¹These figures constitute the aggregation of information provided by Verde Energy's wholesale energy suppliers, most of whom have indicated that their source is the "PJM system mix". The PJM system mix is the collective generation produced within the PJM Interconnection, which is the regional transmission organization that maintains the safety, reliability, and security of the transmission system and operates an efficient and effective wholesale electric market in 13 states and the District of Columbia. Nuclear Waste rates were based on ComEd's Generation Net for Sale.
