Sangamon, Schuyler, Scott and Shelby, Illinois. )

RESPONSES  
TO AMEREN TRANSMISSION COMPANY OF ILLINOIS'  
SEVENTH SET OF DATA REQUESTS TO THE  
MACON COUNTY PROPERTY OWNERS

RESPONSES

The following data requests were directed to Macon County Property Owners witness, Ms. Paula D. Cooley:

**ATXI-Macon 7.01:** Has Ms. Cooley measured the distance between the VOR and each of the following at its closest point to the VOR: 1) ATXI's proposed Primary Route from Mt. Zion to Kansas; 2) ATXI's proposed Alternate Route from Mt. Zion to Kansas; 3) ATXI's proposed Mt. Zion substation site; 4) Staff's Option 1; and 5) Staff Option 2? If yes, state the distance, in feet.

- a) If no, does Ms. Cooley have any reason to dispute that at its closest point, the VOR is located approximately 1580 feet from McDonald Road to the east, 3675 feet from Henry Road to the west, and over 1200 from the northern boundary of Section 22? If your response is anything other than an unqualified no, explain the basis for your response.

**OFFICIAL FILE**

I.L. C. C. DOCKET NO. 12-0598  
ATXI Cross Exhibit No. 1  
Witness Cooley  
Date 12/18/19 Reporter PN

**RESPONSE:** Ms. Cooley used her car odometer and line of sight approximately 3/4 mile away when making her public comment already in the record. The substation distances were not addressed in the public comment. Ms. Cooley could use section, 1/2 section lines and field landmarks along with triangulation to form this additional information. However, she feels that ATXI, Staff or the FAA are much better equipped to perform these measurements.

For the reason given above, Ms. Cooley has no reason to dispute the measurements listed herein.

**ATXI-Macon 7.02:** Does Ms. Cooley have any reason to dispute the VOR is located approximately 1560 feet from an existing overhead transmission line (located to the east along McDonald Rd.)? If your response is anything other than an unqualified no, explain the basis for your response.

**RESPONSE:** The VOR is located approximately 1560 feet from an existing overhead transmission line (located to the east along McDonald Rd). In addition to those lines, there are lines going west from McDonald Road along the VOR lane. They are also wooden poles and they appear to become shorter the closer they get until they finally go underground.
