GAS SERVICE CONVERSION AGREEMENT

Service Address 1234 MAIN ST
ANYTOWN IL 99999

Dear Customer,

Thank you for your interest in switching to Ameren Illinois natural gas service at the above address. We look forward to this opportunity to serve your gas needs. This letter confirms your request and serves as an agreement outlining our mutual responsibilities. We will move forward with your new gas service as soon as we receive this signed and dated agreement.

Customer Responsibilities

- Meet qualifying load requirements.
- Ensure that natural gas piping, fittings, valves and utilization equipment and their installation meet specifications of the National Fuel Gas Code (NFPA-54) and applicable local codes.
- Ensure that customer fuel line (which connects the gas meter to NFPA-approved interior piping) is minimum of 1" IPS Schedule S 40 black iron pipe.
- Convert the qualifying appliances to natural gas service within six months of completion of the gas main extension. (We will let you know the scheduling timeframe for your new gas service).
- Ensure that appliances being converted are in safe operating condition.

Ameren Illinois Responsibilities

- Install gas service to address noted above.
- Provide up to 60' of 1" or smaller gas service at no charge to the customer. Any footage over 60' will be charged to the customer at the standard gas footage charge.

Please sign and return this agreement at your earliest convenience, so Ameren Illinois can move forward with installation of your new gas service.

If you have any questions, please contact us at 1.888.659.4540 or IllinoisConstruction@ameren.com. We are available Monday through Friday, 7:30 a.m. to 5 p.m.

Our goal is for customers to be fully satisfied with every aspect of their interaction with Ameren Illinois. If for any reason you feel less than satisfied with the service you receive, please let us know so we can resolve any concerns you may have.

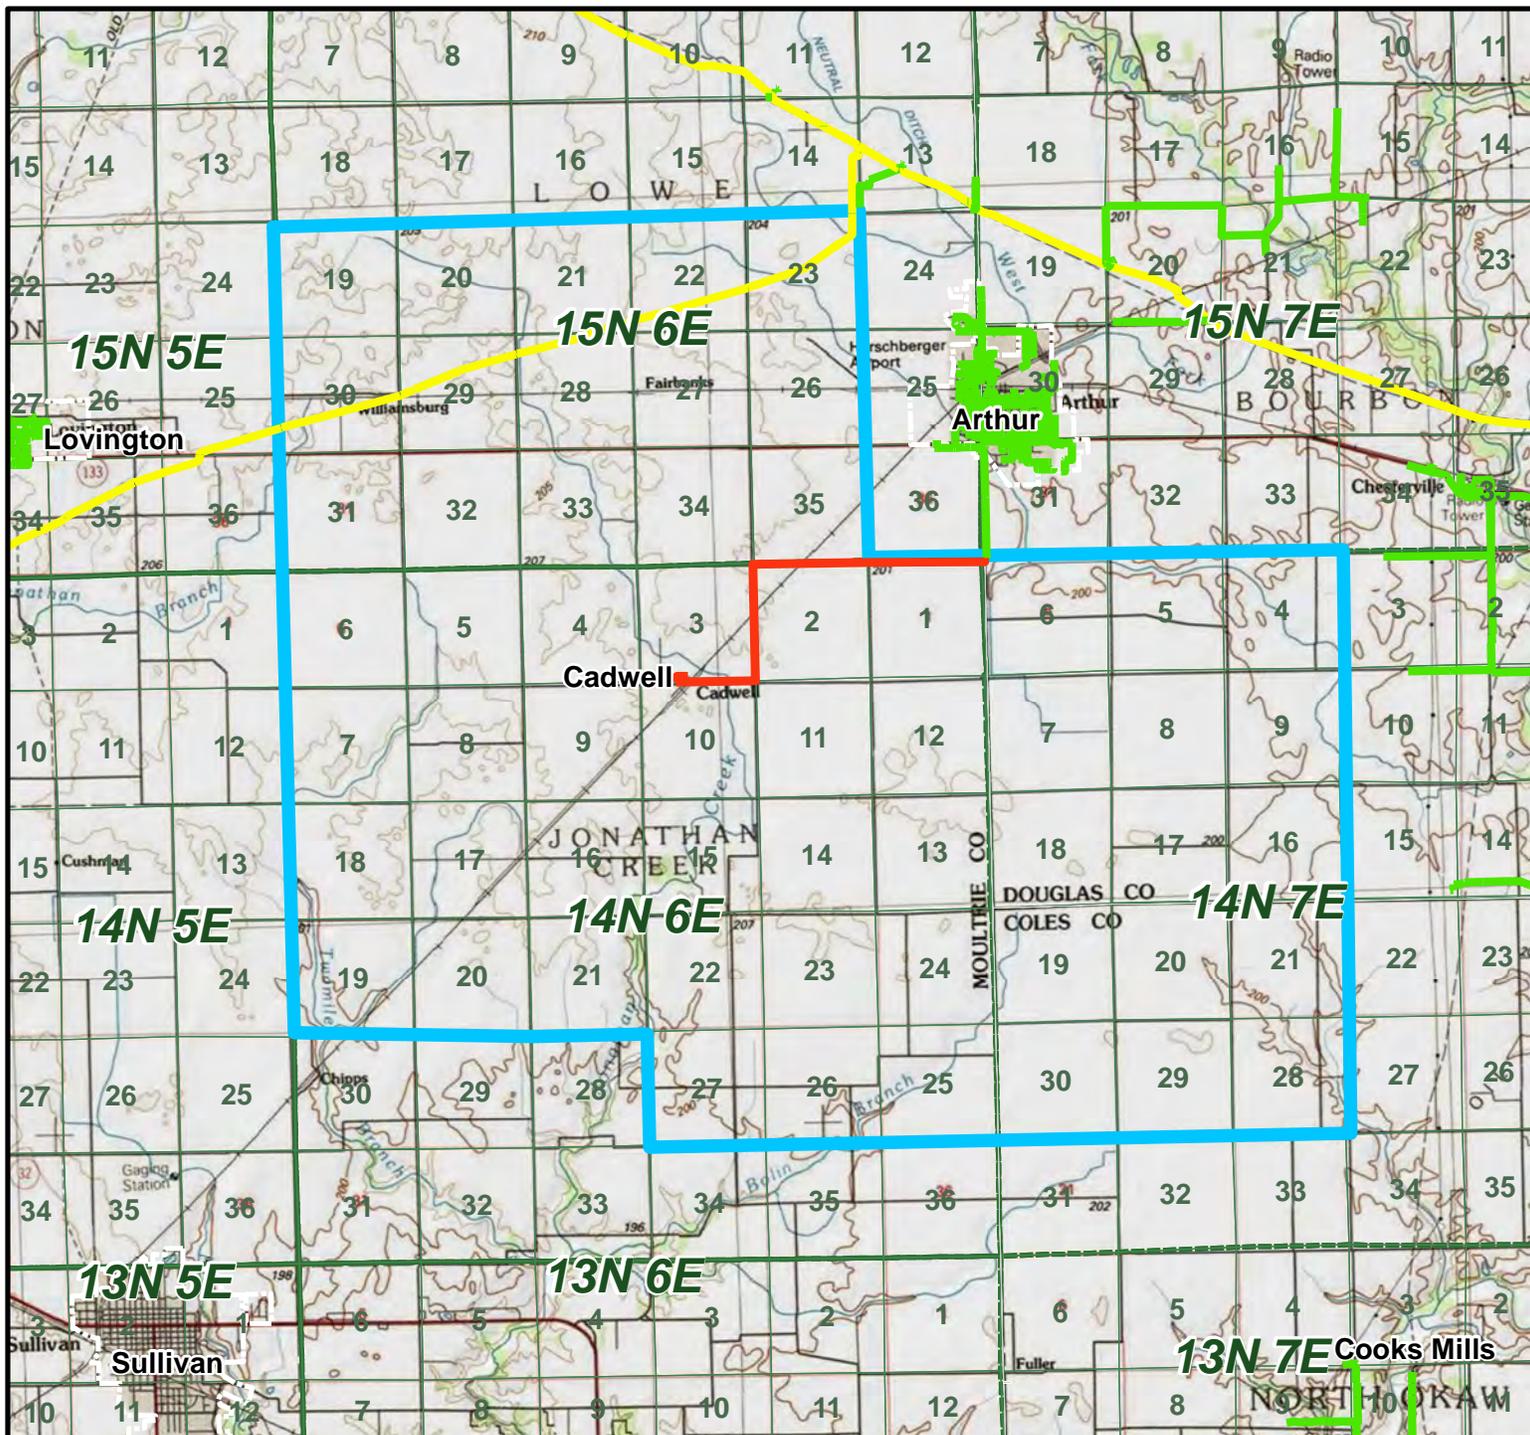

Thank you for your business. We look forward to serving you.

Sincerely,

Ameren Illinois
1.888.659.4540

NATURAL GAS DISTRIBUTION SYSTEM EXTENSION AGREEMENT

This Natural Gas Distribution System Extension Agreement (herein "Agreement"), is entered into as of this 18 day of November, 2015 by and between Miller's Holzwerk LLC (herein "Customer") and Ameren Illinois Company ("Company") (collectively, the "Parties").

Whereas *Customer* has made application (DOJM WR/Contract # 9SOU043088) to *Company* for natural gas service at 1545 CR 1900 N. Arthur, IL. This request requires a line extension. The Total Cost to extend service shall be \$621,513.18, minus any upfront Allowance(s) in the amount of \$178,035.00, for an Adjusted Total Cost of \$443,478.18. Allowances shall be provided at the sole discretion of *Company*, and if extended, will be based on the number of new service connections that, in the sole estimation of *Company*, are reasonably certain to occur, times the per connection Standard Cost Equivalent in effect at the time this Agreement is executed. *Customer* shall remain liable to *Company* in the event connections that are factored into any Allowance(s) do not occur. For avoidance of doubt, *Customer* may be liable for an amount up and potentially exceeding the Total Cost.

Whereas *Customer* has further requested a distribution system extension at or to the aforesaid premises and agrees to same pursuant to the *Company's* Standards and Qualifications for Gas Service, to wit:

- 1)
 - a) *Customer* will deposit with *Company* at the time his/her signature is attached hereto the said sum of \$218,478.18 (Refundable deposit) to cover the amount that exceeds the cost of the extension provided at no charge pursuant to *Company's* Standards and Qualifications for Gas Service.
 - b) In addition to the Refundable Deposit, *Customer* must provide *Company* with a non-refundable contribution of \$225,000.00 (Non-refundable Contribution). (The amount of the Refundable Deposit plus the amount of the Non-Refundable Contribution will equal the Adjusted Total Cost.)
- 2) *Customer* shall be responsible for providing, at no charge, a "laydown yard" sufficient to stage the equipment and materials necessary for the line extension. *Customer* shall also be responsible for securing all necessary rights-of-way. These rights-of-way shall be obtained in the name of *Company*, in the form and manner required by *Company*. For avoidance of doubt, *Customer* shall be responsible for compensating affected landowners for all rights-of-way secured, to the extent applicable, and for the labor associated with these activities. Nothing about this relationship shall affect the *Company's* right or ability to seek any condemnation authority necessary to complete the line extension and *Customer* shall cooperate in those efforts to the extent necessary.
- 3) *Company* agrees to refund to *Customer* the sum of \$4,565.00 (Refund) for each subsequent qualifying service connection from said distribution system extension and in the Town of Cadwell.
- 4) Upon approval by *Company*, *Customer* may provide a "Letter of Credit" or "Payment Bond" for the entire term of this Agreement in lieu of a deposit to assure payment of the Refundable Deposit. The "Letter of Credit" or "Payment Bond" may be reduced annually by the amount that would have been refunded had *Customer* made an actual deposit.
- 5) The above Refund shall be made for each qualifying customer (one per lot), whose service shall be taken from said extension only within a period of: ___ ten (10) years from the date of this Agreement when the Refundable Deposit is made in cash or for a period of X seven (7) years when the Refundable Deposit is made by Letter of Credit or Payment Bond.
- 6) Refund process is initiated only at *Customer's* request and said request must be received at least 10 days prior to the date of contract expiration. *Customer* request to *Company* must be in writing, and include work the request number as listed above and the service address of any connections made to said extension. The *Company* may, at its sole discretion, provide a Refund where the request is made orally to a *Company* representative prior to the date of contract expiration. At no time shall the cumulative amount of Refunds made exceed the Refundable Deposit and no interest shall be paid on such Refundable Deposit. At the end of this Agreement, any remaining portion of such Refundable Deposit shall become the property of *Company*.
- 7) *Company* agrees to commence work on said extension after receipt and posting of all deposits or other requirements (other requirements include, but are not limited to, permits, *Customer* readiness, completion of grade and easements) and to use every reasonable effort to complete the same. *Company's* ability to extend service as outlined herein shall be contingent on *Company* obtaining all necessary regulatory or other government approvals, if any, including

NATURAL GAS DISTRIBUTION SYSTEM EXTENSION AGREEMENT

but not limited to Illinois Commerce Commission approval to construct the line extension, to the extent required as determined by *Company* in its sole discretion. In addition, to the extent service will be extended to and provided in the Town of Cadwell, *Company's* ability to extend service will be contingent upon the Town of Cadwell executing *Company's* standard natural gas franchise agreement.

- 7) The title to said extension shall at all times be and remain vested in *Company*, its successors and assigns.
- 8) This Agreement shall not be assigned without the consent of the *Company*, which consent shall not be unreasonably withheld. If assigned, the Agreement shall be binding on the *Customer's* successors and assigns.

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement in duplicate, and *Customer* acknowledges concurrence with all terms, of *Company's* Standards and Qualifications for Gas Service, and *Company's* refund policy, which are in effect as of the date of this Agreement.

AMENDMENT TO GAS/ELECTRIC AGREEMENTS WHEN DEPOSIT SECURITY IS REQUIRED
FOR ONE OF THE FOLLOWING:
1) LINE EXTENSION AGREEMENT
2) SYSTEM EXTENSION OR MODIFICATION GUARANTEE AGREEMENT

Whereas. MILLER'S HOLZWERK LLC (herein "Customer") and Ameren Illinois Company, an Illinois corporation, (herein "Company") (Collectively, the "Parties") have entered into a(n) Gas/Electric Line Extension Agreement or System Extension or Modification Guarantee Agreement (herein "Agreement") associated with DOJM work request number 9SOU043088 dated the 13TH day of AUGUST, 2015 and Customer desires to satisfy the deposit requirement contained in the Agreement with an irrevocable standby letter of credit or a payment bond, it is agreed as follows:

1. Customer shall provide the Company with an irrevocable standby letter of credit or a payment bond from a financial institution that is acceptable to the Company and in a form acceptable to the Company (both in the Company's sole discretion) in satisfaction of the deposit requirement;
2. Customer shall keep an irrevocable standby letter of credit or a payment bond in force and effect during the entire term of the Agreement, provided however, Customer may replace an irrevocable standby letter of credit or a payment bond with a cash deposit.
3. In the event the Customer fails to have in effect at any time a standby letter of credit, payment bond or a cash deposit, Customer shall be in default and all payments due and owing under the Agreement shall become immediately due and payable
4. As long as the Customer satisfies the deposit requirement with an irrevocable standby letter of credit or payment bond, Customer shall not be entitled to any refund under the terms of the Agreement; provided however, Customer shall be entitled to reduce the amount of any irrevocable standby letter of credit or payment bond, or cash deposit by the amount of refund Customer would have received under the Agreement had Customer made a cash deposit. In no event shall the Customer's refund exceed the amount of the actual cash deposit held by the Company.

Effective this 18 day of November, 2015.

Meter Location on Right Side of House

Meter Location on Left Side of House

Manufactured Home Construction and Safety Standards:

All mobile home customer gas piping, fittings, valves and utilization equipment must meet the specifications of and be installed in accordance with the Manufactured Home Construction and Safety Standards - Part 3280.

National Fuel Code:

- All customer gas piping, fittings, valves and utilization equipment must meet the specifications of and be installed in accordance with the National Fuel Gas Code (NFPA-54) or applicable local codes.

Any requested variances from the above specifications must be approved in advance by Ameren Illinois in mutual agreement with the contractor or homeowner.

Please contact Ameren Illinois Construction & Engineering Services at 1.888.659.4540 if you have any questions.

NEW GAS SERVICE INSTALLATIONS

The following is a list of specifications that must be met before a new gas service can be installed. Failure to meet any of the listed requirements may cause a delay in receiving gas service and/or require the relocation of the gas facilities at the expense of the contractor or homeowner.

Gas Service Installation: Customer Requirements

- The proposed route of the gas service must be clear of all construction material, debris, and spoil.
- The yard must be within six (6) inches of finished grade before the gas service will be installed.
- Lot lines must be clearly marked.
- Where customer owned underground facilities are installed, such as the sprinkler system, septic system, invisible dog fence, etc., the contractor or homeowner is responsible for marking the location. (See www.Illinois1Call.com—Customer owned facilities)

Gas Meter Installation: Ameren Illinois Requirements

- The inlet riser to the gas meter set will be located between 2 and 5 feet from the front corner of the house. Ameren Illinois will be installing a meter bracket which will be solidly mounted to the structure with 3/8" bolts with expansion anchors, tapcons or other suitable means. (See drawing on back)
- The bottom of the bracket needs to be located 2 inches above finished grade, within 2 to 5 feet from the front of building. The customer is

responsible for marking the finished grade on the foundation for installation of the bracket.
Note: A meter bracket is not required for slab foundation construction.

- The gas regulator relief vent requires at least a three (3) foot radial clearance from any electric meter, air conditioning condensing unit, electrical outlet, electrical disconnect, or other potential source of ignition. (See drawing on back)
- The gas regulator relief vent will not be installed below, above, or within 12" horizontally to the side of a basement or first floor window (that can be opened), door, stairs, dryer vents, furnace intakes/exhausts, or other potential air inlet to the house.

Fuel Line: Customer Requirements

- The customer's fuel line is the pipe that connects to the outlet of the gas meter set and extends through the wall into the house. The fuel line should enter the house or structure within three (3) feet of the gas meter set.
- The customer fuel line from the meter through the house wall must be a minimum of one (1) inch IPS schedule 40 black iron pipe. For Corrugated Stainless Steel Tubing (CSST) installations, a termination fitting mounted on the outside house wall is acceptable for the transition from black iron pipe.
- CSST must be grounded where it enters the house to avoid damage or possible gas leaks from nearby lightning strikes.
- The customer fuel line must not be installed below finished grade unless an approved (stamped) plastic gas pipe is used. This is because of corrosion that causes underground leaks.

- Where the plastic pipe is run below-ground, a locating wire (normally a #12 wire approved for direct burial) will be installed next to the pipe with both ends brought above-ground to allow the pipe to be located.
- Where the plastic gas pipe is brought above ground, an approved anode less riser pipe must also be used. An underground transition from plastic to iron pipe is not permitted due to potential corrosion leaks.
- Customer should install a shut off valve outside of the downstream side of the gas meter for the customer's use.
- The customer fuel line must be pressure tested to a minimum of 3 psig in accordance with the National Fuel Gas Code or applicable local codes.
- The contractor or homeowner is responsible for pressure testing the customer's fuel line prior to connecting to the gas meter set. The gas meter set must be plumb and level after connected to customer piping.

Mobile Homes:

- Ameren Illinois will install a meter stake for support of the gas meter. (Meter bracket is not required)
- The fuel line must be supported beneath the mobile home chassis by means of metallic hanging supports.
- The mobile home skirting will be considered the structure wall.
- The fuel line from the mobile home skirting to the meter must be a minimum of one (1) inch IPS Schedule 40 black iron pipe.

COSTS OF CONVERTING TO NATURAL GAS

Converting to natural gas offers many benefits, but costs must be considered, too. The conversion process typically involves two types of costs:

- **Pipeline extension costs** include the work Ameren Illinois must do to get natural gas to your home.
- **Appliance costs** include the work typically performed by a qualified plumbing or heating contractor to make your home and appliances ready for natural gas.

PIPELINE EXTENSION COSTS

Gas mains must typically be extended in order to serve customers living in rural areas. Ameren Illinois will provide a portion of the pipeline extension at no cost to the customer. The customer will pay for any additional lengths of service pipe or gas main at the rates defined in our tariff.

Consider cost sharing. Since each new Ameren Illinois gas customer is now eligible for up to 400' of main extension at no cost, a group of customers living in the same neighborhood may be able to combine their allotted extensions to increase the total main extension and decrease the overall cost of the project.

APPLIANCE CONVERSION COSTS

Many appliances that currently use propane can easily be converted to natural gas. A qualified plumbing or heating contractor will need to upgrade your home fuel line and install a conversion kit to adapt your appliances for natural gas use. However, depending on the age and make of the equipment, some appliances may need to be replaced to operate safely.

Home fuel lines. Fuel lines for propane may not be adequately sized for natural gas. In these cases, a qualified contractor will need to upgrade your home fuel lines with black iron pipe (recommended), corrugated stainless steel tubing (CSST) or larger diameter copper pipe. Any of these options are acceptable for in-home installation; however, black iron pipe is required from the outside of the home to the gas meter. Consult a qualified plumbing or heating contractor for proper sizing and installation in accordance with the National Fuel Gas Code (NFPA-54).

Pipeline Extension

Cost to Customer**

400' of main pipeline extension per customer*	FREE
60' of service pipeline extension per customer	FREE
> 400' of main extension	\$9/foot
> 60' of service pipeline extension	\$8/foot

* Ameren Illinois will not provide a free main extension to homes where gas would only be used for a gas fireplace, gas grill or other occasional use equipment.

** Costs are approximate. Refer to Natural Gas Tariffs for up-to-date information.

Appliance

Potential Conversion Cost

Furnace	\$150-\$250
Kitchen stove	\$100-\$200
Clothes dryer	\$100-\$200
Water heater replacement	\$650-\$750
Fuel line replacement (if required)	\$750-\$850

* Conversion costs are represented as approximate amounts. Please contact a qualified plumbing or heating contractor for an estimate specific to your home and appliances.

CONVERTING TO NATURAL GAS

WHAT YOU NEED TO KNOW

IS NATURAL GAS THE RIGHT CHOICE FOR YOU?

Propane may have been an easy choice – or the only choice – for heating when you first moved into your home. But there has never been a better time to convert to clean, convenient, low-cost natural gas.

Ameren Illinois continually expands and upgrades its

energy delivery system to meet the needs of growing communities. That means natural gas is becoming a viable choice in areas where propane was once the only option. Whatever you decide, it's worth taking a closer look at natural gas.

NATURAL GAS: The Natural Choice

Natural gas offers many advantages over propane and other fuels. Explore the benefits and discover why natural gas is the natural choice for thousands of homeowners in your area.

Affordable – While the cost of other fossil fuels continue to rise, the cost of natural gas has remained relatively stable. In fact, you could save up to 60 percent on fuel costs with natural gas. And because natural gas appliances are so efficient, you'll save every month on energy costs.

Convenient – Natural gas is delivered to your home through underground piping, so you never have to worry about running low on fuel, scheduling tank refills or maintaining storage tanks.

Safe – When used properly, natural gas is an extremely safe fuel choice. Natural gas is naturally colorless, tasteless and odorless, so Ameren Illinois adds a rotten-egg smell to make it easier to detect a natural gas leak. For

added safety, we install an excess flow valve on all new residential gas service lines to stop the flow of natural gas if a service line is damaged or ruptures.

Abundant – Natural gas supplies in the U.S. are abundant, so you can count on a ready supply of fuel.

Reliable – Our pipeline system provides natural gas on demand, so it's always there when you need it. In the rare event of a leak, we respond quickly, any time of the day or night — at no charge to the customer.

Clean – Natural gas is the cleanest-burning fossil fuel, so it is less harmful to the environment.

Compare Your Costs

Use the Fuel Cost Comparison Calculator at Ameren.com/convert-to-gas to find out how much you could save by converting from propane to natural gas.

GETTING STARTED

It's easy to convert to natural gas — just follow the steps outlined below. We will work with you through every phase of your conversion process.

- Call Ameren Illinois at **1.888.659.4540** to find out if natural gas service is available at your location.
- Complete and submit the application for new gas service. The application can be found at Ameren.com/convert-to-gas or by calling **1.888.659.4540**.
- Pay any required deposits.
- Prepare your home and property for new natural gas service:
 - » Check for required easements, licenses or permits.
 - » Clear right-of-ways of trees and other obstructions.

Energy Independence

More than 98% of our nation's natural gas comes from North America.

- » Locate and mark underground, customer-owned facilities, such as propane lines for pool heater permanently installed grills. (**Note:** Ameren Illinois will arrange to have JULIE locate underground public utilities.)
- » Work with a qualified plumbing or heating contractor to upgrade your home fuel line and convert your appliances from propane to natural gas with a conversion that your contractor can install.

PIPELINE SAFETY IS DAILY FOCUS

To keep our pipeline systems safe, we perform regular maintenance and monitor our equipment 24 hours a day. If an incident or leak is detected or reported, we respond within the hour. Our highly trained employees must pass rigorous testing and follow strict standards, codes and regulations.

READY FOR HASSLE-FREE HEATING?

Natural gas is a clean, efficient and low-cost form of energy — and may be a viable option for you. If you choose natural gas, you can count on a steady supply to keep you comfortable at less cost throughout the winter. Every day, Ameren Illinois delivers safe, reliable natural gas to more than 800,000 customers in central and southern Illinois. We look forward to serving you.
