⁷ Similarly, we decline to unbundle loops that consist of FTTH facilities for broadband services. As explained more fully below, this unbundling approach – *i.e.*, greater unbundling for legacy copper facilities and more limited unbundling for next-generation network facilities – appropriately balances our goals of promoting facilities-based investment and innovation against our goal of stimulating competition in the market for local telecommunications services.

Footnote 627. Incumbent LECs must continue to provide unbundled access to the TDM features, functions, and capabilities of their hybrid loops. This will allow competitive LECs to continue providing both traditional narrowband services (*e.g.*, voice, fax, dial-up Internet access) and high-capacity services like DS1 and DS3 circuits.

Respondent: Christy Londerholm
Director, Regulatory Operations
(913) 345-7694

Party: Staff

Request No.: JZ 6.05:

JZ 6.05 In her Rebuttal Testimony at pages 15 and 16, Ms. Londerholm states "[t]he FCC has defined the services that a 2-wire UNE loop must be able to perform (i.e., functionality) and, therefore, the costs to be included for this element. The definition includes service for a copper only loop and a copper/fiber hybrid loop. ... The copper/fiber hybrid loop requires TDM functionality ..." Please identify the sources of any and all FCC definitions identified by Ms. Londerholm in this passage.

Response:

Refer to the response found in JZ 6.05. Specifically the Executive Summary paragraph on Mass Market loops and footnote 627 pertain to the TDM functionality requirement.

Respondent: Christy Londerholm
Director, Regulatory Operations
(913) 345-7694

Party: Staff

Request No.: JZ 6.06:

JZ 6.06 In his Rebuttal Testimony at page 5, Mr. Miller states "CenturyLink's TELRIC cost model and cost input criteria have been used to provide rates in hundreds of negotiated and arbitrated interconnection agreements."

- A. Please identify and provide a copy of any arbitration decision in any state where CenturyLink's TELRIC cost model was used to establish a 2 wire UNE loop rate.
- B. Please provide a list by state and UNE zone of all 2 wire UNE loop rates established in an arbitration based upon CenturyLink's TELRIC cost model.
- C. Please provide a list by state, UNE zone, and interconnecting carrier of all 2 wire UNE loop rates established based upon CenturyLink's TELRIC cost model that were include in negotiated interconnection agreements between CenturyLink or any of its incumbent local exchange carrier affiliates and any interconnecting carrier.

Response:

CenturyLink does not maintain records and reports that provide the information as specified in this Request. Nevertheless, CenturyLink is compiling what information it does maintain that would be responsive in part to this Request and will be providing such within the next few business days.

Respondent: Guy Miller
Wholesale Staff Director
(318) 330-6148

Thomas M. Dethlefs

Counsel for Gallatin River Communications
L.L.C. d/b/a CenturyLink

Party: Staff

Request No.: JZ 6.06:

- JZ 6.06 In his Rebuttal Testimony at page 5, Mr. Miller states "CenturyLink's TELRIC cost model and cost input criteria have been used to provide rates in hundreds of negotiated and arbitrated interconnection agreements."
- A. Please identify and provide a copy of any arbitration decision in any state where CenturyLink's TELRIC cost model was used to establish a 2 wire UNE loop rate.
 - B. Please provide a list by state and UNE zone of all 2 wire UNE loop rates established in an arbitration based upon CenturyLink's TELRIC cost model.
 - C. Please provide a list by state, UNE zone, and interconnecting carrier of all 2 wire UNE loop rates established based upon CenturyLink's TELRIC cost model that were included in negotiated interconnection agreements between CenturyLink or any of its incumbent local exchange carrier affiliates and any interconnecting carrier.

Response:

CenturyLink does not maintain records and reports that provide the information as specified in this Request. Nevertheless, CenturyLink is compiling what information it does maintain that would be responsive in part to this Request and will be providing such within the next few business days.

Supplemental Response:

CenturyLink does not maintain records and reports that provide the information as specified in this Request. Nevertheless, CenturyLink provides the following information in its possession which is responsive in part to this Request.

- A. Current interconnection agreements in CenturyLink's legacy CenturyTel and Embarq territories include UNE price lists with all prices based upon CenturyLink's TELRIC cost model. CLEC agreement arbitrations for UNE prices were held in Texas (PUC Docket 32453) and Ohio (Case No. 08-45-TP-ARB). CenturyLink does not retain copies of these decisions.

B. 2 wire UNE loop rates established by an arbitration of CenturyLink's TELRIC cost model in Texas and Ohio are as follows:

Texas (United Telephone)	Band 1	\$39.82
	Band 2	\$67.11
	Band 3	\$166.49
Texas (Central Telephone)	Band 1	\$20.58
	Band 2	\$41.46
	Band 3	\$85.68
Ohio	Band 1	\$21.28
	Band 2	\$22.21
	Band 3	\$35.19
	Band 4	\$44.01
	Band 5	\$86.48

In some states that contain territories of CenturyLink's Embarq and Qwest affiliates, that state reviewed the TELRIC cost model for UNEs and pre-approved the final rates to be used in all subsequent agreements. In such states where the CenturyLink exchanges more approximate those of Illinois (smaller cities and rural, no major metropolitan areas), the TELRIC 2 wire UNE loop rates include:

Montana	Zone 1	\$23.90
	Zone 2	\$27.13
	Zone 3	\$29.29
Nebraska ¹	Zone 1	\$37.04
	Zone 2	\$95.32
	Zone 1	\$210.90
NC (Central Telephone)	Band 1	\$21.97
	Band 2	\$33.84
	Band 3	\$53.65
NC (CTT)	Band 1	\$21.14

¹ UNE rates set for exchanges other than Omaha and Lincoln.

	Band 2	\$36.98
	Band 3	\$56.05
Wyoming	Zone 1	\$31.70
	Zone 2	\$35.33
	Zone 3	\$40.45

- C. CenturyLink does not maintain a by state, UNE zone, and interconnecting carrier list of TELRIC cost model UNE loop rates that are included in negotiated interconnection agreements. Nor can CenturyLink produce such a list from its billing system because the rates are loaded individually by carrier upon the implementation of an approved agreement. As referenced in B above, many Embarq and Qwest affiliate agreements contain TELRIC UNE rates that were established by arbitration or state UNE proceedings. Most ICAs never reached arbitration as successful negotiations led to a final agreement. Newer CenturyTel affiliate agreements contain UNE rates that are established using the CenturyLink TELRIC model. The instant proceeding represents the first time a CLEC has arbitrated TELRIC-derived UNE loop rates for a CenturyTel affiliate. CenturyTel affiliates did have one interconnection agreement arbitration in Missouri that included UNE loop rates that were set by a non-TRILIC cost methodology. The 2 wire loop rate set by the Missouri arbitration that most closely approximates the Illinois Band One exchanges is \$29.05.²

CenturyLink maintains a master list of all CLEC agreements of all types that is sorted by state and carrier. To the best of CenturyLink's ability to manually sort from its master list in the time allowed for this response, attached to this filing is a listing of current agreements that contain UNE rates that are set using a TELRIC cost model.

Respondents: Guy Miller
Wholesale Staff Director
(318) 330-6148

Christy Londerholm
Director, Regulatory Operations
(913) 345-7694

² At the time of the Missouri arbitration, CenturyTel was a 47 USC 251 (f)(2) ILEC; deemed not subject to TELRIC. Missouri uses a differing banding method and nomenclature than most other states. The \$29.05 rate applies to "urban" exchanges other than the large and densely populated Columbia, Missouri and suburban St. Louis exchanges. (Columbia has greater than five times the population density of Pekin. CenturyLink's suburban St. Louis exchanges are in a population area twice that of Columbia.) The Columbia and suburban St. Louis loop rate is \$19.14.

STATE OF LOUISIANA)
)
PARISH OF OUACHITA)

VERIFICATION

Guy Miller, being first duly sworn, states that he is a Wholesale Staff Director for CenturyLink, that he has read the foregoing Supplemental Response to Staff's Data Request JZ 6.06, and that the same are true and correct to the best of his knowledge, information and belief.

Guy Miller
