

ICC Docket 12-0560 Rock Island Exhibit 7.34

Part 15 of 18

Date:

Chairman Doug Scott
c/o Executive Director
Illinois Commerce Commission
527 East Capitol Avenue
Springfield, IL 62701

Re: Approve the Rock Island Clean Line HVDC project

Honorable Chairman and Commissioners:

I am writing to express support for the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver cost effective clean energy to communities in Illinois and throughout the region that need it. The transmission line will blend the wind resources of northwest Iowa with those here in Illinois and create construction and manufacturing related jobs in Illinois and across the upper Midwest.

Clean Line Energy reports that their proposed total investment in Illinois will be over \$500 million. The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Sincerely,

Name: Alonso Carr

The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Sincerely,

I Support Rock Island Clean Line!

The Rock Island Clean Line is an important infrastructure project under development in Iowa and Illinois that will strengthen the region's economy by creating new jobs and delivering competitively priced clean energy. The United States has some of the best wind resources in the world, making it possible to obtain a sizable portion of our energy needs from a clean, domestic resource. Unfortunately, the transmission infrastructure does not exist to connect those resources to communities and cities that have a strong demand for renewable energy.

There are thousands of megawatts of projects that are stuck in interconnection queues and can't move forward due to a lack of transmission infrastructure. Clean Line Energy is developing the Rock Island Clean Line transmission project to address that problem. Spanning Iowa and Illinois, it will collect enough energy from new wind projects in northwest Iowa and the surrounding region to power 1.4 million homes in communities in Illinois and in states to the east.

The Rock Island Clean Line will unlock wind resources in northwest Iowa and the surrounding region, enabling \$7 billion of investment in new wind farms and supporting thousands of manufacturing jobs across Iowa, Illinois, and the Midwest. I support this project and the regulatory approvals required for the project to move forward.

Re: Approve the Rock Island Clean Line HVDC project

Honorable Chairman and Commissioners:

I am writing to express support for the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver cost effective clean energy to communities in Illinois and throughout the region that need it. The transmission line will blend the wind resources of northwest Iowa with those here in Illinois and create construction and manufacturing related jobs in Illinois and across the upper Midwest.

Clean Line Energy reports that their proposed total investment in Illinois will be over \$500 million. The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Honorable Chairman and Commissioners:

I am writing to express support for the Rock Island Clean Line, a 500-mile overhead transmission line that will deliver cost effective clean energy to communities in Illinois and throughout the region that need it. The transmission line will blend the wind resources of northwest Iowa with those here in Illinois and create construction and manufacturing related jobs in Illinois and across the upper Midwest.

Clean Line Energy reports that their proposed total investment in Illinois will be over \$500 million. The project will deliver enough clean energy to power around 1.4 million homes, generate millions in tax revenues for the State and local governments, reduce power prices for consumers, contribute to energy security, and reduce pollution. New transmission is vital to the continued growth of the wind industry and is a key lynchpin to supporting continued growth in construction jobs, manufacturing jobs, and all other wind-related job growth in Illinois.

I'm therefore pleased to encourage you to approve the Rock Island Clean Line applications.

Sincerely,

Name: Jared Hayden
