Re: Approve the Rock Island Clean Line HVDC project

Honorable Chairman and Commissioners:

I am writing to express support for the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver cost effective clean energy to communities in Illinois and throughout the region that need it. The transmission line will blend the wind resources of northwest Iowa with those here in Illinois and create construction and manufacturing related jobs in Illinois and across the upper Midwest.

Clean Line Energy reports that their proposed total investment in Illinois will be over \$500 million. The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the state and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Sincerely,

A handwritten signature in black ink that reads "Senator Brad Burzynski".

The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Re: Approve the Rock Island Clean Line HVDC project

Honorable Chairman and Commissioners:

I am writing to express support for the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver cost effective clean energy to communities in Illinois and throughout the region that need it. The transmission line will blend the wind resources of northwest Iowa with those here in Illinois and create construction and manufacturing related jobs in Illinois and across the upper Midwest.

Clean Line Energy reports that their proposed total investment in Illinois will be over \$500 million. The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Re: Support for the Rock Island Clean Line HVDC project

Honorable Chairman Scott:

I am writing to pledge my support for the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver wind energy to Illinois and create wind-industry-related jobs in Illinois and across the upper Midwest.

Rock Island Clean Line is proposing to invest over \$500 million in Illinois for the construction of the line. Cleanline has said they intend to use local construction labor, contractors and suppliers as best as possible. This means more local workers will be put on the job and more money will be reinvested back into the community. This reinvestment into the community can help provide funds for our schools and city services. There are already a large number of qualified workers such as myself who are ready to work on this project once it is allowed to proceed.

As you may know, Clean Line is preparing an application to be submitted to the Illinois Commerce Commission. If they are granted approval Clean Line has already announced they will be purchasing the transmission wire from the Southwire production facility. This facility alone employs over 100 people in Illinois. This project has showed its intent to not only use a local manufacturing company but also local labors and contractors. Any project that uses the local workforce should be allowed to proceed.

Finally, this project is not only about the jobs that it will create but also the benefit that it can bring to the economy of Illinois. The Rock Island line will provide electricity to 1.4 million homes and will improve the competitive electrical market which will provide more benefits to Illinois consumers. I strongly encourage you to grant approval for this project.

Chairman Doug Scott,
Illinois Commerce Commission
527 East Capitol Avenue
Springfield, IL 62701

Honorable Chairman Scott:

I am writing to support the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver wind energy to Illinois and create jobs in Illinois and across the upper Midwest.

Clean Line proposes to invest more than \$500 million in Illinois in the construction of the line, and has announced its intent to maximize the use of local contractors and suppliers. This will support thousands of construction-related jobs in Illinois, ranging from concrete and gravel providers to hoteliers. Construction of the line could be very beneficial for my business.

Clean Line is preparing to submit an application to the Illinois Commerce Commission for the construction of the line. If approved, the project would also support thousands of manufacturing jobs in Illinois. Clean Line has, for example, indicated its intent to procure the transmission wire from the Southwire production facility that employs over 100 people in Illinois. Projects that support manufacturing jobs should be supported by the Commission.

Finally, this project will deliver enough additional renewable energy to meet the annual electric needs of 1.4 million homes and will enhance the competitive environment in the state's electric power markets, therefore providing meaningful benefits to Illinois consumers. Therefore, I encourage you to approve the Rock Island Clean Line applications.
