

ICC Docket 12-0560 Rock Island Exhibit 7.34

Part 12 of 18

The Honorable Pat Quinn
Office of the Governor
207 State House
Springfield, IL 62706

Dear Governor Quinn,

The proposed Rock Island Clean Line and Grain Belt Express Clean Line, each of which will allow the development of about 4,000 megawatts of new wind energy in our region, will create construction and manufacturing related jobs in Illinois while also delivering cost effective, clean energy to our state, benefiting consumers. The projects will require the approval of the Illinois Commerce Commission, and I write in support of their regulatory approvals.

The Rock Island Clean Line and the Grain Belt Express Clean Line will spur economic growth in our region. Each of the two transmission line projects will enable the installation of \$7 billion worth of wind energy infrastructure investments that otherwise would not be built. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Illinois, creating and sustaining thousands of related jobs in Illinois and across the Midwest.

The Rock Island Clean Line and the Grain Belt Express Clean Line will each deliver enough clean, renewable and competitively priced energy to power around 1.4 million homes, benefiting our community by diversifying the energy resource mix and providing us with a competitive advantage as we seek to attract new businesses and industries. Additionally, the transmission line projects will generate millions in tax revenues for the State and local governments, contribute to energy security, and reduce pollution.

I support the Rock Island Clean Line and the Grain Belt Express Clean Line and encourage you to support them as well. The projects will help bring clean energy and clean energy jobs to Illinois.

Re: Approve the Rock Island Clean Line HVDC project

Honorable Chairman and Commissioners:

I am writing to express support for the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver cost effective clean energy to communities in Illinois and throughout the region that need it. The transmission line will blend the wind resources of northwest Iowa with those here in Illinois and create construction and manufacturing related jobs in Illinois and across the upper Midwest.

Clean Line Energy reports that their proposed total investment in Illinois will be over \$500 million. The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Clean Line Energy reports that their proposed total investment in Illinois will be over \$500 million. The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Re: Approve the Rock Island Clean Line HVDC project

Honorable Chairman and Commissioners:

I am writing to express support for the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver cost effective clean energy to communities in Illinois and throughout the region that need it. The transmission line will blend the wind resources of northwest Iowa with those here in Illinois and create construction and manufacturing related jobs in Illinois and across the upper Midwest.

Clean Line Energy reports that their proposed total investment in Illinois will be over \$500 million. The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

The Honorable Pat Quinn
Office of the Governor
207 State House
Springfield, IL 62706

Dear Governor Quinn,

The proposed Rock Island Clean Line and Grain Belt Express Clean Line, each of which will allow the development of about 4,000 megawatts of new wind energy in our region, will create construction and manufacturing related jobs in Illinois while also delivering cost effective, clean energy to our state, benefiting consumers. The projects will require the approval of the Illinois Commerce Commission, and I write in support of their regulatory approvals.

The Rock Island Clean Line and the Grain Belt Express Clean Line will spur economic growth in our region. Each of the two transmission line projects will enable the installation of \$7 billion worth of wind energy infrastructure investments that otherwise would not be built. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Illinois, creating and sustaining thousands of related jobs in Illinois and across the Midwest.

The Rock Island Clean Line and the Grain Belt Express Clean Line will each deliver enough clean, renewable and competitively priced energy to power around 1.4 million homes, benefiting our community by diversifying the energy resource mix and providing us with a competitive advantage as we seek to attract new businesses and industries. Additionally, the transmission line projects will generate millions in tax revenues for the State and local governments, contribute to energy security, and reduce pollution.

I support the Rock Island Clean Line and the Grain Belt Express Clean Line and encourage you to support them as well. The projects will help bring clean energy and clean energy jobs to Illinois.

The Honorable Pat Quinn
Office of the Governor
207 State House
Springfield, IL 62706

Dear Governor Quinn,

The proposed Rock Island Clean Line and Grain Belt Express Clean Line, each of which will allow the development of about 4,000 megawatts of new wind energy in our region, will create construction and manufacturing related jobs in Illinois while also delivering cost effective, clean energy to our state, benefiting consumers. The projects will require the approval of the Illinois Commerce Commission, and I write in support of their regulatory approvals.

The Rock Island Clean Line and the Grain Belt Express Clean Line will spur economic growth in our region. Each of the two transmission line projects will enable the installation of \$7 billion worth of wind energy infrastructure investments that otherwise would not be built. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Illinois, creating and sustaining thousands of related jobs in Illinois and across the Midwest.

The Rock Island Clean Line and the Grain Belt Express Clean Line will each deliver enough clean, renewable and competitively priced energy to power around 1.4 million homes, benefiting our community by diversifying the energy resource mix and providing us with a competitive advantage as we seek to attract new businesses and industries. Additionally, the transmission line projects will generate millions in tax revenues for the State and local governments, contribute to energy security, and reduce pollution.

I support the Rock Island Clean Line and the Grain Belt Express Clean Line and encourage you to support them as well. The projects will help bring clean energy and clean energy jobs to Illinois.
