Dan,

Both subject crossings have been completed with a concrete surface.

David,

Do you submit the referenced forms? Do you need any information from me?

Thanks,

Ellis A. Mays

Ellis, the completion due date for this project was 11/11/15. Has all the work been finished? If so, please submit the required updated US DOT Forms.

Thanks,
Dan Drewes

Ellis,

All of the concrete crossing panels (256') have arrived. We are still waiting on the rail, OTM, 10' ties etc. to arrive. The detour plan is going to be handled by local forces and will be handled with the town of Madison & Madison County officials. The two crossings are next to each other, but will have shallow impact on local traffic in the area.

Jason,

Have we received materials for Iowa (AE8.91) and Washington St. (AE8.84) projects? I know you were working on detour plans in May – has there been any progression on that

Thanks,

Ellis A. Mays

Dan,

Ellis Mays (copied) is now the NS engineer who handles Illinois projects. I apologize for the confusion, there was a bit of transition last year.

Thanks,
Jennifer Hurley

Jennifer, the above case deals with highway- rail crossing surface renewals at Washington St and Iowa St in Madison, Madison County, Illinois. The 3 month progress report is due today and this email comes as a reminder for providing that report.

Thanks,
Dan Drewes
