

**ICC Docket 12-0560 Rock Island Exhibit 7.34**

**Part 8 of 18**

## I Support Rock Island Clean Line!

The Rock Island Clean Line is an important infrastructure project under development in Iowa and Illinois that will strengthen the region's economy by creating new jobs and delivering competitively priced clean energy. The United States has some of the best wind resources in the world, making it possible to obtain a sizable portion of our energy needs from a clean, domestic resource. Unfortunately, the transmission infrastructure does not exist to connect those resources to communities and cities that have a strong demand for renewable energy.

There are thousands of megawatts of projects that are stuck in interconnection queues and can't move forward due to a lack of transmission infrastructure. Clean Line Energy is developing the Rock Island Clean Line transmission project to address that problem. Spanning Iowa and Illinois, it will collect enough energy from new wind projects in northwest Iowa and the surrounding region to power 1.4 million homes in communities in Illinois and in states to the east.

The Rock Island Clean Line will unlock wind resources in northwest Iowa and the surrounding region, enabling \$7 billion of investment in new wind farms and supporting thousands of manufacturing jobs across Iowa, Illinois, and the Midwest. I support this project and the regulatory approvals required for the project to move forward.

Chairman Doug Scott  
c/o Executive Director  
Illinois Commerce Commission  
527 East Capitol Avenue  
Springfield, IL 62701

**Re: Approve the Rock Island Clean Line HVDC project**

Honorable Chairman and Commissioners:

I am writing to express support for the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver cost effective clean energy to communities in Illinois and throughout the region that need it. The transmission line will blend the wind resources of northwest Iowa with those here in Illinois and create construction and manufacturing related jobs in Illinois and across the upper Midwest.

Clean Line Energy reports that their proposed total investment in Illinois will be over \$500 million. The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Sincerely,

The Rock Island Clean Line is an important infrastructure project under development in Iowa and Illinois that will strengthen the region's economy by creating new jobs and delivering competitively priced clean energy. The United States has some of the best wind resources in the world, making it possible to obtain a sizable portion of our energy needs from a clean, domestic resource. Unfortunately, the transmission infrastructure does not exist to connect those resources to communities and cities that have a strong demand for renewable energy.

There are thousands of megawatts of projects that are stuck in interconnection queues and can't move forward due to a lack of transmission infrastructure. Clean Line Energy is developing the Rock Island Clean Line transmission project to address that problem. Spanning Iowa and Illinois, it will collect enough energy from new wind projects in northwest Iowa and the surrounding region to power 1.4 million homes in communities in Illinois and in states to the east.

The Rock Island Clean Line will unlock wind resources in northwest Iowa and the surrounding region, enabling \$7 billion of investment in new wind farms and supporting thousands of manufacturing jobs across Iowa, Illinois, and the Midwest. I support this project and the regulatory approvals required for the project to move forward.

**Re: Approve the Rock Island Clean Line HVDC project**

Honorable Chairman and Commissioners:

I am writing to express support for the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver cost effective clean energy to communities in Illinois and throughout the region that need it. The transmission line will blend the wind resources of northwest Iowa with those here in Illinois and create construction and manufacturing related jobs in Illinois and across the upper Midwest.

Clean Line Energy reports that their proposed total investment in Illinois will be over \$500 million. The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Sincerely,

↳ please read on back

The Honorable Pat Quinn  
Office of the Governor  
207 State House  
Springfield, IL 62706

Dear Governor Quinn,

The proposed Rock Island Clean Line and Grain Belt Express Clean Line, each of which will allow the development of about 4,000 megawatts of new wind energy in our region, will create construction and manufacturing related jobs in Illinois while also delivering cost effective, clean energy to our state, benefiting consumers. The projects will require the approval of the Illinois Commerce Commission, and I write in support of their regulatory approvals.

The Rock Island Clean Line and the Grain Belt Express Clean Line will spur economic growth in our region. Each of the two transmission line projects will enable the installation of \$7 billion worth of wind energy infrastructure investments that otherwise would not be built. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Illinois, creating and sustaining thousands of related jobs in Illinois and across the Midwest.

The Rock Island Clean Line and the Grain Belt Express Clean Line will each deliver enough clean, renewable and competitively priced energy to power around 1.4 million homes, benefiting our community by diversifying the energy resource mix and providing us with a competitive advantage as we seek to attract new businesses and industries. Additionally, the transmission line projects will generate millions in tax revenues for the State and local governments, contribute to energy security, and reduce pollution.

I support the Rock Island Clean Line and the Grain Belt Express Clean Line and encourage you to support them as well. The projects will help bring clean energy and clean energy jobs to Illinois.

The Rock Island Clean Line and the Grain Belt Express Clean Line will each deliver enough clean, renewable and competitively priced energy to power around 1.4 million homes, benefiting our community by diversifying the energy resource mix and providing us with a competitive advantage as we seek to attract new businesses and industries. Additionally, the transmission line projects will generate millions in tax revenues for the State and local governments, contribute to energy security, and reduce pollution.

I support the Rock Island Clean Line and the Grain Belt Express Clean Line and encourage you to support them as well. The projects will help bring clean energy and clean energy jobs to Illinois.

The Honorable Pat Quinn  
Office of the Governor  
207 State House  
Springfield, IL 62706

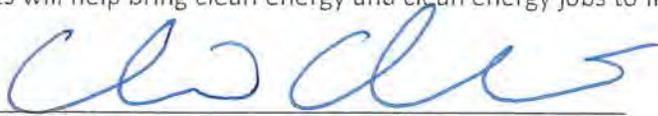

Dear Governor Quinn,

The proposed Rock Island Clean Line and Grain Belt Express Clean Line, each of which will allow the development of about 4,000 megawatts of new wind energy in our region, will create construction and manufacturing related jobs in Illinois while also delivering cost effective, clean energy to our state, benefiting consumers. The projects will require the approval of the Illinois Commerce Commission, and I write in support of their regulatory approvals.

The Rock Island Clean Line and the Grain Belt Express Clean Line will spur economic growth in our region. Each of the two transmission line projects will enable the installation of \$7 billion worth of wind energy infrastructure investments that otherwise would not be built. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Illinois, creating and sustaining thousands of related jobs in Illinois and across the Midwest.

The Rock Island Clean Line and the Grain Belt Express Clean Line will each deliver enough clean, renewable and competitively priced energy to power around 1.4 million homes, benefiting our community by diversifying the energy resource mix and providing us with a competitive advantage as we seek to attract new businesses and industries. Additionally, the transmission line projects will generate millions in tax revenues for the State and local governments, contribute to energy security, and reduce pollution.

I support the Rock Island Clean Line and the Grain Belt Express Clean Line and encourage you to support them as well. The projects will help bring clean energy and clean energy jobs to Illinois.

Springfield, IL 62701

**Re: Approve the Rock Island Clean Line HVDC project**

Honorable Chairman and Commissioners:

I am writing to express support for the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver cost effective clean energy to communities in Illinois and throughout the region that need it. The transmission line will blend the wind resources of northwest Iowa with those here in Illinois and create construction and manufacturing related jobs in Illinois and across the upper Midwest.

Clean Line Energy reports that their proposed total investment in Illinois will be over \$500 million. The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Sincerely,

The proposed Rock Island Clean Line and Grain Belt Express Clean Line, each of which will allow the development of about 4,000 megawatts of new wind energy in our region, will create construction and manufacturing related jobs in Illinois while also delivering cost effective, clean energy to our state, benefiting consumers. The projects will require the approval of the Illinois Commerce Commission, and I write in support of their regulatory approvals.

The Rock Island Clean Line and the Grain Belt Express Clean Line will spur economic growth in our region. Each of the two transmission line projects will enable the installation of \$7 billion worth of wind energy infrastructure investments that otherwise would not be built. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Illinois, creating and sustaining thousands of related jobs in Illinois and across the Midwest.

The Rock Island Clean Line and the Grain Belt Express Clean Line will each deliver enough clean, renewable and competitively priced energy to power around 1.4 million homes, benefiting our community by diversifying the energy resource mix and providing us with a competitive advantage as we seek to attract new businesses and industries. Additionally, the transmission line projects will generate millions in tax revenues for the State and local governments, contribute to energy security, and reduce pollution.

I support the Rock Island Clean Line and the Grain Belt Express Clean Line and encourage you to support them as well. The projects will help bring clean energy and clean energy jobs to Illinois.
