**APPLICATION OF CLEARWAVE COMMUNICATIONS, INC.
EXHIBIT I**

<u>TYPE</u>	<u>QUANTITY</u>	<u>USE</u>
Class IV Switch	1	Long-distance
Class V Switch (Taqua)	1	Voice
Digital Cross Connect	1	Line grooming
M13 Multiplexer	2	Fiber termination
ATM Switch	1	Network termination

Method of Transmission

ClearWave will initially resell the system and services of other carriers and as a result will use the other *carriers'* methods of transmission, Upon the company's installation of facilities-based capability, individual network elements of other carriers will be leased in order to assemble its own system. Even at the point of facilities-based status, the company will use other carriers physical facilities to transmit signals.

Physical Route of Transmission

The physical route of transmission will be over facilities of other carriers to the PSTN.
