We had it incorrectly listed as a public road, but it does seem to be private based on the St. Clair Parcel map.

Hi Andrew - 296087L is the correct number. Do you show this as a public road? It is private per the railroad and our info.

Steve,

See Tom Healey's response below. I looked at the FRA website and 296087L is listed as a private crossing closed by the State in 1994. How can the state close the crossing if it is private? It is obviously not closed.

Joe

Joe:

The FRA web site shows open public xings at MP 19.94 (Old Freeburg Road, a/k/a Route 4, north of town) and MP 21.21 (Phillips Road, in the heart of downtown). FRA lists no open xings between those mileposts. There is what appears to be a xing visible on Google Earth at the location that you reference. Our track chart shows an unnamed private xing located between those public xings in the southern part of the siding, at roughly MP 20.45. The DOT # that you list below shows up on the FRA site as a private xing at MP 20.48, with the record updated (apparently by the State) in 1994 to show it "closed." Trulia.com indicates that there are two houses accessed by this private road (called either "Lanter" or "Canter" Road on several web sites), one built in 1975 and the other in 1989.

Tom

Gents,

Could someone track down a DOT number for this location? A fatal occurred on Jan 24th and we need a DOT number. It appears that it might be a private crossing (296087L?) from the aerial view using the coordinates shown below.

Thanks,

The public at grade I can't find is located.

I'm assuming it is IC, Northern Division, St Louis Subdivision, Milepost 20.50 since the crossings on either side are IC 296077F MP 19.90 and 296088T 21.20
