RE: Faraday-PPG Transmission Project – Open House Invitation

Dear NAME,

Ameren Illinois proposes to build two 138,000-volt transmission lines that will connect the new Ameren Faraday substation to the existing Mt. Zion PPG (Pittsburgh Plate Glass) substation. Named the Faraday-PPG Transmission Project, the new transmission lines will support the Illinois Rivers Project, recently approved by the Illinois Commerce Commission (ICC). The availability of two routes will provide improved reliability during storms and outages, among other benefits. Ameren Illinois proposes to place the two new lines in service by December 2016. A map of the preliminary routes is enclosed for your review. You received this letter because we identified you as a property owner along or near at least one of the preliminary routes.

We invite you to join us at one of our nine upcoming public open house sessions. The open houses will provide a project overview, answer questions, and collect input for the routing process. The same information will be available at each open house; there will be no formal presentation. The open houses will be informal events, providing for one-on-one conversations. You are welcome to attend anytime during the hours listed. Refreshments will be available.

All open houses will be held at the Mt. Zion Village East Convention Center which is located at 1400 Mt. Zion Parkway in Mt. Zion, IL.

Public Open House Schedule

Date	Time
Tuesday, September 30	7:00 to 9:00 a.m.
	11:00 a.m. to 1:00 p.m.
	5:00 to 7:00 p.m.
Wednesday, October 1	7:00 to 9:00 a.m.
	11:00 a.m. to 1:00 p.m.
	5:00 to 7:00 p.m.
Thursday, October 2	7:00 to 9:00 a.m.
	11:00 a.m. to 1:00 p.m.
	5:00 to 7:00 p.m.

The open houses are part of the process where, later this year, Ameren Illinois will file a petition with the ICC requesting approval of the Faraday-PPG Transmission Project and of the recommended routes for the two new transmission lines.

For additional information, visit our website (FaradayTransmission.com), send us an email (FaradayTransmission@ameren.com) or call our toll-free information line (877.655.2349).

Sincerely,

Peggy L. Ladd

Director, Ameren Transmission Stakeholder Relations

County Clerk Invitation Letter

370 S. Main Street
Decatur, IL 62523
Ameren.com

September 8, 2014

Mr. Stephen Bean
Macon County Office Building
141 South Main Street, Room 104
Decatur, IL 62523

**RE: Faraday-PPG Transmission Project
Macon County, Illinois
Notice of Public Meeting**

Dear Mr. Bean,

In accordance with 220 ILCS 5/8-406.1, Ameren Illinois hereby provides notice to the Macon County Clerk of public open houses to be conducted on September 30 – October 2, 2014 for the Faraday-PPG Transmission Project. A copy of the meeting advertisement that will be published in the Mt. Zion Life & Region News on September 10, September 17, September 24 and October 1, 2014 and the advertisement that will be published in the Herald & Review on September 14, September 21, and September 28, 2014 are also enclosed.

Project Description

Ameren Illinois proposes to construct two 138 kilovolt (kV) transmission lines to connect the existing Pittsburgh Plate Glass (PPG) Substation to the new Ameren Transmission Company of Illinois (ATXI) 345/138 kV Faraday Substation. The proposed transmission lines will be designed for single circuit 138 kV operation. The transmission lines will primarily consist of single shaft steel poles, unless engineering requirements dictate otherwise. The height of the poles is estimated to range from 70 to 120 feet. Ameren Illinois requires a 100 foot wide right-of-way for all 138 kV circuits. Therefore, construction of the two new proposed transmission lines will require two non-adjacent 100 foot wide easements.

Project Need

The ATXI Faraday Substation was approved for construction by the Illinois Commerce Commission (Commission) in Docket 12-0598. The Commission found that a new 345 kV transmission line, together with related facilities and extending approximately 375 miles across the State of Illinois, is necessary to provide adequate, reliable, and efficient service to Ameren Illinois area customers, will promote the development of an effectively competitive electricity market that operates efficiently, is equitable to all customers, and is the least cost means of satisfying those objectives. The Commission approved construction of that project, known as the Illinois Rivers Project. Once integrated into the existing Illinois electric transmission system, the Illinois Rivers Project will provide additional transmission capacity, increase reliability, deliver renewable energy, and provide additional economic and market efficiency benefits to Ameren Illinois customers and customers outside Illinois. The proposed Faraday-PPG Transmission Project will integrate, in part, the Illinois Rivers Project into the existing system. Therefore, the two proposed transmission lines are necessary to realize the full benefits of the Illinois Rivers Project. Ameren Illinois proposes to place the two new lines in service by December 2016.

For additional information, visit our website (FaradayTransmission.com), send us an email (FaradayTransmission@ameren.com) or call our toll-free information line (877.655.2349). Additionally, if you have any questions, please do not hesitate to contact me at syoung4@ameren.com or 217.424.6851. Thank you in advance for your time and consideration.

Sincerely,

Stacey R. Young

Community Relations Coordinator
SYoung4@ameren.com

Enclosures: Newspaper Advertisement

Ameren is working on the development of two 138,000-volt transmission lines to connect the new Ameren Faraday Substation to the existing PPG (Pittsburgh Plate Glass) Substation. Each line will be up to eight miles long using single shaft steel poles. The new lines will support the overall Illinois Rivers Project, recently approved by the Illinois Commerce Commission. The availability of two routes provides improved reliability during storms and outages. The Faraday-PPG Transmission Project is anticipated to be in-service by December 2016.

Please join us for an open house near you – because your input matters.

Your opinion is vital in the development of the Faraday-PPG Transmission Project. The open houses will provide a project overview and provide an opportunity to collect your input on the preliminary routes.
