ILLINOIS COMMERCE COMMISSION

June 2, 2010

The Honorable Members of the Illinois General Assembly
State House
Springfield, Illinois

Dear Honorable Members of the Illinois General Assembly:

Pursuant to Section 21-1101(j) of the Illinois Public Utilities Act, the Illinois Commerce Commission submits the attached Annual Report on Cable and Video Service Deployment by Providers Granted State-Issued Cable and Video Service Authorization.

The Cable and Video Competition Law of 2007 directs the ICC to submit to the General Assembly a report containing year-end data collected from holders of State-issued video and cable services authorizations. The law requires holders of State-issued video and cable services authorizations to meet certain deployment benchmarks by set dates after they receive state authorization. These dates and deployment benchmarks vary according to the providers' number of telecommunications access lines in the State.

Sincerely,

A handwritten signature in black ink, appearing to read "Manuel Flores".

Manuel Flores
Acting Chairman

Annual Report on Cable and Video Service Deployment
by Providers Granted State-Issued Cable and Video
Service Authorization

Submitted to the Illinois General Assembly
Pursuant to Section 21-1101(j) of the
Illinois Public Utilities Act

Illinois Commerce Commission
527 East Capitol Avenue
Springfield, Illinois 62701

June 2, 2010

Introduction

The Cable and Video Competition Law of 2007¹ (hereafter “Cable and Video Law”) directs holders of State-issued video and cable services authorizations to annually report to the Illinois Commerce Commission (“Commission”) cable and video service penetration information. Specifically, Section 21-1101(j) of the Cable and Video Law states:

- (j) Every holder of a State-issued authorization, no later than April 1, 2009, and annually no later than April 1 thereafter, shall report to the Commission for each of the service areas as described in subsections (b), (c), and (d) of this Section in which it provides access to its video service in the State, the following information:
 - (1) Cable service and video service information:
 - (A) The number of households in the holder’s telecommunications service area within each designated market area as described in subsections (b) and (c) of this Section or exchange or local unit of government as described in subsection (d) of this Section in which it offers video service.
 - (B) The number of households in the holder’s telecommunications service area within each designated market area as described in subsections (b) and (c) of this Section or exchange or local unit of government as described in subsection (d) of this Section that are offered access to video service by the holder.
 - (C) The number of households in the holder’s telecommunications service area in the State.
 - (D) The number of households in the holder’s telecommunications service area in the State that are offered access to video service by the holder.

¹ 220 ILCS 5/21-100, et seq.

- (2) Low-income household information:
- (A) The number of low-income households in the holder's telecommunications service area within each designated market area as described in subsections (b) and (c) of this Section, as further identified in terms of exchanges, or exchange or local unit of government as described in subsection (d) of this Section in which it offers video service.²
 - (B) The number of low-income households in the holder's telecommunications service area within each designated market area as described in subsections (b) and (c) of this Section, as further identified in terms of exchanges, or exchange or local unit of government as described in subsection (d) of this Section in the State that are offered access to video service by the holder.
 - (C) The number of low-income households in the holder's telecommunications service area in the State.
 - (D) The number of low-income households in the holder's telecommunications service area in the State that are offered access to video service by the holder.

The Cable and Video Law directs the Commission to include the penetration information supplied to it by holders of State-issued video and cable services authorizations in an annual report to the General Assembly. Section 21-1101(k) of the Cable and Video Law provides that:

The Commission, within 30 days of receiving the first report from holders under this Section, and annually no later than July 1 thereafter, shall submit to the General Assembly a report that includes, based on year-end data, the information submitted by holders pursuant to subdivisions (1) and (2) of subsection (j) of this Section. The Commission shall make this report available to any member of the public or any local unit of government upon request. All information submitted to the Commission and designated by holders as confidential and proprietary shall be subject to the disclosure provisions in

² 220 ILCS 5/21-1101(j)

subsection (c) of Section 21-401 of this Act. No individually identifiable customer information shall be subject to public disclosure.³

Commission Activities Related to the Cable and Video Competition Law of 2007

Since the Cable and Video Law took effect on June 30, 2007, the Commission has received applications from two companies seeking authorization to provide video and/or cable services. On September 24, 2007, the Illinois Bell Telephone Company (hereafter “AT&T Illinois”) applied for State-issued authorization to use, occupy, and construct facilities in the public rights-of-way for the delivery of video service and for State-issued authorization to provide video services. On October 24, 2007, in ICC Docket 07-0493, the Commission approved AT&T Illinois’s application to provide video service, and authorized AT&T Illinois to use, occupy and construct facilities in the public rights of way for the delivery of video service in the service area footprint.

A second application was submitted to the Commission on January 20, 2010, by WideOpenWest, LLC. On February 2, 2010, in Docket No. 10-0048, WideOpenWest, LLC withdrew its application for state-issued authorization to provide cable service within the state of Illinois. At the regular bench session of February 24, 2010, the Commission granted WideOpenWest, LLC’s request to withdraw its application. On March 23, 2010, in Docket No. 10-0218, WideOpenWest LLC submitted a new application for state-issued authorization to provide cable service within the state of Illinois. At the regular bench session of April 21, 2010, the Commission approved WideOpenWest, LLC’s application to provide cable or video service, and authorized WideOpenWest, LLC’s to use, occupy and construct facilities in the public rights of way for the delivery of cable or video service in the service area footprint.

AT&T Illinois’s Second Annual Report to the Commission

On April 1, 2010, AT&T Illinois submitted to the Commission a document entitled “AT&T Illinois Second Annual Video Service Access Report” (hereafter “AT&T Report”). The AT&T Report, which states that it is submitted in compliance with Section 21-1101(j) of the Cable and Video Law, consists of a summary report and two attachments, for the year ending December 31, 2009.

The Cable and Video Law requires holders of State-issued video and cable services authorizations to meet certain deployment benchmarks by set dates after they receive

³ 220 ILCS 5/21-1101(k)

state authorization. These dates and deployment benchmarks vary according to the providers' number of telecommunications access lines in the State. AT&T Illinois is classified as a provider with more than 1,000,000 telecommunications access lines in the State, and is hence subject to the requirements of Section 21-1101(c) of the Cable and Video Act. As such, the earliest date that AT&T will be required to satisfy a benchmark under the Act is October 23, 2010. AT&T Illinois generally reports that it has made substantial progress towards meeting its statutory benchmarks.

In its report to the Commission, AT&T Illinois reported, among other information:

- The number of households in each exchange in which AT&T Illinois offers video service;
- The number of households in each exchange that are offered access to video service by AT&T Illinois;
- The number of households in AT&T Illinois's telecommunications service area in the State;
- The number of households in AT&T Illinois's telecommunications service area offered access to video service by AT&T Illinois;
- The number of low-income households in AT&T Illinois's exchanges in which AT&T Illinois offers video service;
- The number of low-income households in each exchange that are offered access to video service by AT&T Illinois;
- The number of low-income households in AT&T Illinois's telecommunications service area in the State; and
- The number of low-income households in AT&T Illinois's telecommunications service area in the State that are offered access to video service by AT&T Illinois.

Based upon this information, AT&T Illinois asserts it has made, to date, substantial progress in meeting the statutory deployment requirements. Among the video service build-out requirements contained in PUA Section 21-1101(c)(1) are the requirements that:

[T]he holder shall provide access to its cable or video service to a number of households equal to at least 35% of the households in the holder's telecommunications service area in the State within 3 years after the date

a holder receives a State-issued authorization from the Commission and to a number not less than 50% of these households within 5 years after the date a holder receives a State-issued authorization from the Commission; provided that the holder of a State-issued authorization is not required to meet the 50% requirement in this paragraph (1) until 2 years after at least 15% of the households with access to the holder's video service subscribe to the service for 6 consecutive months.

Thus, AT&T Illinois is required to provide video access to at least 35% of the households in its telecommunications service area by October 23, 2010. According to Attachment 1 of AT&T Illinois's report to the Commission, as of December 31, 2009, AT&T Illinois reports providing video access to 31% of the households in its telecommunications service area. Therefore, while AT&T Illinois has not yet met its 35% requirement, AT&T Illinois has until October 23, 2010, to meet legal obligations imposed under Section 21-1101.

Section 21-1101(c)(1) of the Cable and Video Law also provides that:

The holder's obligation to provide such access in the State shall be distributed, as the holder determines, within 3 designated market areas, one in each of the northeastern, central, and southwestern portions of the holder's telecommunications service area in the State. The designated market area for the northeastern portion shall consist of 2 separate and distinct reporting areas: (i) a city with more than 1,000,000 inhabitants, and (ii) all other local units of government on a combined basis within such designated market area in which it offers video service.

In designating market areas, AT&T Illinois's report identifies the northeastern market as the Chicago Designated Market Area ("Chicago DMA"), the central market as the Champaign & Springfield/Decatur Designated Market Area ("Champaign & Springfield/Decatur DMA"), and the southwestern market area as the St. Louis Designated Market Area ("St. Louis DMA"). AT&T Illinois divides the Chicago DMA between the City of Chicago (i.e., the city with more than 1,000,000 inhabitants located in the northeastern market area) and areas within the Chicago DMA outside the City of Chicago.

For the Chicago DMA, AT&T Illinois reports a current build out coverage of 36%, as a percentage of its telecommunications household footprint. For the portion of the Chicago DMA outside the City of Chicago, AT&T Illinois reports a build out percentage

of 46%,⁴ while the percentage for the City of Chicago is reported at 17%. For the Champaign & Springfield/Decatur DMA, AT&T Illinois reports a build-out percentage of 22%. For the St. Louis DMA, AT&T Illinois reports a build out percentage of 19%.⁵

PUA Section 21-1101(c)(2) states the following:

Within 3 years after the date a holder receives a State-issued authorization from the Commission, at least 30% of the total households with access to the holder's cable or video service shall be low-income.

This Section also requires AT&T Illinois to offer service to low-income households, and requires that data be measured by each exchange or local unit of government in which the holder chooses to provide cable or video service. In particular, in each exchange in which AT&T Illinois chooses to provide cable or video service, it shall provide access to a percentage of low-income households that is at least equal to the percentage of the total low-income households within that exchange.

With respect to the requirement of Section 21-1101(c)(2) of the PUA that at least 30% of the households to which AT&T Illinois has made access available be low-income households, AT&T Illinois reports that as of December 31, 2009, 26% of the households with access to its video service were low-income. At the exchange level, relative to the requirement that in each exchange AT&T Illinois must have a low-income video access percentage at least equal to the percentage of the total low income households, AT&T Illinois reports that 63 of 97, or 65%, of its exchanges currently meet or exceed that requirement. AT&T Illinois has until October 23, 2010, to meet both the statewide and exchange level standards.

⁴ In AT&T Illinois's first report on cable and video service deployment for the year ended December 31, 2008, AT&T Illinois reported that its build out coverage for the portion of the Chicago DMA outside the City of Chicago was at 47%. For the year ended December 31, 2009, AT&T Illinois reported that its build out coverage for the portion of the Chicago DMA outside the City of Chicago was at 46%. AT&T Illinois representatives indicate that the apparent year to year decline of 1% does not reflect a retraction of facilities already deployed. Rather, build out coverage assumptions in the 2008 report did not turn out to be accurate due to technological limitations.

⁵ In AT&T Illinois's first report on cable and video service deployment for the year ended December 31, 2008, AT&T Illinois reported that its build out coverage for the portion of the St. Louis DMA of Illinois was at 20%. For the year ended December 31, 2009, AT&T Illinois reported that its build out coverage for the portion of the St. Louis DMA was at 19%. AT&T Illinois representatives indicate that the apparent year to year decline of 1% does not reflect a retraction of facilities already deployed. Rather, build out coverage assumptions in the 2008 report did not turn out to be accurate due to technological limitations.

Commission Summary

As of December 31, 2009, AT&T Illinois reports that it has made substantial progress towards meeting its obligations under the Cable and Video Law and claims that it will meet its statutory requirements by the Act's deadline of October 23, 2010. The Commission will, consistent with its statutory obligations, continue to monitor and annually report on AT&T Illinois's deployment efforts.

Report

Re: Docket 07-0493 AT&T Illinois Second Annual Video Service Access Report

CHIEF CLERK'S OFFICE
2010 APR - 1 P 2:24
ILLINOIS COMMERCE COMMISSION

Dear Ms. Rolando:

This Second Annual Video Service Access Report issued by Illinois Bell Telephone Company (AT&T Illinois) is transmitted to you for filing.

This filing complies with the annual report requirement in Section 1101 of the Cable and Video Competition Law of 2007 (the "Act") (220 ILCS 5/21-100. et seq.).

On October 24, 2007, the Illinois Commerce Commission (the "Commission") approved the "Application for State-issued Authorization to Provide Video Service," filed by AT&T Illinois and granted it authority to provide video service in the requested video service area footprint. As a holder of that State-issued authorization, AT&T Illinois is subject to the video service access requirements in Section 21-1101(c) of the Act, and is required to file with the Commission video services access reports no later than April 1 annually. This annual report provides to the Commission the service access information and low-income information required by Section 21-1101(j)(1) and (j)(2) of the Act.

As summarized below, and as detailed and defined in Attachments 1 and 2, AT&T Illinois has made substantial progress toward meeting its three year video service access and low-income access requirements in the Act.

Statewide Video Service Access Requirements

AT&T Illinois is required to provide access to its video service to at least 35% of the households in its telecommunications service area in the State by October 24, 2010, which is 3 years after the date it received a State-issued authorization from the Commission.¹

¹ In addition, AT&T must provide access to not less than 50% of these households within 5 years after October 24, 2007; provided, however, that AT&T Illinois is not required to meet the 50% requirement until 2 years after at least 15% of the households with access to the video service provided by AT&T Illinois subscribe to the service for 6 consecutive months.

As detailed in Attachment 1, as of December 31, 2009, AT&T Illinois provided access to its video service to 31% of the households in its telecommunications service area. This represents 89% of its three year requirement.

Designated Market Area Requirement

AT&T Illinois is required to provide access within three designated market areas (DMA), one in each of the northeastern, central and southwestern portions of its telecommunications service area in the State. The DMA for the northeastern portion consists of two reporting areas: i) the City of Chicago, and ii) all other local units of government on a combined basis within the Chicago DMA.

As detailed in Attachment 1, as of December 31, 2009, AT&T Illinois provided access to its video service to households in the Chicago DMA, including the City of Chicago, the St. Louis DMA, and the Champaign & Springfield/Decatur DMA. This represents full compliance with its three year requirement.

Statewide Low-income Requirement

By October 24, 2010, which is 3 years after the date AT&T Illinois received its Statewide issued authorization, at least 30% of the total households with access to video service provided by AT&T Illinois must be low-income.

As detailed in Attachment 1, as of December 31, 2009, 26% of the households with access to video service provided by AT&T Illinois were low-income households. This represents 87% of its three year requirement.

Exchange Level Low-income Requirement

Within each DMA, the three year obligation for AT&T Illinois to offer video service to low-income households is measured at the exchange level. In each exchange in which AT&T Illinois provided video service, it must provide access to a percentage of low-income households that is at least equal to the percentage of the total low-income households within that exchange.

As detailed in Attachment 2, as of December 31, 2009, the majority of exchanges in which AT&T Illinois provides video service met or were very close to meeting the exchange level low-income requirement for the three year time period.

We respectfully request Commission acceptance of this Report.
