

ILLINOIS  
COMMERCE COMMISSION

FEB 10 2014

Office of Chairman  
And Commissioners

*Mr Scott*

As a Landowner on the proposed power line running from Meredosia to Pawnee case #12-0598 I live about ¼ mile from the proposed route and it will greatly impact my ability to get crops sprayed with chemicals by airplane. I have been made aware of the 18.3 mile shorter that would cost 36.78 million less than the southern route. Amerens argument is running parallel to the northern existing route could cause problems, but with part of the 36.78 million they could come up with some safe guards. There does not appear to be much opposition from the existing line landowners on having another line. I believe you should take a serious look at the route recommended by the commission staff. Thank you

*Sincerely  
Roger Padgett*
