Integrys Energy Group, Inc.

* Integrys Energy Group owned approximately 34% of American Transmission Company LLC at December 31, 2012.

Integritys Energy Group is a holding company headquartered in Chicago, Illinois. Subsidiaries provide products and services in both regulated and nonregulated energy markets. The following descriptions are reflective as of December 31, 2012.

Regulated Operations

The Peoples Gas Light and Coke Company

Business

- Established in 1855 (acquired by Integritys Energy Group in 2007).
- Regulated natural gas utility.
- Operates in Illinois (see map on the right).
- 1,183 employees.

Market

- Serves approximately 829,000 residential, commercial, and industrial retail sales and transportation customers in the city of Chicago.
- Natural gas revenues are comprised of 100% retail sales.

Facilities

- Approximately 4,520 miles of natural gas distribution and transmission main (approximately 33% is cast iron main and 29% is plastic main), 11 natural gas distribution and transmission gate stations, and approximately 514,000 natural gas lateral services.
- Owns and operates a 38.2 billion-cubic-foot underground natural gas storage reservoir (Manlove Field) and a 2 billion-cubic-foot liquefied natural gas plant in central Illinois.
- Owns a natural gas pipeline system that runs from Manlove Field (located in central Illinois) to Chicago with 8 major interstate pipeline interconnects.

Wisconsin Public Service Corporation

Business

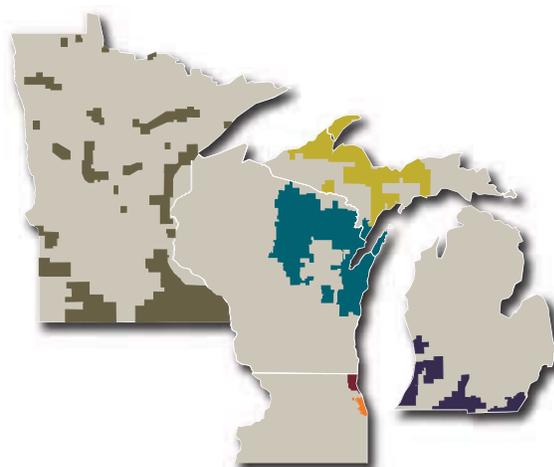

- Established in 1883.
- Regulated electric and natural gas utility.
- Operates in northeastern Wisconsin and an adjacent portion of Upper Michigan (see map above).
- 1,283 employees.

Market

- Serves approximately 443,000 electric customers and approximately 321,000 natural gas customers within its 12,000-square-mile service area.
- Provides electric and natural gas products and services to residential, farm, commercial, and industrial customers. Also provides electric power to wholesale customers.
- Electric operations accounted for 80% and natural gas operations accounted for 20% of 2012 revenues.
- Electric revenues are comprised of 86.4% retail sales and 13.6% wholesale sales.
- Wisconsin customers accounted for 98% and Michigan customers accounted for 2% of 2012 revenues, excluding the impact of decoupling.

Facilities

- Electric generating capacity based on summer capacity ratings is 2,173.7 megawatts, including the utility's share of jointly owned facilities. A peak demand was reached on July 16, 2012, with a system demand of 2,347 megawatts. At the time of this summer peak, total firm resources (i.e., generation plus firm purchases) totaled 3,173 megawatts.
- Electric property includes approximately 21,700 miles of electric distribution lines, 97.5% of which are operated at 24.9 kilovolts, and 124 distribution substations.
- Natural gas property includes approximately 7,950 miles of distribution and transmission main (75% is plastic main), 86 natural gas distribution and transmission gate stations, and approximately 299,000 natural gas lateral services.

- Michigan Gas Utilities Corporation
- Minnesota Energy Resources Corporation
- North Shore Gas Company
- The Peoples Gas Light and Coke Company
- Upper Peninsula Power Company
- Wisconsin Public Service Corporation

Minnesota Energy Resources Corporation

Business

- Natural gas distribution operations for more than 80 years (acquired by Integritys Energy Group in 2006).
- Regulated natural gas utility.
- Operates in Minnesota (see map above).
- 214 employees.

Market

- Provides natural gas distribution services to approximately 214,000 natural gas customers in 165 communities.
- Natural gas revenues are comprised of 100% retail sales.

Facilities

- Natural gas property includes approximately 4,500 miles of distribution and transmission main (approximately 66% is plastic main), 164 natural gas distribution and transmission gate stations, and 203,800 natural gas lateral services.

Michigan Gas Utilities Corporation

Business

- Natural gas distribution operations since 1859 (acquired by Integritys Energy Group in 2006).
- Regulated natural gas utility.
- Operates in southern and western Michigan (see map above).
- 153 employees.

Market

- Provides natural gas distribution services to approximately 168,000 natural gas customers in 147 communities.
- Natural gas revenues are comprised of 100% retail sales.

Facilities

- Owns a 3.9 billion-cubic-foot natural gas storage field.
- Natural gas property includes approximately 3,860 miles of distribution and transmission main (approximately 52% is plastic main), 33 natural gas distribution and transmission gate stations, and approximately 165,000 natural gas lateral services.

North Shore Gas Company

Business

- Established in 1900 (acquired by Integritys Energy Group in 2007).
- Regulated natural gas utility.
- Operates in Illinois (see map above).
- 161 employees.

Market

- Serves approximately 158,000 residential, commercial, and industrial retail sales and transportation customers located in 54 communities within the northern suburbs of Chicago.
- Natural gas revenues are comprised of 100% retail sales.

Facilities

- Approximately 2,330 miles of natural gas distribution and transmission main (approximately 39% is plastic main), 6 natural gas distribution and transmission gate stations, and approximately 144,000 natural gas lateral services.

Upper Peninsula Power Company

Business

- Established in 1884 (acquired by Integritys Energy Group in 1998).
- Regulated electric utility.
- Operates primarily in rural countryside covering 10 of the 15 counties in the Upper Peninsula of Michigan (see map above).
- 114 employees.

Market

- Serves approximately 52,000 electric customers in 86 incorporated communities.
- Electric revenues are comprised of 98.9% retail sales and 1.1% wholesale sales.

Facilities

- Electric generating capacity based on summer capacity ratings is 49.2 megawatts. A peak demand was reached on July 5, 2012, with a system demand of 105 megawatts. At the time of this peak, total firm resources totaled 195 megawatts.
- Electric property includes approximately 3,300 miles of electric distribution lines and 57 distribution substations.

At-A-Glance

Electric Transmission Investment

American Transmission Company LLC

Business

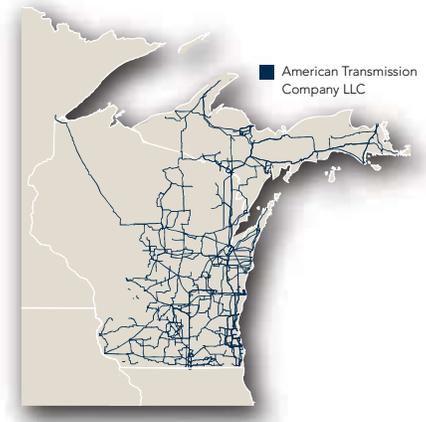

- A federally regulated for-profit, transmission-only company that owns, maintains, monitors, and operates electric transmission assets in Wisconsin, Michigan, Minnesota, and Illinois (see map at right).
- Assets were previously owned and operated by multiple electric utilities serving the upper Midwest, all of which transferred their transmission assets to American Transmission Company. Companies that transferred transmission assets or cash to American Transmission Company are now equity owners.
- The Midwest Independent Transmission System Operator (MISO) directs American Transmission Company's operation of the transmission system.
- Regulated by the Federal Energy Regulatory Commission for rates and tariffs and by the states in which it operates for siting transmission infrastructure.
- Domiciled in the United States and began operations in 2001.

- Integrys Energy Group owns approximately 34% of American Transmission Company.
- Wisconsin Public Service and Upper Peninsula Power provide construction and other services to, and receive network transmission services from, American Transmission Company.
- Integrys Energy Group has \$476.6 million invested in American Transmission Company.

Facilities

- \$3.3 billion of transmission assets consisting of 9,440 circuit miles of transmission line and 525 substations (wholly or jointly owned).
- American Transmission Company plans to invest between \$3.9 billion and \$4.8 billion during the next 10 years based on its 2012 Ten-Year Transmission System Assessment (dated September 2012).
- In September 2011, DATC, a joint venture between Duke Energy and American Transmission Company that was created to develop projects throughout North America, submitted to MISO a plan that includes seven distinct projects in Iowa, Wisconsin, Illinois, Indiana, and Ohio. The DATC projects include between 900 and 1,000 circuit miles of

345-kilovolt lines and 550 miles of 500-kilovolt high-voltage direct-current lines. The individual projects range from 65 to 680 miles and have a total cost of between \$4.2 billion and \$4.5 billion.

Nonregulated Operations

Integrys Energy Services, Inc.

Business

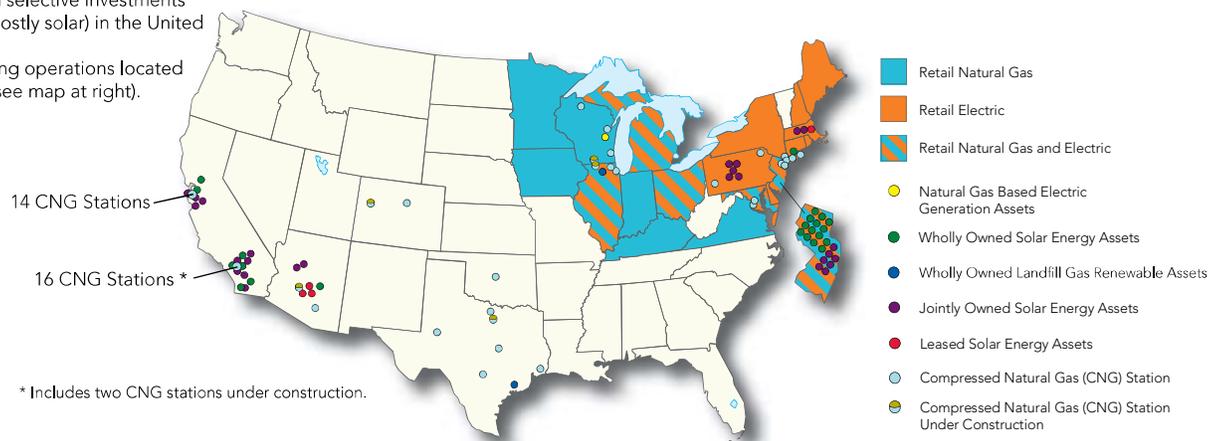

- Established in 1994.
- Competitive retail natural gas and electricity supply and services company, which also owns and operates various nonregulated electric generation facilities.
- Emphasis is on serving retail (industrial, commercial, and residential) customers in the northeast quadrant of the United States with selective investments in renewable projects (mostly solar) in the United States.
- Principal energy marketing operations located near customers served (see map at right).
- 267 employees.

Products and Services

- Provides individualized natural gas and electricity supply solutions, structured products, and strategies that allow customers to manage energy needs.
- Comprehensive community aggregation energy solutions.
- Generation areas of expertise include cogeneration, distributed generation, renewables such as solar and landfill gas, as well as other clean fuel generation.

Facilities

- Renewable generation facilities totaling 34.0 megawatts of summer-rated capacity as follows:
 - 27.9 megawatts of photovoltaic solar generation facilities.
 - 6.1 megawatts of landfill gas-fueled reciprocating engine facilities.
- 208.1 megawatts (summer rated capacity) of traditional fossil-fuel facilities, all held for sale at December 31, 2012.

* Includes two CNG stations under construction.

Holding Company and Other

The Holding Company and Other segment includes the operations of the Integrys Energy Group holding company, Integrys Business Support, LLC, and Integrys Transportation Fuels, LLC, along with the nonutility activities at The Peoples Gas Light and Coke Company, Wisconsin Public Service Corporation, Minnesota Energy Resources Corporation, Michigan Gas Utilities Corporation, North Shore Gas Company, and Upper Peninsula Power Company.

Integrys Business Support, LLC

Business

- Established in 2007, became operational on January 1, 2008.
- Provides centralized business support services to Integrys Energy Group, Inc. and its subsidiaries.
- 1,254 employees.

Integrys Transportation Fuels, LLC

Business

- Established in 2011.
- Acquired Pinnacle CNG Systems and Trillium USA in September 2011. Together, Trillium (founded in 1991) and Pinnacle (founded in 1994) are the second-largest compressed natural gas station operators in the United States.
- Provides compressed natural gas transportation fuel products and services.
- Designs, builds, and operates compressed natural gas fueling stations (see map above).
- 88 employees.

A Letter to Shareholders

Fellow Shareholders:

You might think we're all about energy. And certainly, energy is the commodity we provide. But the truth is, we're all about people. Our daily work is an investment in the livelihood of our customers, the safety of our employees, the support of our communities, and the success of our shareholders. With so much at stake, we put a priority on people. It's an investment that's worth the energy!

As an energy company, we're focused on improving reliability and reducing risk by making infrastructure investments that are good for all of our stakeholders. As a team, we accomplish a lot.

The Year In Review

At our regulated utilities, we led the way with a proposal for the first commercial installation of Regenerative Activated Coke Technology (ReACT) in the United States. This new technology for coal-fired electric power plants simultaneously reduces multiple pollutants using only a fraction of the water that conventional wet scrubbers demand. Wisconsin Public Service (WPS) is seeking Public Service Commission of Wisconsin (PSCW) approval to design, construct, install, and operate this new emission control system on our 325-megawatt Weston 3 generation facility. We expect the \$250 million ReACT project to be operational in 2016. Our customers and the communities we serve will reap environmental benefits of cleaner air while this prudent rate base investment delivers a return for our shareholders.

In parts of WPS's service territory where there is a higher risk of outages due to weather related events, we're planning a 5-year System Modernization and Reliability Project (SMRP). This project is focused on converting areas of overhead electric distribution system to underground where feasible, as well as upgrading portions of the system with

Charles A. Schrock
Chairman, President and Chief Executive Officer

advanced technology. We've initiated the approval process with the PSCW to convert about 200 miles of electric distribution line each year, benefitting about 5,000 customers annually, to improve electric service reliability. We expect this \$200 million project to be completed in 2019. We're investing to ensure our customers continue to have reliable electric power when and where they need it.

"Integrus Energy Services was awarded the right to serve electric customers in the city of Chicago under the largest aggregation program in the nation."

We've also announced our intent to purchase the Fox Energy Center, a 593-megawatt combined-cycle natural gas-fired plant located just south of Green Bay, Wisconsin. The \$390 million acquisition gives WPS a more balanced electric generation portfolio that includes coal, natural gas, hydroelectric, wind, and other renewable sources. This acquisition also enhances supply and pricing options, allowing us to better

manage our generation assets and the overall cost of energy for our customers' benefit. And our shareholders will see a return on this prudent infrastructure investment.

In Chicago, we're upgrading the Peoples Gas natural gas distribution system by replacing cast- and ductile-iron pipe with state-of-the-art polyethylene technology. During the first two years of this program, we've installed nearly 300 miles of new main, retired 140 miles of cast iron main, and set more than 42,000 meters for customers across the city. In 2013 we'll continue these prudent efforts, staying on track to upgrade and modernize around 2,000 miles of the natural gas distribution system in Chicago over the next two decades.

By making these infrastructure investments, we're able to reduce risk in our distribution systems, increase efficiency, and bring long-term environmental and service benefits to our customers.

Our nonregulated subsidiaries also saw successes during 2012. Integrus Energy Services was awarded the right

to serve electric customers in the city of Chicago under the largest aggregation program in the nation. This is in addition to supplying electric service to 45 other Illinois municipalities. For more than a year, our employees worked diligently and collaboratively

“Recognizing the importance of our dividend to many of our investors, we maintained our quarterly dividend of 68 cents per share.”

to learn from our experiences in other aggregation efforts to be ready for this opportunity. As a result, our Illinois electric aggregation customers are collectively saving millions of dollars in energy costs.

At Integrys Transportation Fuels (ITF), 2012 was a year of integration and growth as we worked with existing and potential customers to create and execute development opportunities. We achieved growth in our targeted segments of trucking, transit, and refuse hauling through the construction of 12 new compressed natural gas (CNG) fueling stations. Five station upgrades were also completed, and over \$5 million of manufactured equipment was sold. By year-end, we were providing operations and maintenance service for 52 stations nationwide. Our 2012 fuel sales exceeded 35 million CNG gasoline gallon equivalents through stations we own or operate. This includes our sales to joint venture partners, such as Paper Transport, Inc. and AMP Americas, along with other industry-leading customers.

Our joint venture with AMP Americas is part of the foundation for further growth of our CNG business. With a focus on building a network of CNG fueling stations along the I-65 and I-75 corridors to support AMP Americas' clients, this has the potential to be attractive to other fleets that use the same route.

ITF came together as one team with a collective direction, conquering the typical challenges of business integration. We impressed the market with CNG fueling station designs,

equipment performance, and operations support – demonstrating what it means to be a team with character.

One of our key corporate initiatives during 2012 was safety. Employees embraced their work with safety in mind, reducing the number of injuries, which in turn provided safety performance improvements and cost savings. I'm pleased that compared to 2011, we reduced our injury rate by 29% and our severity rate by an impressive 30%. This means that more of our employees are returning home to their families without injury every day—and that is our most important measure of safety.

We also put a strong emphasis on training. At Peoples Gas, we partnered with the State of Illinois, City Colleges of Chicago – Dawson Technical Institute, the Utility Workers Union of America, and our own Local 18007 to form the Gas Sector Utility Workers Training Program. This successful program trains potential natural gas operations employees and targets veterans and displaced workers. Students receive training on industry standards, hands-on instruction, and general education during a concentrated six-month program and a one-month field internship with Peoples Gas. Three groups of graduates have provided immediate support to Peoples Gas and helped bridge resource needs to support our infrastructure improvement program. This ongoing initiative will provide employment opportunities in Illinois and help replenish our skilled workforce as we face retirements in the coming years.

Every year I am heartened to see how employees from all levels of the company embrace our corporate citizenship strategy by demonstrating support for their communities. I am proud to lead such dedicated people. You can learn more in our 2012 Corporate Citizenship Report titled “A Priority on People...It's Worth The Energy®!”

GO TO
<http://www.integrysgroup.com/corporatereports/> or scan this QR code with your smartphone to access our 2012 Corporate Citizenship Report.

Financially, we had a strong year. Our utilities performed well despite one of the warmest years on record. At the same time, our nonregulated business grew contracted sales volumes in a very competitive marketplace. Together, we established the groundwork for future growth in our utilities with the pending Fox Energy Center acquisition, progress on our pipeline replacement program in Chicago, and investments in system modernization and environmental controls. We were also able to take advantage of favorable market conditions to refinance debt and lower our interest costs.

Recognizing the importance of our dividend to many of our investors, we maintained our quarterly dividend of 68 cents per share. We've now paid a dividend for 72 consecutive years

“The importance of creating long-term value for our shareholders, customers, employees, and communities hasn't changed...”

without any decreases, which places us among a rare group of companies to achieve this. We are confident that our business plan will continue to sustain this quarterly dividend level going forward.

Our 2012 total return (reinvested dividends and capital appreciation) outperformed the S&P Utilities Index (1.35% vs. 1.29%). This is further evidence that execution of our business plan is on track and delivering results.

What's Ahead in 2013

The importance of creating long-term value for our shareholders, customers, employees, and communities hasn't changed—it's a strategic priority for us as we provide our customers with the best value in energy and related services.

We're focused on providing safe, reliable, and affordable energy to our customers, while delivering 4% to 6% growth in diluted earnings per share – adjusted on an average annualized basis (with 2011 as the base

year) through 2015 for our shareholders. We're committed to keeping our values of integrity, innovation, safety, collaboration, respect for employees, service to customers, value for owners, and support for communities at the forefront of everything we do. And we know that placing a priority on people is essential to getting our job done—and that's why it's worth the energy!

The Right Leadership

Last year, Jim Kemerling retired from the Board after 25 years of outstanding service. Holly Keller Koeppel was elected to fill the vacant position, and Al Budney was selected as lead director.

Larry Borgard, our President and Chief Operating Officer – Utilities, completed a year-long term as chairman of the American Gas Association. Larry shared his 28 years of diverse utility experience with others in the industry and represented the natural gas industry on significant policy issues in venues around the world.

Diane Ford, Vice President and Corporate Controller, and Barth Wolf,

Vice President, Chief Legal Officer and Secretary, announced their retirement early in 2012. Their departure last fall, with a combined 61 years of experience, left big shoes to fill. But our succession planning process ensured we had talent available within, and we tapped Linda Kallas as Vice President and Corporate Controller, and Jodi Caro as Vice President, General Counsel and Secretary.

Joe O'Leary will be retiring in 2013. We thank Joe for his dedication to Integrys and for his many contributions, which have been instrumental in our success. Other executive team changes in 2013 include Jim Schott being appointed Vice President and Chief Financial Officer, Phil Mikulsky named Executive Vice President – Corporate Initiatives and Chief Security Officer, Mark Radtke named Executive Vice President – Shared Services and Chief Strategy Officer, and Bill Laakso named Vice President – Human Resources and Corporate Communications.

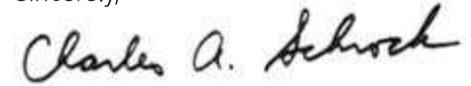

At Integrys, we want to ensure our leaders are prepared to make a difference. That's why we created our

Leadership Development Program. Since its inception in 2001, the number of graduates now exceeds 1,000. Effective leadership enhances individuals, teams, and the organization as a whole. Leadership makes a difference.

Placing a priority on people and giving them room to grow and do great things for our customers, the communities we serve, and our shareholders really is worth the energy!

Thank you for the continued confidence you've placed in us.

Sincerely,

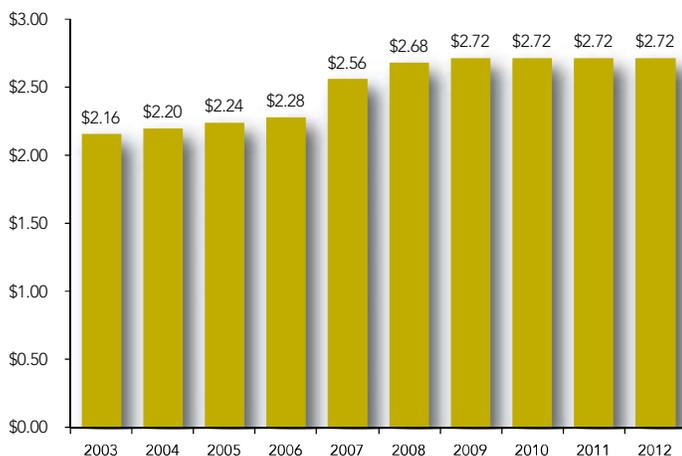

Charles A. Schrock
Chairman, President and Chief Executive Officer

Investor Information

Common Stock

The New York Stock Exchange is the principal market for Integrys Energy Group, Inc. common stock, which trades under the ticker symbol of TEG. On December 31, 2012, we had 77,902,467 shares of common stock outstanding, which were owned by 28,425 holders of record.

Dividends

We have paid cash dividends on our common stock since 1940, and we expect to continue that trend subject to Board approval, regulatory limitations, earnings, capital requirements, cash flows, and other financial considerations.

Year Ended December 31 (By Quarter)

		Dividends Per Share	Price Range	
			High	Low
2012	1st quarter	\$.68	\$54.88	\$50.80
	2nd quarter	.68	57.55	50.89
	3rd quarter	.68	61.92	51.79
	4th quarter	.68	55.83	51.14
		<u>\$.272</u>		
2011	1st quarter	\$.68	\$51.03	\$47.51
	2nd quarter	.68	54.02	49.10
	3rd quarter	.68	52.79	42.76
	4th quarter	.68	54.61	45.75
		<u>\$.272</u>		

Stock Investment Plan

We maintain a Stock Investment Plan for the purchase of common stock, which allows persons who are not already shareholders to become participants by making a minimum initial cash investment of \$100. Our Plan enables you to maintain registration with us in your own name rather than with a broker in "street name." As a participant in the Stock Investment Plan, you may transfer certificated shares of common stock registered in your name into a Plan account for safekeeping.

The Stock Investment Plan also provides you with options for reinvesting your dividends and making optional cash purchases of common stock directly through the Plan without paying brokerage commissions, fees, or service charges. Optional cash payments of not less than \$25 per payment may be made subject to a maximum of \$100,000 per calendar year. An automatic investment option allows you to authorize the deduction of payments from your checking or savings account automatically once each month, on the third day of the month, by electronic means for investment in the Plan. Cash for investment must be received by the 3rd or 18th day of the month. Investment generally commences on or about the 5th or 20th day of the month, or as soon thereafter as practicable.

The shares you hold in our Stock Investment Plan may be sold by the agent for the Plan as you direct us, or you may request a stock certificate for sale through a broker you select. We will accumulate sale requests from participants and, approximately every two business days, will submit a sale request to the independent broker-dealer on behalf of those participants.

Participation in the Stock Investment Plan is being offered only by means of a prospectus. If you would like a copy of the Stock Investment Plan prospectus, you may use the American Stock Transfer & Trust Company, LLC website at www.amstock.com, call American Stock Transfer & Trust Company, LLC at 800-236-1551, contact us by sending an e-mail to investor@integrysgroup.com, or order or download the prospectus and enrollment forms from our website at www.integrysgroup.com under "Investors."

Stock Transfer Agent and Registrar

Our transfer agent, American Stock Transfer & Trust Company, LLC, can be reached via telephone between 7 a.m. and 7 p.m., Central time, Monday through Friday, by calling 800-236-1551. You also have direct access to your account 24 hours a day through the Internet at https://secure.amstock.com/shareholder/sh_login.asp.

Questions about transferring stock, lost certificates, or changing the name in which certificates are registered should be directed to American Stock Transfer & Trust Company, LLC at the telephone numbers or addresses listed on the back cover. If your address changes, write to American Stock Transfer & Trust Company, LLC at the address on the back of this report or use their website at www.amstock.com.

Availability of Information

Company financial information is available on our website at www.integrysgroup.com under "Investors."

Our 2012 Annual Report on Form 10-K is included within this document. If you would like to receive, without charge, another copy of our 2012 Form 10-K, without exhibits, as filed with the Securities and Exchange Commission, please write to the Corporate Secretary at the corporate office mailing address listed on the back cover, or visit our website.

Internet

Visit our website at www.integrysgroup.com to find a wealth of information about our company and its subsidiaries. The site will give you instant access to Annual Reports, SEC filings, proxy statements, financial news, presentations, news releases, corporate governance information, career opportunities, and much more. You may also download a copy of the prospectus for the Stock Investment Plan and the associated forms for participation in the Plan.

Annual Shareholders' Meeting

Our Annual Shareholders' Meeting will be held on Thursday, May 16, 2013, at 10 a.m. Central daylight time at the Weidner Center, on the campus of the University of Wisconsin – Green Bay, 2420 Nicolet Drive, Green Bay, Wisconsin. Proxy statements for our May 16, 2013, Annual Shareholders' Meeting were mailed to shareholders of record on April 1, 2013.

Annual Report

If you or another member of your household receives more than one Annual Report because of differences in the registration of your accounts, please contact our Investor Relations Department at 800-228-6888 for assistance.

This Annual Report is prepared primarily for the information of our shareholders and is not given in connection with the sale of any security or offer to sell or buy any security.

Corporate Governance Information

Corporate governance information, including our Corporate Governance Guidelines, our Code of Conduct, charters for the committees of our Board of Directors, By-Laws, and Articles of Incorporation, is available on our website at www.integrysgroup.com under "Investors." You may also obtain the information by written request to the Corporate Secretary at the mailing address for the corporate office indicated on the back cover of this report.

Certifications

We have filed as exhibits to our Annual Report on Form 10-K for the fiscal year ended December 31, 2012, the certifications of our Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act. We also submitted to the New York Stock Exchange during 2012 the Annual CEO Certification required by Section 303A.12(a) of the New York Stock Exchange Listed Company Manual.
