RIDER PTR
PEAK TIME REBATE

Applicable to Rates BES, BESH, and RDS

AVAILABILITY.

This rider is available to any residential retail customer for which smart meter facilities, as defined in the Definitions section of this rider, are installed and in operation at such residential retail customer's premises.

PURPOSE.

The purpose of this rider is to implement and administer a program to provide credits to residential retail customers that curtail their use of electric power and energy during specific periods of time that are identified as peak usage periods in accordance with the provisions of Section 16-108.6(g) of the Public Utilities Act (Act).

DEFINITIONS.

Generally, definitions of terms used in this rider are provided in the Definitions part of the General Terms and Conditions of the Company's Schedule of Rates.

The following definitions are for use specifically in this rider:

Curtailment Period

Curtailment Period means a designated span of time during which temporary reductions in electric power and energy on the electric delivery system located in the Company's service territory are requested by the Company of residential retail customers served hereunder. No span of time prior to June 1, 2014, can be identified as part of a Curtailment Period.

Customer Baseline Load (CBL) Profile

CBL profile means the individual residential retail customer's hourly electric power and energy usage during a span of time that does not occur during a specific Curtailment Period, but that corresponds to such specific Curtailment Period. Such hourly electric power and energy usage is determined in accordance with a methodology approved by PJM Interconnection, L.L.C. (PJM). Such methodology must be filed by the Company in a petition with the Illinois Commerce Commission (ICC) no later than the February 1 and approved, or approved as modified, by the ICC no later than the April 1 prior to the beginning of the PJM Planning Year during which such methodology is first used.

PJM Demand Response Programs

PJM Demand Response Programs mean those electric market products offered by PJM under which the Company receives compensation in exchange for specified reductions in the electric demand and energy placed on the transmission system located in the Company's service territory.

DEFINITIONS (CONTINUED).

Smart Meter Facilities

Smart meter facilities mean the equipment identified as (a) smart meters in Section 16-108.5(b)(1)(B)(i) of the Act and (b) advanced meters deployed in accordance with the ICC Order in Docket No. 09-0263, entered October 14, 2009.

PREREQUISITES OF SERVICE.

The following prerequisites of service must be met before a residential retail customer commences service hereunder.

Smart meter facilities are provided by the Company at such residential retail customer's premises. Such smart meter facilities must be installed and in operation in accordance with Company procedures pertaining to such facilities before such residential retail customer is allowed to elect service hereunder.

Such residential retail customer must elect service hereunder by notifying the Company during the period beginning October 1 and extending through the following April 30 for service hereunder beginning with the first subsequent PJM Planning Year. Such notification may be made via the electronic enrollment process available on the Company's internet site or by other communication channels, including but not limited to telephone.

For residential retail customers that provide notification to the Company during the period beginning May 1 and extending through September 30 to elect service hereunder, the Company may, at its discretion, allow such residential retail customers to commence service hereunder at the start of the first subsequent PJM Planning Year beginning after such September 30.

Such residential retail customer must warrant that the reductions in electric power and energy made by such residential retail customer in accordance with the provisions of this rider are not also being made in accordance with the provisions of a PJM-coordinated electric (a) demand response program or (b) energy curtailment program offered by another entity.

RIDER PTR
PEAK TIME REBATE

(Continued from Sheet No. 352)

PEAK TIME REBATE.

The credit provided by the Company to a residential retail customer served hereunder for a Curtailment Period is equal to (a) the following Peak Time Rebate (PTR) multiplied by (b) the kWh differential between (i) the sum of the kWhs provided to such residential retail customer during such Curtailment Period and (ii) the sum of the kWhs associated with the hours in the Curtailment Period in such residential retail customer's CBL profile. Notwithstanding the previous provisions of this Peak Time Rebate section, in the event that (1) the sum of the kWhs associated with the hours in the Curtailment Period in such residential retail customer's CBL profile does not exceed (2) the sum of the kWhs provided to such residential retail customer during such Curtailment Period, then no credit is provided to such residential retail customer for such Curtailment Period.

PTR

\$1.00/kWh

Compensation received by the Company from PJM for its participation in applicable PJM Demand Response Programs, to the extent that it is not used or is not sufficient in any given year in the provision of credits to residential retail customers in accordance with the provisions of this Peak Time Rebate section, is accrued for use in providing such credits in subsequent years, as applicable. Correspondingly, to the extent that compensation received by the Company from PJM for its participation in applicable PJM Demand Response Programs is not used or is not sufficient in any given year for the provision of credits to residential retail customers in accordance with the provisions of this Peak Time Rebate section, the Company may increase or limit the number or duration of Curtailment Periods in subsequent years, as applicable. However, the Company must make all reasonable efforts to designate a number of Curtailment Periods in any given year that serves to minimize the absolute value of such accruals from such year to subsequent years.

The PTR is subject to revision after October 1, 2015, in order that the total amount of credits provided to residential retail customers served hereunder is funded by the compensation the Company obtains through applicable PJM Demand Response Programs.

Notwithstanding the previous provisions of this Peak Time Rebate section, in the event that during a Curtailment Period there is an interruption in the delivery of electricity to the residential retail customer's premises, the kWhs in such residential retail customer's CBL profile associated with the span of time over which such interruption occurs are set to zero.

The credit, if any, determined through the aforementioned application of the PTR is provided on one of the residential retail customer's next two monthly bills for electric service after such Curtailment Period.

All charges and associated provisions of the otherwise applicable tariff or tariffs apply to a residential retail customer served hereunder.

CURTAILMENT PERIOD NOTIFICATION.

In the event that a Curtailment Period is designated by the Company, the Company must issue a notification to each residential retail customer served hereunder of such designation at least one (1) hour prior to the start of such Curtailment Period. Such notification is issued through electronic mail, automated telephone message, text message, or other available and applicable communications protocol and must include the start time of such Curtailment Period and the duration of such Curtailment Period. The Company does not guarantee that a residential retail customer served hereunder receives such notification.

TERMINATION OF SERVICE.

A residential retail customer to which this rider is applicable may elect to terminate service hereunder at any time. Termination of service hereunder is effective on the Company's next normally scheduled meter reading or billing cycle date for such residential retail customer that occurs at least five (5) calendar days after the Company receives notification from such residential retail customer of such residential retail customer's election. Such notification may be made via the electronic termination process available on the Company's internet site or by other communication channels, including but not limited to telephone. The Company remains obligated to provide credits to such residential retail customer, if any, determined in accordance with the provisions of the Peak Time Rebate section of this rider within the timeframe described in such Peak Time Rebate section that are due and owing at the time of such termination.

The Company may terminate service hereunder to a residential retail customer in the event the Company determines that the reductions in electric power and energy made by such residential retail customer in accordance with the provisions of this rider are also being made in accordance with the provisions of an energy curtailment program offered by another entity. Such termination of service hereunder is effective as of the date of such determination.

MISCELLANEOUS GENERAL PROVISIONS.

The Company must submit a report to the ICC no later than September 1 each year, beginning in 2015, that provides an evaluation of the implementation, operation, and administration of the provisions of this rider during the previous PJM Planning Year. Such report must include information concerning (a) the number and types of residential retail customers served hereunder, (b) changes in such residential retail customers' electric energy use patterns, (c) the compensation received by the Company from PJM for its participation in applicable PJM Demand Response Programs, (d) the credits provided to residential retail customers taking service hereunder, (e) an assessment of the value of the availability of this rider, and (f) recommendations, if any, concerning modifications to this rider. The report submitted by the Company in 2018 must be accompanied by a petition that requests the ICC to initiate a proceeding to determine what, if any, net benefits to residential retail customers have been achieved through the operation of this rider, and as a result of such determination, to conclude if this rider should remain in effect with no modification, remain in effect with modification, or be terminated. The provisions of this rider are inoperative beginning June 1, 2022.

Notwithstanding any other provision in this rider, in the event Section 16-108.5 of the Act becomes inoperative or Rate DSPP - Delivery Service Pricing and Performance (Rate DSPP) terminates, the provisions of this rider immediately become inoperative, except to the extent necessary to apply any credits due and owing at the time of such termination. However, the provisions of this rider are not used for the purposes of back billing or bill adjustments or any purpose whatsoever after one hundred, eighty (180) calendar days following the date this rider terminates or becomes inoperative.

The Company's Schedule of Rates, of which this rider is a part, includes General Terms and Conditions and other tariffs. Service hereunder is subject to the General Terms and Conditions and such other tariffs, as applicable.
