Subject: Letter of exception

To all parties concerned, I didn't know if this letter had to be an email or other form. I have spent money on electricians only to keep coming to the same result, nothing in this house has drawn that much electricity. The two electric contractors that are witnesses, could not come on the hearing dates scheduled. The manager stated he has to come in their place and it would have to be a evidentiary hearing, because his employees has to be in the field. They have done video investigations and wire testing which is all documented and video ready for viewing. A neighbor is my other witness, his home is all electric and his bills never go over 500.00, winter or summer. I just hope since I can't prove my case in court I can make some sort of arrangements. I don't know how to forward these. Please forward to all parties involved
