Hi Todd,

I'm sorry for the delay in responding...
It took a bit of investigating to get to the Verizon West Policy on terminating Interconnection trunks on Enterprise Facilities. Unfortunately the West policy is the same as the east, as you can see in the message below.
We will not terminate interconnection trunks on a retail/enterprise facility.
I hope this information will assist you in making a decision on interconnecting in Illinois.

Take care,
Dianne

Dianne,

We received word from Product Management that the Verizon West policy is the same as the east. The CLEC may not terminate interconnection facilities on a retail facility.

Hi Charles,
Thank you fro responding so quickly.
This customer is interested in using a existing enterprise services mux at
the location.
Would we be able to place the trunks on that type of facility?
Verizon East has a policy against such an arrangement.
thanks for your help,
Dianne

Dianne,

VZwest does not require a fiber build in order to interconnect. CLEC's may
use leased facilities, collocation, or fiber.

Please let me know if you need anything else.

Hi Candy,

North County Communications would like to become a CLEC in Illinois. Todd Lesser has a question about Verizon's policy on entrance facilities before he begins. Would you please take a look at the bolded paragraph below and advise me on our policy in Illinois?

Thank you so much,
Dianne

I am sorry, I was obviously unclear. What I was trying to say is that
I didn't want to waste any of our time if Verizon was going to require
a fiber build and wouldn't use the same facilities that they would for
a retail customer.

Obviously, we shouldn't even bother negotiating an interconnection
agreement if Verizon is going to require a fiber build. Would it be
possible to find out if Verizon still requires a fiber build or the use
of a wholesale fiber mux to be used for all interconnections?

I assume this would be something you could easily find out without us
having to go through the whole interconnection process.

Thank you for reaffirming that Verizon is not in Iowa. I chose Iowa as
our secondary choice because Qwest will provision interconnection
trunks using the same facilities that they do for their retail
customers. Therefore, we could easily be interconnected within
sixty-six days; the number of days that our required for turn up of
prefixes in the LERG.

Thank you in advance for your courtesy and cooperation in this matter.
