Kathy, FYI. Aaron, I'll discuss this and Mitch's findings with you later today.

Here is what I know thus far on these:

294 170 F is on our Marion line. It was retrofit with all new wooden posts, crossbucks, reflective striping, Yield signs and DOT number stenciled on posts.

294 093 H is on our Herrin line. This crossing has an intersection within the crossing, hence it having stop signs. I do know there is a crossbuck missing at this crossing and am working to get a new one installed. Will get with City of Herrin on the intersection at this crossing. Was visited by Mitch Hibschman today and he brought this to my attention.

294 630 F is also on our Herrin line. To date, all it has had done is new Yield signs put up.

We have reflective striping on hand for the crossings in Herrin, but still need to replace the posts and signs.

Aside from the emergency notification signs and two signposts, Marion is about complete. Herrin is another story.
