Subject: case 12-0598

I am writing in regards to case #12-0598 Ameren Transmission Company of Illinois. It is my understanding that they want to construct another power line just east of an existing power line and that it would necessitate them taking up more land to build it.

My concern is that it would cut into our back yard and I don't know how much land they want. At present, the back of our house is only about 45 feet from the present property line. If they want more than 45 feet, it would actually cut through part of our house. I don't know if they can take part of our house and leave the rest worthless in our lap or if they would have to take all of the property.

I'm very concerned that we will be left with no back yard or even just part of a house. I wish they would consider constructing on the west side of the existing power lines where there is open land.

Thank you very much for your attention. I appreciate any help you can provide.

Sincerely,
John C. Lyon
