P.S.

From what I see the ICC would better serve its citizens by addressing the question of why utility rates in January, 2014 have skyrocketed, despite total demand lower than in the summer of 2013. The intent of deregulation in Illinois to permit users to deal directly with energy suppliers in a competitive marketplace has been highjacked by speculators demanding excess profits from helpless users with no other options. The ICC could play a vital rulemaking role and advisor to the State Legislature, helping it realize its original intent.
