

Important information regarding electricity generation and the environment

Mt. Carmel Public Utility Environmental Disclosure Statement

The disclosure of this information is required under Section 16-127 of the Electric Service Customer Choice and Rate Relief Law of 1997 and the rules of the Illinois Commerce Commission, 83 Ill. Adm. Code 421.

Sources of Electricity Supplied for the 12 Months Ending December 31, 2011	Percentage of Total
Biomass power	0%
Coal-fired power	69%
Hydro power	1%
Natural gas-fired power	7%
Nuclear power	18%
Oil-fired power	0%
Solar power	0%
Wind power	4%
Other resources	1%
Unknown resources purchase from other companies	0%
TOTAL	100%

AMOUNT OF EMISSIONS AND AMOUNT OF NUCLEAR WASTE per 1000 kilowatt-hours (kWhs) PRODUCED from KNOWN Sources For the 12 Months Ending December 31, 2011		
Carbon Dioxide		1,625 lbs.
Nitrogen Oxides		1.10 lbs.
Sulfur Dioxides		3.24 lbs.
High-Level Nuclear Waste		.0010 lbs.
Low-Level Nuclear Waste		.0002 cu.feet

100% of the total electricity was purchased from Ameren Energy Marketing. Additional information on companies selling electrical power in Illinois may be found at www.icc.state.il.us. The disclosure of this information is required under Section 16-127 of the Electric Service Customer Choice and Rate Relief Law of 1997 and the rules of the Illinois Commerce Commission, 83 Ill. Admin. Code 421.

Resident or Current Occupant

Mt. Carmel Public Utility Company (MCPUC) located at 316 Market Street, in compliance with federal code RP 1162 Public Awareness Program, would like to inform you that a high-pressure gas line could be located in the vicinity of your residence or business. This gas line is for the purpose of supplying natural gas in a safe and reliable manner.

All gas mains, service lines, and meter installations are leak surveyed at least within a three year period to help discover any potential gas leak hazards. Corrosion control is applied to coated steel pipe, and tested at one year intervals.

Natural gas is lighter than air and has no odor. To help you detect the presence of natural gas, a strong odorant, a mercaptan mixture that smells like sulfur or "rotten eggs", is added so that you can smell a leak immediately. Everyone in your family should learn to recognize this smell.

If you smell a faint odor near an appliance:

Make sure all the pilot lights are lit. If you find a pilot light extinguished, open the windows and doors to vent the area and wait 15 minutes before relighting the pilot light. If the odor persists, call MCPUC anytime, 24 hours a day, 7 days a week (24/7), at (618)262-5151 (toll free at 1-877-262-7036). Investigating gas odor complaints is a free service of MCPUC.

If you smell gas inside your home or business and the smell is a strong, persistent natural gas odor, or you hear a hissing or leaking sound you should:

1. Immediately leave the building (home or office), taking everyone with you (including pets), and leave all doors and windows open behind you.
2. Call from a nearby telephone at a safe distance by dialing (618) 262-5151 or 1-877-262-7036.
3. Do not re-enter the building until MCPUC officials have inspected and declared the area safe.

In these conditions:

DO NOT use matches, lighters, electrical switches, any appliances, telephones, cellular phones, computers, elevators or garage door openers.

DO NOT touch electrical outlets, switches or doorbells

DO NOT smoke, use a lighter, match or other open flame.

Remember that any gas piping downstream of the gas meter is customer owned, and is the responsibility of the customer to maintain this portion of the natural gas line. Customer owned gas lines should be checked regularly by a qualified plumbing or heating professional for leaks and signs of corrosion. Any unsafe conditions should be repaired immediately, if found.

Before you excavate, Illinois law requires that you call **J.U.L.I.E.** toll free at **811** or **1-800-892-0123, 24/7.**

It's a free service to locate and mark underground utilities including water, electric, telephone, cable TV, natural gas lines, and other facilities. MCPUC does not locate customer owned natural gas, or customer owned electric underground lines. Examples of customer owned lines might include yard lights, gas grills, and swimming pool heaters.

For your safety, never use your gas oven or range to heat your home. Space heaters are designed to add warmth but should not be a main source of heating. Remember to turn these appliances off before you go to bed or leave your home.

Know your gas meter location and exercise care when shoveling, plowing, mowing, or snow blowing in the area around the gas meter installation. If for any reason you need your gas shut off to your residence or business call MCPUC and we will be happy to assist you.

For additional natural gas information or gas emergency please call (618) 262-5151 or toll free 1-877-262-7036. Additional information can also be found on the Company website at <http://www.mtcpu.com>.
