**Section 300.30 Negotiation of the Acquisition of Land or a Land Right-of-Way Easement**

This Section shall govern the actions of every person acting on behalf of a public utility when negotiating the acquisition of land or a land right-of-way easement:

- a) At least 14 days before the time when a utility initiates telephone or personal contact with the landowner to negotiate the acquisition of land or a land right-of-way easement, the utility representative shall send a letter to the landowner by certified mail, return receipt requested, containing the information set forth in subsection (c) together with the "Statement of Information from the Illinois Commerce Commission Concerning Acquisition of Land or Land Rights-of-Way by Illinois Utilities and Common Carriers by Pipeline" (see Appendix A).
- b) Utility representatives shall keep and maintain a permanent record of all letters sent in compliance with this Section.
- c) Any letter sent by the utility representative shall be on that representative's letterhead or on the letterhead of the utility, and it shall clearly set forth:
  - 1) The identity, address and telephone number of the utility representative;
  - 2) The identity of the utility attempting to acquire the land or land rights;
  - 3) The general purpose of the proposed project;
  - 4) The type of facility to be constructed;
  - 5) The general description of the land or land rights that the utility seeks to acquire and the type of structures, if any, the utility seeks to build;
  - 6) A statement that the utility or its representative seeks to negotiate with the landowner to arrive at a fair and reasonable agreement for the land or land rights; and

- 7) An invitation to the landowner to contact the utility representative to arrange a mutually agreeable time for an appointment to further discuss the matter.
- d) If the landowner does not contact the utility representative within two weeks after the mailing of the original letter, that representative shall contact the landowner to attempt to establish a mutually convenient time and date for a meeting to discuss the matter.
- e) Each utility representative shall carry, and show to every landowner contacted, an identification card with the name and address, the employer, and a recent picture of the utility representative. All contacting persons shall provide their telephone numbers to landowners.
- f) Upon the initial personal contact with the landowner, each utility representative shall be prepared to discuss, with specificity, the project for which the land or a land right-of-way is sought and shall more specifically inform and advise the landowner of the following:
  - 1) By oral statement concerning the reason for the contact, e.g., the general purpose of the proposed project and the type of facilities to be constructed.
  - 2) Provide technical information regarding the proposed project. This should include, among other things, to the extent that is then known to the utility, a written statement briefly outlining the purpose of the proposed project, a small-scale map of the proposed project and sketches indicating types of facilities, the approximate location of facilities, the compensation and basis for compensation and, if applicable, the type of structures, and amount (length and width) of the land or the land right-of-way deemed necessary for the proposed project. This information shall be furnished to the landowner for the landowner's review, along with any proposed agreement or contract proposed by the utility.

**SECTION 300.APPENDIX A STATEMENT OF INFORMATION FROM THE ILLINOIS COMMERCE COMMISSION CONCERNING ACQUISITION OF LAND OR LAND RIGHTS-OF-WAY BY ILLINOIS UTILITIES AND COMMON CARRIERS BY PIPELINE**

---

**Section 300.APPENDIX A Statement of Information from the Illinois Commerce Commission Concerning Acquisition of Land or Land Rights-of-Way by Illinois Utilities and Common Carriers by Pipeline**

A representative of a public utility or a common carrier by pipeline (collectively the company) is contacting you to negotiate the purchase of property or the acquisition of land or a land right-of-way over or through property that you own, or in which you have an interest as an owner. The company proposes to construct, operate and maintain certain facilities on your land, as set forth in the accompanying letter. The company representative contacting you will further explain the proposed project.

The purpose of this Statement is to provide you with general information regarding the Illinois Commerce Commission's (Commission's) regulatory process governing a company's proposed project, including the procedures that companies must follow before they can exercise the power of eminent domain to acquire land or land rights. Eminent domain is the power of the State, or those to whom the power is delegated by the State, to take private property for public use upon payment of just compensation to the landowner as is determined by the courts. This Statement covers several questions that landowners commonly pose to Commission staff members about proceedings at the Commission that relate to a company's proposed project when a company seeks to place facilities on or near those landowners' property. This Statement, however, is not a legal opinion concerning your rights under the law, or the Commission's rules. It also is not a detailed analysis of the procedures involved. If you have any questions concerning your legal rights, you may wish to consult an attorney.

Requests for a Commission Certificate under  
Section 8-406 or 15-401 of the Public Utilities Act

Ordinarily, before constructing major new facilities, a public utility must obtain a certificate of public convenience and necessity from the Commission under Section 8-406 of the Public Utilities Act [220 ILCS 5/8-406]. Likewise, a common carrier by pipeline ordinarily must obtain a certificate in good standing from the Commission under Section 15-401 of the Public Utilities Act [220 ILCS 5/15-401] before constructing a pipeline or other facility. In either case, to obtain a certificate, the

utility or common carrier files an application with the Commission describing the proposed project. The Commission then initiates a proceeding to consider evidence regarding the application and notifies affected landowners of the date, time and place of the initial hearing regarding the proposed project. If you have concerns about such a proposal, the Commission encourages you to participate in the Commission's certificate proceeding. Changes to a company's proposal are much less likely after the Commission has approved the proposal and issued the company a certificate. Landowners may participate in the proceeding, either through oral or written statements, or by intervening in the proceeding regarding the proposed project, as provided in the Commission's Rules of Practice (83 Ill. Adm. Code 200). In this type of proceeding, the Commission considers such factors as the public need for the proposed project, the type of facilities to be constructed, and the feasibility of the proposed location of the facilities. If the Commission determines that a company has met the requirements for obtaining a certificate and it approves the facility's design and location, it will grant a certificate to the company authorizing construction of the facility and the route that the facility will take across or through property not owned or controlled by the company.

#### Requests for a Commission Order Under Section 8-503 of the Public Utilities Act

A company may also seek a Commission Order under Section 8-503 [220 ILCS 5/8-503] authorizing or directing it to construct the proposed project, either in conjunction with its request to obtain a certificate under Section 8-406 or 15-401, or separately. If a company seeks an order pursuant to Section 8-503 in a separate proceeding, the Commission will notify affected landowners of the Section 8-503 proceeding, and affected landowners may participate in this type of proceeding in the same manner as is described above for applications for certificates under Section 8-406 or 15-401. If, at the conclusion of the proceeding, the Commission grants the company's request for an order pursuant to Section 8-503, it will issue an order authorizing the proposed project or directing the company to construct the proposed project, including the specific route of the facility.

#### Requests for Eminent Domain Authority Pursuant to Section 8-509 of the Public Utilities Act

A company seeking a Commission Order under Section 8-503 may also apply to the Commission for authorization under Section 8-509 [220 ILCS 5/8-509] to use the power of eminent domain through the courts pursuant to the Eminent Domain Act [735 ILCS 30] to acquire the land or land rights necessary for the project. The company may elect to seek Commission authorization pursuant to Section 8-509, either in conjunction with its request for a Commission Order under Section 8-503, or separately. If the Commission authorizes the use of eminent domain under Section 8-509, and if the company is unable to reach agreement with the landowners to acquire the property interests necessary to complete the proposed project, the company will file a condemnation lawsuit in the circuit court where the property is located in order to obtain the property interests that the project requires. The courts, not the Commission, make the final decision as to whether the company can acquire land or land rights by eminent domain and, if so, the compensation that the company will pay to the landowner.

#### Attempts by Companies to Acquire Property Rights

Before seeking a Commission Order authorizing or directing a company to construct a project, a company may choose to acquire land or land rights from landowners. A company may seek to purchase land or acquire a right for use of the land. Alternatively, a company may seek to obtain an option to purchase land or land rights at a future date. A company representative will provide affected landowners with information regarding the price and other terms that the company

intends to offer for the land or land rights. Such a company uses its own forms for this type of transaction. The Commission does not require a company seeking to acquire land or land rights to use any particular form.

The price and other terms for the land or land rights is a matter of negotiation. between each landowner and a company. The Commission does not participate in the negotiation The Commission also does not establish or approve the negotiated price and other terms for the acquisition of land or land rights. Negotiation involves discussion and bargaining in an effort to reach a mutual agreement. During the negotiations, and at any time, you may be represented by an attorney. However, you are under no obligation to retain anyone to provide legal counsel. Further, you are under no obligation to negotiate or reach an agreement with the company that is seeking to acquire land or land rights. The Commission does not require such a company to obtain by negotiation a fixed amount or percentage of land or land rights necessary for the project before it seeks Commission authorization to acquire land or land rights.

The Commission typically makes its final decision regarding a project's route in certificate proceedings. Once a company obtains a certificate, issues such as the specific route of the project are not typically reconsidered in subsequent Section 8-503 proceedings before the Commission. Once a company obtains a Commission Order pursuant to Section 8-503 for a project, issues such as the specific route of the project will not be reconsidered in subsequent Section 8-509 proceedings before the Commission and in subsequent condemnation proceedings before the courts. You should not delay in taking whatever action that you believe is, or may be, necessary to protect your property interests. If you elect to negotiate with a company, the Commission encourages you or your representative to negotiate vigorously.

**AGRICULTURAL IMPACT MITIGATION AGREEMENT**  
between the  
**AMEREN TRANSMISSION COMPANY OF ILLINOIS**  
and the  
**ILLINOIS DEPARTMENT OF AGRICULTURE**  
Pertaining to the Construction of the  
**Illinois Rivers 345 kV Electric Transmission Line**  
in Adams, Brown, Cass, Champaign, Christian, Clark, Coles, Edgar, Fulton, Macon,  
Montgomery, Morgan, Moultrie, Pike, Sangamon, Schuyler, Scott, and Shelby Counties  
in Illinois

For system improvements which Ameren Transmission Company of Illinois (hereafter referred to as Company) has financial and/or technical oversight, the Illinois Department of Agriculture (IDA) and the Company agree to the following standards and policies that the Company will implement as it constructs a 345 kV electric transmission line/distribution facilities on agricultural land in Illinois. These standards and policies will serve to minimize the negative agricultural impacts that may result due to transmission line construction.

The below prescribed construction standards and policies only apply to construction activities occurring partially or wholly on privately owned agricultural land. They do not apply to construction activities occurring on highway or railroad right-of-way or on other publicly owned land. The Company will, however, adhere to the construction standards relating to the repair of drainage tile (Item No. 5 in the Agreement) regardless of where drainage tile is encountered.

The mitigative actions specified in the construction standards set forth in this Agricultural Impact Mitigation Agreement (Agreement) will be implemented in accordance with the conditions listed below:

- A. All mitigative actions are subject to modification through negotiation by landowners and a representative of the Company, provided such changes are negotiated in advance of any construction, maintenance, or repairs.
- B. The Company may negotiate with landowners to carry out the mitigative actions that landowners wish to perform themselves.
- C. All mitigative actions employed by the Company pursuant to this Agreement, unless otherwise specified in this Agreement, will be implemented within 45 days of completion of the transmission line facilities on any affected property, weather and landowner permitting. Temporary repairs will be made by the Company during the construction process as needed to minimize the risk of additional property damage that may result from an extended construction time period. If weather delays the completion of any mitigative action beyond the 45 day period, the Company will provide the landowner(s) with a written estimate of the time needed for completion of the mitigative action.
- D. Mitigative actions pursuant to this Agreement will extend to associated future construction, maintenance, and repairs by the Company.
- E. The Company agrees to include this Agreement as part of its submissions to the ICC and hereby agrees to the inclusion of the terms contained in this Agreement in any environmental assessment and/or environmental impact statement that may be prepared on the project.

- F. The Company will implement the mitigative actions contained in this Agreement to the extent that they do not conflict with the requirements of any applicable federal, state, or local rules, regulations, or other permits and approvals that must be obtained by the Company for the project.
- G. If any provision of this Agreement is held to be unenforceable, no other provision shall be affected by that holding, and the remainder of the Agreement shall be interpreted as if it did not contain the unenforceable provision.

### Definitions

- Agricultural Land** – Land used for cropland, hayland, pastureland, managed woodlands, truck gardens, farmsteads, commercial ag-related facilities, feedlots, livestock confinement systems, land on which farm buildings are located, and land in government set-aside programs.
- Company** – Utility company proposing the construction of the electrical transmission line.
- Cropland** – Land used for growing row crops, small grains or hay; includes land which was formerly used as cropland, but is currently in a government set-aside program and pastureland comprised of prime farmland.
- Electric Line** – Includes electric transmission and distribution lines, substations, and their associated components.
- Landowner** – Person(s) holding legal title to property on the electric transmission line route from whom the Company is seeking, or has obtained, a temporary or permanent easement, or any person(s) legally authorized by a landowner to make decisions regarding the mitigation or restoration of agricultural impacts to such landowner(s) property.
- Prime Farmland** – Agricultural land comprised of soils that are defined by the USDA Natural Resources Conservation Service as being "Prime" soils (generally considered the most productive soils with the least input of nutrients and management).
- Right-of-Way** – Includes the permanent and temporary easements that the Company acquires for the purpose of constructing electric facilities.

## Electric Transmission Line Standards and Policies

### 1. Support Structures

- A. Only single pole support structures will be used.
- B. All support poles will be spaced in such a manner so as to minimize their placement on cropland.

### 2. Land to be Purchased via Fee Simple Acquisition

The Company does not intend to purchase and retain land in fee simple for the right of way corridor needed for the electric transmission line.

### 3. Above Ground Facilities

There will be no above ground facilities located on cropland other than the support structures, conductors, guy wires, and anchors. Access roads, if needed, will be located by agreement with landowners.

### 4. Drainage Tile

- A. If tiling is practiced in the area where a transmission line is to be constructed, the Company will send a letter to all landowners to request information as to whether support structure locations will interfere with any drainage tile.
- B. If the Company is advised of possible drainage tile interference with a support structure location, then the Company will conduct an engineering evaluation to determine if the support structure can be relocated to avoid interference with the tile. The Company will make its best efforts to relocate the support structure if the engineering integrity of the electric transmission line can be maintained.
- C. If the tile is intercepted and will be relocated per an agreement between the Company and the affected landowner, the tile shall be located not less than 50 feet upstream and 50 feet downstream of the interception. The tile shall be rerouted over that 100+ feet according to the recommendations of the *Illinois Drainage Guide*, Circular 1226, Cooperative Extension Service, College of Agricultural, Consumer and Environmental Sciences, University of Illinois at Urbana-Champaign, 1984. In no case shall the length of the rerouted tile exceed 125% of the length of original tile line that will be replaced.
- D. If the tile line is intercepted and repair is necessary, but no repair specifications are available from the county Soil and Water Conservation District, the Company shall reference the USDA Natural Resources Conservation Service Conservation Practice Standard document, "SUBSURFACE DRAIN" – CODE 606, to aid in the repair of the damaged tile.

### 5. Damages to Private Property

- A. The Company will make every reasonable effort to repair, replace, or pay to repair or replace damaged private property within 45 days, weather and landowner permitting, after the transmission line has been constructed across the effected property.
- B. If the landowner is paid for any work that is needed to correct damage to his/her property, the Company will pay the ongoing commercial rate for such work.

- C. The Company will remain liable to correct damages to private property beyond the construction of the transmission line, to associated future construction, maintenance, and repairs as well.

**6. Restoration of Soil for Compaction and Rutting**

- A. The Company, unless the landowner opts to do the restoration work, will chisel to a depth of 18 inches all cropland, which has been traversed by construction equipment to alleviate compaction impacts, unless the landowner specifies other arrangements that are acceptable to the Company.
- B. The Company will chisel to a depth of 12 inches all pasture and hayland that has been traversed by construction equipment to alleviate compaction impacts, unless the landowner specifies other arrangements that are acceptable to the Company.
- C. The Company will chisel or pay to have chiseled all compacted and rutted soil, weather and landowner permitting, after the transmission line has been constructed across any affected property.

**7. Fertilization of Disturbed Soils**

- A. If desired by the landowner, the Company will agree to apply fertilizer and lime to land disturbed by construction at a rate specified by the local University of Illinois Extension office to help restore the fertility of disturbed soils and enhance the establishment of a vegetative cover to control soil erosion.
- B. Unless other arrangements are made with the landowner, the Company will apply fertilizer and lime to the disturbed right-of-way within 45 days, weather and landowner permitting, after the transmission line has been constructed across an affected property.

**8. Repair of Damaged Soil Conservation Practices**

- A. The Company will repair or pay the landowner to repair any soil conservation practices (such as terraces, grassed waterways, etc.), which are damaged by the transmission line's construction.
- B. If the Company is responsible for repairing any damaged soil conservation practices, the repairs will be made in accordance with the specifications of the county Soil and Water Conservation Districts (unless the landowner and the Company agree to other repair specifications).
- C. The Company will repair or pay to have repaired damaged soil conservation practices within 45 days, weather and landowner permitting, of the transmission line's construction across any affected property.

**9. Removal of Construction Debris**

- A. The Company will remove from the landowner's property all material that was not there before construction commenced and which is not an integral part of the transmission line. (Note: Such material to be removed would also include litter generated by the construction crews.)
- B. The Company will make all reasonable efforts to ensure that all construction debris will be removed within 45 days, weather and landowner permitting, after the transmission line has been constructed.

**10. Preventing Erosion**

- A. The Company will work with landowners to prevent or correct excessive erosion on all lands disturbed by construction by implementing reasonable methods to control erosion as suggested by the landowner. Temporary erosion control measures will be put in place as needed during construction until final erosion control measures are implemented according to 10.C. listed below.
- B. If the landowner A) does not suggest a reasonable erosion control method, or B) does not suggest any method of erosion control, the Company will follow the recommendations of the county Soil and Water Conservation District.
- C. The Company will use all reasonable efforts to ensure that erosion control measures are implemented, or pay the landowner to do so, within 45 days, weather and landowner permitting, following the construction of the transmission line across any affected property subject to erosion.

**11. Soil Removed from Support Structures Holes/Foundations**

- A. Excess soil material will be generated from the area displaced by the foundation for the support structures. The Company will remove the excess soil material in tillable and pasture lands.

**12. Clearing of Trees and Brush from the Easement**

- A. If trees are to be removed from privately owned land, the Company will consult with the landowner to see if there are trees of commercial or other value to the landowner.
- B. If there are trees of commercial or other value to the landowner, the Company will allow the landowner the right to retain ownership of the trees with the disposition of the trees to be negotiated prior to the commencement of land clearing.
- C. The Company's intent is to windrow trees and brush of no value; however, it will follow the landowner's desires, if reasonable, regarding the disposition of trees and brush of no value to the landowner by windrowing, burial, chipping or complete removal from any affected property.

**13. Advance Notice of Access to Private Property**

- A. The Company will provide the landowner with a minimum of 24 hours prior notice before accessing his/her property for the purpose of constructing the transmission line.
- B. Prior notice shall consist of either personal contact, telephone contact, or written notice whereby the landowner is actually informed of the Company's intent to access the landowner's land. The landowner need not acknowledge receipt of the notice before the Company enters the landowner's property.

**14. Reporting of Inferior Agricultural Impact Mitigation Work**

Prior to the construction of the transmission line, the Company will provide the landowner with a number to call to alert the Company should the landowner observe inferior work relating to the agricultural impact mitigation work that performed on the owner's property.

**15. Indemnification**

The Company will indemnify all owners of agricultural land upon which such transmission line is installed, their heirs, successors, legal representatives, and assigns from and against all claims, injuries, suits, damages, costs, losses, and reasonable expenses resulting from or arising out of the construction, maintenance, removal, repair, use or existence of such transmission line, whether heretofore or hereafter installed, including damage to such transmission line or any of its appurtenances, to the extent such claims, injuries, suits, damages, costs, losses, and expenses are caused by the negligence or willful misconduct of the Company, its employees, agents or contractors.

**Concurrence of the Parties to this Agreement**

Ameren Transmission Company of Illinois and the Illinois Department of Agriculture concur that this agreement is the complete agreement governing the mitigation of agricultural impacts that may result from the construction of electric transmission lines by the Company. The Company and the Department further concur that reference to the Company's adherence to this agreement should be included in the opinions and findings of the Illinois Commerce Commission should the Commission issue any Certificate of Public Convenience and Necessity for transmission lines that may impact agricultural land.
