

**ICC Docket 12-0560 Rock Island Exhibit 7.34**

**Part 13 of 18**

The Honorable Pat Quinn  
Office of the Governor  
207 State House  
Springfield, IL 62706

Dear Governor Quinn,

The proposed Rock Island Clean Line and Grain Belt Express Clean Line, each of which will allow the development of about 4,000 megawatts of new wind energy in our region, will create construction and manufacturing related jobs in Illinois while also delivering cost effective, clean energy to our state, benefiting consumers. The projects will require the approval of the Illinois Commerce Commission, and I write in support of their regulatory approvals.

The Rock Island Clean Line and the Grain Belt Express Clean Line will spur economic growth in our region. Each of the two transmission line projects will enable the installation of \$7 billion worth of wind energy infrastructure investments that otherwise would not be built. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Illinois, creating and sustaining thousands of related jobs in Illinois and across the Midwest.

The Rock Island Clean Line and the Grain Belt Express Clean Line will each deliver enough clean, renewable and competitively priced energy to power around 1.4 million homes, benefiting our community by diversifying the energy resource mix and providing us with a competitive advantage as we seek to attract new businesses and industries. Additionally, the transmission line projects will generate millions in tax revenues for the State and local governments, contribute to energy security, and reduce pollution.

I support the Rock Island Clean Line and the Grain Belt Express Clean Line and encourage you to support them as well. The projects will help bring clean energy and clean energy jobs to Illinois.

The Honorable Pat Quinn  
Office of the Governor  
207 State House  
Springfield, IL 62706

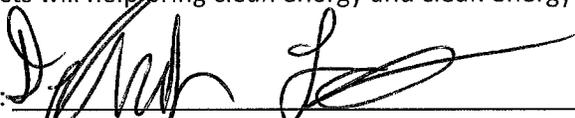

Dear Governor Quinn,

The proposed Rock Island Clean Line and Grain Belt Express Clean Line, each of which will allow the development of about 4,000 megawatts of new wind energy in our region, will create construction and manufacturing related jobs in Illinois while also delivering cost effective, clean energy to our state, benefiting consumers. The projects will require the approval of the Illinois Commerce Commission, and I write in support of their regulatory approvals.

The Rock Island Clean Line and the Grain Belt Express Clean Line will spur economic growth in our region. Each of the two transmission line projects will enable the installation of \$7 billion worth of wind energy infrastructure investments that otherwise would not be built. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Illinois, creating and sustaining thousands of related jobs in Illinois and across the Midwest.

The Rock Island Clean Line and the Grain Belt Express Clean Line will each deliver enough clean, renewable and competitively priced energy to power around 1.4 million homes, benefiting our community by diversifying the energy resource mix and providing us with a competitive advantage as we seek to attract new businesses and industries. Additionally, the transmission line projects will generate millions in tax revenues for the State and local governments, contribute to energy security, and reduce pollution.

I support the Rock Island Clean Line and the Grain Belt Express Clean Line and encourage you to support them as well. The projects will help bring clean energy and clean energy jobs to Illinois.

The Honorable Pat Quinn  
Office of the Governor  
207 State House  
Springfield, IL 62706

Dear Governor Quinn,

The proposed Rock Island Clean Line and Grain Belt Express Clean Line, each of which will allow the development of about 4,000 megawatts of new wind energy in our region, will create construction and manufacturing related jobs in Illinois while also delivering cost effective, clean energy to our state, benefiting consumers. The projects will require the approval of the Illinois Commerce Commission, and I write in support of their regulatory approvals.

The Rock Island Clean Line and the Grain Belt Express Clean Line will spur economic growth in our region. Each of the two transmission line projects will enable the installation of \$7 billion worth of wind energy infrastructure investments that otherwise would not be built. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Illinois, creating and sustaining thousands of related jobs in Illinois and across the Midwest.

The Rock Island Clean Line and the Grain Belt Express Clean Line will each deliver enough clean, renewable and competitively priced energy to power around 1.4 million homes, benefiting our community by diversifying the energy resource mix and providing us with a competitive advantage as we seek to attract new businesses and industries. Additionally, the transmission line projects will generate millions in tax revenues for the State and local governments, contribute to energy security, and reduce pollution.

I support the Rock Island Clean Line and the Grain Belt Express Clean Line and encourage you to support them as well. The projects will help bring clean energy and clean energy jobs to Illinois.
