

PDM Ex. 8.12 – DR ATXI-ICC 3.11

Docket No. 12-0598 (Rehearing)
Response to ATXI's
Third Set of Data Requests to ICC Staff
November 25, 2013

ICC Person Responsible: Greg Rockrohr
Title: Senior Electrical Engineer, Safety & Reliability Division
Business Address: Illinois Commerce Commission
527 East Capitol Avenue
Springfield, IL 62701
Telephone: 217/524-0695

REQUEST ATXI-ICC 3.11:

Referring to Mr. Rockrohr's testimony at ICC Staff Ex. 2.0, lines 174-184, is the sole reason Staff prefers either of the two substation locations identified in its alternative route filing over the more northerly location ATXI identified in its petition, that Kansas is approximately 13 miles south of ATXI's proposed substation site? If not, identify and explain each other basis for the preference.

RESPONSE:

No. In addition, use of ATXI's proposed substation site is immediately across Sulphur Spring Road from an existing residence. Also, the route alternatives east of the Sulphur Spring Road site appear to pass near existing residences at the following locations:

- Primary Route: Henry Rd. s/Wheeler Rd.
- Alternate Route: Hopewell Rd. w/Sulphur Spring Rd.
- Alternate Route: McDonald Rd. s/Myers Rd.
